

## Order Your Coal Now!

"Anticipating very grave danger of a shortage of coal next winter, the GOVERNMENT urged householders throughout the country tonight to 'buy coal now.' Both COAL and oil shortages are threatened, not by lack of supplies, BUT BY THE DEMANDS THE DEFENSE PROGRAM IS MAKING ON TRANSPORTATION FACILITIES. The coal shortage may be avoided, officials said, if the campaign for SUMMER BUYING SUCCEEDS."

"Every coal consumer who has storage space and the money can do his bit for the nation by ordering and taking delivery during the summer months."

Paul Sifton, Acting Director of the Consumers Counsel, a Government Agency established to protect bituminous coal users, said, 'Coal must be moved this summer. If consumers do not buy now, they may be in trouble later'."

Cecelia, Helen, Rosetta and Billy Healy were visitors at the Marion Finch home Sunday.

### NEW COMPENSATION LAW NOW EFFECTIVE

Tuesday, July 1, the much-debated much understood merit rating system for unemployment compensation payments went into effect. When Oregon's unemployment compensation law was adopted employers were ordered to pay flat three per cent of their payrolls into the system. Of this amount, 2.7 per cent went to the state and the remaining .3 per cent went to the federal social security system for administrative expenses.

After the law had been in operation for awhile it was decided that some employers, who went year after year without laying off any, or only a small percentage, of their help, were paying an unfair amount of the costs of the law.

Since some other employers, with rapid turn-over in their employment on the fund and paying the same three per cent, the merit system was put into effect.

Under the new law payments may drop as low as one per cent, for those employers with the best records. The payments may also go as high as four per cent, for those employers who have drawn the maximum penalty by rapid turn-over of workers drawing from the fund.

### BOARDMAN NEWS

By Elaine Fisher

Pomona Grange met at the grange hall Saturday. There was a good crowd in attendance. An interesting program was put on in the afternoon. Judge Johnson from Hepper talked on "The Flag." County Agent Conrad spoke on "Agriculture" and Wm. Gerking from Hermiston spoke on "Cooperation."

Hazel Tyler and Ed Wamer were united in marriage Saturday. Her mother, Mrs. Oliver Forbes, accompanied them to Idaho for the ceremony. They will reside in Arlington.

Mrs. Chas. Andregg and infant daughter came home from the Hermiston hospital Saturday.

### RIFLES BANNED FOR GAME BIRDS

Rifles may not be used in hunting China Pheasants and other upland birds in any part of the state during the fall bird season, according to gun regulations announced by the Oregon State Game Commission.

This regulation is designed to prevent injury to individuals from stray shots and also is expected to stop the illegal practice of use of rifles

to shoot at birds from automobiles on or by the highways.

All shotguns must be plugged to three shots when hunting upland game birds during the hunting season. Shotguns with buckshot or bird shot are barred from use in hunting for big game. Guns with less than 1,700 foot-pound muzzle energy will not be allowed for antelope. Under the new regulations, guns used in hunting elk will not be allowed if smaller than 30 calibre except when using cartridges with bullets of not

### They squeeze Petroleum to get better orange juice

In orange groves, a gas is "injected" into irrigation water and carried to the roots of the trees to make bigger, sweeter, juicier oranges.

Because scientists at the "University of Petroleum," Shell's \$3,500,000 research laboratories, "squeezed" a petroleum gas and got hydrogen. This they combined with nitrogen to make excellent fertilizer (Shell NH<sub>3</sub>).

Simple? Hardly that. Nor was it simple to combine the right molecules from petroleum and make synthetic rubber, glycerine, explosives — or the new Solutized Shell Gasoline.

Try a tankful of research genius...

## NEW Solutized SHELL

Two scientific factors advance the Road Performance Rating of the new Shell Gasoline to an all-time high:

1. It is refined with the Solutizer Process (Shell research laboratories' Patent No. 2,149,379). This steps up performance by removing the "pro-knock mercaptans."

2. Thermal conversion makes it extra rich in iso-compounds similar to iso-octane—first produced commercially by Shell scientists to give America 100-octane aviation gasoline.

Your Shell dealer now has new Solutized Shell (at regular price) and Shell Premium—try a tankful today!
