LET'S GO TO THE FAIR

And now it is the County Fair. In the midst of a great effort to build a storage reservoir for munitions in national defense we pause to honor agriculture.

Men cannot use the powder in the front ranks of battle or on sea or from the air unless they are well fed from the ranks behind the lines. So in honor of a complete defense of our country let us pay our respects to the graneries of supplies from the farm.

The exhibits of all kinds will be good and the entertainment is promised as the best ever given at the grounds. The few days will furnish cause and occasion for recreation and pleasure and a pause from the steady thought and work of the big program being carried forward in our midst.

It marks the end also of a summer season and the beginning of the pleasant autumn season so common here.

It is remarkable that the fair can be held when so many of the able bodied men of the farm areas are working at the Umatilla Ordnance Depot. But the spirit of the people has kept strong for farm production and the Fair Board has worked unceasingly against odds to produce a good show and their efforts should be rewarded by a good attendance and support of a gala day at the change of seasons.

So let's be good Americans and good citizens and take a good look at the big pumpkins, real vegetables and fine cattle and other livestock and all those flowers and fancy work displayed by the thrifty women of the farm and town.

FARMERS TOLD OF LIMIT FOR '42 PLANS

Oregon wheat farmers are being contacted by county AAA associations to sign winter wheat plans for their farms prior to the deadline October 31.

Every farmer who will plant fall wheat this year must sign a plan for

his farm if he is to be eligible for participation in the 1942 farm conservation program. By signing the farm plan the farmer declares his intention to seed within his wheat acreage allotment and also indicates the number of acres on which he will have wheat in 1942.

With 1942 marketing quotas already proclaimed and almost sure to be in effect, county offices are stressing the importance of seeding within allotments. Changes in the wheat program for 1942 provide that the non-allotment option can be chosen only by farmers normally cutting wheat for hay and with an allotment in excess of 15 acres. Those with allotments of less than 15 acres are exempt from quota restrictions, however.

The state AAA office also points out that it will not be possible for non-allotment farms to keep up to their usual acres, as was the case in 1941, without incurring deductions from parity and conservation payments.
