IRRIGON NEWS ITEMS
By Mrs. W. C. Isom

Mrs. O'Brian and son, George, from Washington are here for a few days looking after business affairs. They were Heppner visitors Friday.

Mr. and Mrs. W. C. Isom who have been visiting their daughter and family, Mr. and Mrs. George Kandler, at Grand Coulee and other relatives in Hood River, Oregon, arrived home Wednesday evening. They left again Sunday to visit their son, Don, at Bates, Oregon, other relatives at Monument and Bend, and on to Richmond, California, to visit their son, Earl Isom and family. Mr. and Mrs. E. L. Harper are staying at the Isom home during their absence.

Mr. and Mrs. Carl Knighten were called to Portland Friday by the death of Mrs. Knighten's sister, Mrs. Clay Woods. Mr. and Mrs. Woods lived here several years ago and her friends here will regret her passing.

Mrs. Myrtle Markham and three daughters, Mrs. Clarence Fredrickson, Mr. and Mrs. Dixie Grabeil and Emmett McCoy spent several days in the mountains near Meacham gathering huckleberries last week.

Mrs. Jay Berry from Portland is visiting her parents, Mr. and Mrs. Emmett McCoy and other relatives.

Mrs. Hinkley returned home from Portland the last of the week.

Mr. and Mrs. Tom Caldwell, Mrs. Charles Steward, Mr. and Mrs. Bedwell, Mr. and Mrs. Jack Browning and children, Mrs. H. C. Warner and daughters and Mrs. James Warner attended a fellowship meeting at Stanfield Friday.

Miss Jane Goodwin is visiting her sister, Mrs. Russell McCoy.

Mrs. Earnest Stevens left Saturday for The Dalles to visit relatives.

Mr. and Mrs. Charles Tyacke and Mr. and Mrs. Virell Tyacke are new people who are staying at the Tom Caldwell home.

Fred Markham and two children from Richland, Washington, visited relatives here last week.

Mrs. Fred Dill from Seattle is vis-

iting at the Glen Aldrich home.

Mrs. Don Kerny entertained the Pop Club members and their husbands at a weiner roast Friday night.

Mr. and Mrs. Roy Minnick and family were Pendleton visitors Tuesday.

**OREGON LAMBS
SOLD AT CHICAGO**

CHICAGO, July 24—Three large shipments of Oregon lambs were among the high sellers in the range lamb class on last Friday's market at the Chicago Stock Yards.

There were nine double deck carloads in the combined shipments which were loaded from points in Wallowa, Umatilla and Union counties.

William Hislop of the Hislop Sheep Company, Spokane, sent in a shipment from Hilgard, Oregon, that included 749 head of 86.7 pound lambs which sold at \$11.50 per cwt. The same price was paid for 701 head averaging 87.6 pounds, that were consigned by Adrian Brothers. This shipment was loaded for Chicago at Meacham, Oregon. It also included 80 head that averaged 80 pounds each that brought \$10.25 per cwt.

W. S. McClure sent in a drove from Wallowa that included 691 head of 84.6 pound lambs that sold at \$11.00 per cwt. and 189 head, averaging 79.4 pounds each, that sold at \$10.25.

**MILITARY MEN
NEED LICENSES**

Men in the military service who have been assigned to duty in Oregon may obtain "resident" fishing and

fishing licenses after they have resided within the state for a period of six months.

Under the Oregon Game Code, a non-resident is defined as a person who has not lived within the confines of the state for a period of six months immediately preceding his application for a fishing and hunting license.

Many men in the service have been under the impression that they could legally fish or hunt without a license or with a resident license before a six month's residence in the state, but the Oregon State Game Commission has no power to issue any special licenses for service men. If a man wishes to fish or hunt before he has lived in the state for six months, a non-resident license would be necessary.

For the benefit of persons who desire to fish for a limited time, a 10-day fishing license for non-residents is sold for \$3.

**UNDUE EXPANSION
FROWNED UPON BY
LAND USE GROUP**

Oregon agriculture, like that in the nation as a whole, is faced with a call to meet present food production emergencies and, at the same time, avoid mistakes which led to post-war disaster to the farming industry 20 years ago. With this in mind, the state land use planning committee, in its recent report on adjusting Oregon agriculture to meet the impacts of war on national defense, cautioned against engaging in a general expansion program at this time.

They cited certain definite exceptions to this generalization, however, as it was felt that some crops may well be increased. Expansion was particularly frowned upon where it would require increased indebtedness or larger capital investment. Provided contracts could be obtained or markets otherwise assured, Oregon producers suitably located might well consider expanding the production of certain seed crops, as well as a limited number of specialty crops such as fiber flax.

In any case, expansion needs to be strictly limited to present plant facilities and the safest expansion is from increased production per acre or per animal by the utilization of the best known practices, the committee pointed out. Livestock producers, for example, can increase their output by improving the quality of the breeding stock or by the use of more and better feeds.

Today as always **UNSURPASSED**

In the grain-producing areas of Oregon, particularly the Columbia basin, increased swine and poultry production appears to be justified, the committee held. Feeder livestock such as steers and barren cows now on the ranges could be moved in and handled on a combination pasture and feedlot basis, or feedlot alone, until they reach marketable condition. In western Oregon, livestock operators might undertake an intensive program looking toward the control of brush on lands which have been classified as suitable for grazing and agriculture.

The state committee is made up of leading farmers from different sections of the state and national agricultural agencies, with William A. Schoenfeld, dean and director of agriculture at Oregon State college, as chairman.

**AAA PROGRAM FOR
1942 IS SIMPLER,
MORE ADAPTABLE**

Elimination of total soil depleting allotments and the establishment of a uniform soil conservation requirement for each farm are the principal basic changes in the 1942 AAA program as applied to Oregon, the state AAA office has announced.

There will be no commercial vegetable allotment, but special allotments will again be established on wheat and potatoes. However, payment for compliance with these spec-

ial allotments will be conditioned by a requirement that 20 per cent of the crop land on the farm be devoted to soil conserving uses, such as perennial grasses and legumes, biennial legumes, protected summer fallow, approved green manure or cover crops, and forest trees planted on crop land since 1936.

The new provision puts soil conserving acreage requirements on a uniform basis for each farm. In the past, total soil depleting allotments have been established for each county and then set up for each farm by the county committee.

"The changes are expected to simplify administration of the program, and also place greater emphasis on conservation," commented N. C. Donaldson, state AAA executive officer. "They also make the program more flexible to meet national defense needs."

"The new program should result in an increase in soil conserving practices in the wheat areas. It will also give credit to the farmer who has already put his operations on a sound soil-conserving basis," Donaldson added.

A farm's soil building allowance will be calculated in much the same manner as last year. A flat 70 cents an acre will be allowed for each acre of crop land in excess of special allotment acreage for wheat and potatoes, \$2 an acre for commercial orchard acreage, \$1 an acre for commercial vegetables, and 50 cents for restoration land. Non-crop pasture and range allowances will be little

changed from 1941.

Soil building practices, rates of payment and deductions are expected to be about the same as 1941. They are now being printed and will be announced as soon as available.

**CROP INSURANCE
URGED BY A.A.A.**

Northwest farmers who saw their near-record crops go up in smoke or flattened by hail in the epidemic of grain fires and storms of the past several weeks have reason to be thankful for federal all-risk crop insurance, declared A. R. Coppock, chairman of the Umatilla county AAA committee.

Likewise, western Oregon farmers whose wheat crop was hard-hit by rust or infestations of Hessian fly are collecting on their crop insurance policies.

"These loss experiences throughout the state demonstrate that no farmer can afford to be without crop insurance on his wheat crop," the chairman said. "With wheat prices at the highest levels in years, the protection given by crop insurance is more important than ever."

Crop insurance on fall seeded wheat for harvest in 1942 must be taken out before August 30th. Premium rates, revised to include recent crop experience on each farm, are very low in relation to the protection afforded.

We're Selling SAFETY at Bargain Prices! Get This

SUMMER SAFETY SPECIAL NOW!

- Adjust Brakes.
- Adjust Steering Gear and Front Wheel Toe-in.
- Rearrange Tires if Necessary.
- Inspect Battery and Clean Terminals.
- Adjust and Clean Spark Plugs.

Rohrman Motor Co.

BIG 6⁹/₁₀ cubic foot SIZE, FULLY-FITTED Frigidaire

Only \$149.75
Easy Terms

Come in, see proof of More for your money!

Super-Powered Meter-Miser
Simplest refrigerating mechanism ever built. Permanently sealed, never needs oiling. Only Frigidaire has it.

Quickcube Trays
Built-in Instant Tray Release and Instant Cube Release that get out ice cubes at the touch of a finger and lift of a lever.

Notice the brilliant new beauty, and greater usefulness of the Model L-6, shown above. Yet, due to the Super-Powered Meter-Miser it actually costs less to operate. It has a Glass-Topped Hydrator for better, more convenient preservation of fruits and vegetables... a big Covered Cold-Storage Tray for meats and one full shelf extra. These features and dozens of others make this low priced Frigidaire a really sensational value—inside and out. Ask us to prove it!

Over 6,000,000 Frigidaires have been built and sold!
