**HERMISTON BAPTIST CHURCH**  
Grayden D. Loree, Pastor

Our subject for Sunday morning is "The Eclipse of Christianity." Some today would have us believe that the church has come to the sunset of its existence—it no longer fills its place in the world—other institutions have taken its place. Is that true? Jesus said "On this rock I will build my Church and the gates of hell shall not prevail against it."

Young People's meeting is at 7 o'clock. At 8 o'clock the pastor will bring a message entitled "Can the Ethiopian Change His Skin?" If you are not attending church and Sunday school elsewhere we invite you to worship with us.

**METHODIST CHURCH**  
Malcolm B. Ballinger, Pastor

10 a. m.—Sunday school, Mrs. Al-

**CENTRAL CHURCH OF CHRIST**  
C. Warner, Pastor

For the Sunday morning worship service we shall worship around the thought contained in I Timothy 6: 11-12, "But Thou O Man of God flee these things, and follow after righteousness, Godliness, faith, love, patience, meekness. Fight the good fight of faith and lay hold on eternal life."

There will be no evening service.

**Presenting the Star Performer Golden Shell Motor Oil**

**Does 4 jobs at once!**

"Lighting is 'slow motion' compared to me. If you had x-ray eyes you'd see me do the 4 jobs—all at once—the instant your engine starts . . ."

1. "COOL your engine. I help keep it from gettin' hot up too much when you step on it.
2. "CLEAN out grit an' carbon. I can't stand rubbish hangin' around precision machinery.
3. "SEAL in power. It's a sin to waste power through that little crack between pistons an' cylinder walls!
4. "OIL every one of the movin' parts! Somethin's bound to get hurt if there's friction.

"How do I get that way? It's just a case of proper balance for today's precision-built engines. An' confidentially, they say I'm a steal at a quarter a quart!"

**Gas, Chemicals Effective As Mosquito Exterminator**

Walk out on the lawn on a moist day or saunter among the shrubs and, presto! you may stir up a blitzkrieg.

One hundred of the 150 varieties of the family culicidae—the hungry mosquito to you—will swarm to the attack. You know the rest.

Hordes of them have been, are now and will continue to raise millions of welts on thousands of anatomies.

The best systems of defense against mosquito fleets have been outlined by W. E. Dickinson, Milwaukee, Wis., curator of lower zoology at the museum.

In a special communique he gave directions for gas and chemical warfare to prevent the enemy from winning on the garden party and picnic front.

"Spread small heaps of pyrethrum powder strategically over the field of action," his order reads. "Light the powder and gas the enemy. If you have no pyrethrum powder engage in chemical assault by spraying field of action with mixture of four ounces of cresol, one-third ounce of oil of mybrane and two quarts of kerosene."

In a second order he gives explicit rules for protecting the exposed flanks.

"Apply mixture of one ounce citronella, one ounce spirits of camphor and one-half ounce of oil of cedar, or mixture of equal parts of castor oil, alcohol and either oil of lavender or oil of rose geranium."

In case of attack a third order decrees:

"Strike hard, smash the enemy."

**Mercury Is Only Metal Common in Liquid Form**

Did you ever accidentally break a thermometer and then try to pick up some of the heavy silvery droplets of mercury that had spilled out? They were liquid, yet they did not wet the table's surface. They scurried elusively about; they defied your efforts to seize them. No wonder the Romans christened that mysterious liquid argentum vivum and we today call it by the English translation of that same name—quicksilver.

Many people do not recognize mercury as a metal simply because it is a liquid, writes Harry M. Day in Nature magazine. It is a true metallic element, none the less—just as much a metal as tin, zinc or lead. The fact that we usually see it as a liquid means simply that its melting point happens to fall below our ordinary temperatures; it is, strictly speaking, a molten metal. Professor Braune, at St. Petersburg, first succeeded in freezing it at 40 degrees below zero and recognized its true metallic properties. In its low melting point mercury is unique, and out of its uniqueness arise many of its uses and indispensable services to mankind.

**What You Can Do**  
Neighbors, who are musically inclined, occasion the most disputes. A New York judge, according to news commentator Helen Rowland, ruled with the wisdom of Portia that a man could keep his radio going night and day if he wished but that if one note crossed the air shaft into a neighboring apartment he could be charged with disturbing the peace. People who know their rights may collect liberally upon this knowledge. A widow in the Bronx and her two daughters received \$100,000 from a sheriff's jury in a slander action against a neighbor who had talked with such effect that a policeman engaged to one of the girls broke it off. A manager of a New Jersey country club, who had been charged by a member with forgery, was tried, acquitted, and then won a judgment of \$20,000, for false arrest. The "haymaker" that an Omaha detective landed on the jaw of a robbery suspect proved a boomerang for a court awarded the man \$1,213 damages for the physical pain and indignities he had suffered.

**Perfect Teeth Family Revealed**  
Declared to be a case virtually unparalleled in dental history, a mother and daughter of Los Angeles were discovered to have perfect teeth, during an exposition of the Los Angeles Health Defense exposition, recently. They are Mrs. Jessie Haden and her daughter, Marthe Haden. Mrs. Haden said that her son, Robert, also has perfect teeth. Mrs. Haden explained her molar perfection by stating that she has always eaten good food, plenty of vegetables, raw carrots and leafy dishes. "We drink raw milk at our house," she said. "Since I was a child, I have massaged my gums daily. As a youngster I chewed raw meat for the vitamin content—and perhaps that has something to do with it."

**Real Causes of Divorce**  
Divorce laws and decrees seldom recite the real causes for divorce, according to some psychologists. Things are seldom brought out before the court are the differences in temperament, social background, education, life habits, philosophy of life, etc.

When psychologists bring out these real causes, the parties concerned often become reconciled. One noted psychologist states that no couple should ever seek a divorce without first seeking the advice of a psychologist trained in marriage counselling.

**TOWNSEND CLUB NEWS**

By Mrs. Joe Udey

A business meeting was held at the Townsend pavilion Tuesday, July 22, very important bulletins and flashes from Washington, D. C. were read.

An extra-large crowd enjoyed the fine dance at the open air pavilion Monday night. The music was provided by Johnny Hikiaw and his nine-piece orchestra. His music was so fine that requests were made by the crowd for his return. Monday, July 28, they will play once more at the pavilion. An amateur contest will be included on Monday evening's program and amateurs are asked to register at the box office.

**FARM WOMEN TO MEET AT HOMES**

The meeting of the Farm Bureau auxiliary Friday, July 18, was very interesting with "Our National Parks" as the subject of discussion. Mrs. Fern Zivney was in charge. The ladies are planning a series of dimension teas to be held at the homes of the various members beginning the middle of September. Appointed on the committee were Mrs. J. H. Reid, Mrs. Mabel Weeks and Mrs. Zivney. The next meeting will be August 1 with Mrs. Catherine Sommerer, Mrs. Catherine Jendrzewski and Mrs. May Getchell in charge.

**RED CROSS ASKS AID FROM WOMEN**

An appeal is being made to the women of Hermiston to aid the national Red Cross. All women who are interested and willing to help are asked to come to the Central Church of Christ on Tuesday, Wednesday and Friday afternoons from 2:00 to 5:00 o'clock.

The Red Cross has asked for 1300 garments by August 1 and it will be necessary to work at top speed. The church is located four blocks west of the railroad on Hermiston avenue.

**RURAL CARRIERS ARE STAMP AGENTS**

Thirty-two thousand rural mail carriers are now acting as agents in the sale of Defense Savings Stamps, postal officials have informed the

Treasury Department. Demand for the stamps in sparsely settled districts caused the Post Office Department to authorize the carriers to act as salesmen.

The stamps range in value from ten cents to five dollars. Purchasers are given albums in which they can be mounted. When filled, the albums may be exchanged for Defense Savings Bonds.

Post Office officials recalled that rural mail carriers acted in similar capacities in 1917 and 1918 selling War Savings Stamps.

several slightly cooler were noted. The thermometer has been gradually dropping with a maximum of 94 registered Monday and Tuesday.

The report for the week, according to Chas. Taylor, weather man, follows:

July 17	108	68
July 18	103	69
July 19	99	63
July 20	98	68
July 21	94	62
July 22	94	58

**WEATHER COOLER DURING PAST WEEK**

Some relief was felt this week from the torrid weather of last week when two days of 108 degrees and

**SAFEMAY Guaranteed PRODUCE**

**Why We Price Fruits and Vegetable By the Pound**

1. You can make a true comparison of values—a pound is the same everywhere.
2. Whether you shop early or late—you get the same value, for the price per pound is the same to all.
3. You can choose the exact weight and quantity you need and pay only for what you get (and no more). Buying vegetables for soup is a good example of this.
4. In citrus fruits, the juice content determines the value to you. Juice weighs heavy, pulp and skin weigh light. Therefore, regardless of size, the weight tells you the best value—immediately.
5. Pricing by weight means savings for you, because we can make savings which we pass along to you. For instance, tops are cut off root vegetables at the farm, saving on shipping and hauling expense; also, buying and tying costs are saved. Then, too, our buyers concentrate on getting the best available values instead of on sizes, to advertise at so much per each. You select the size you want, and pay according to weight.
