PROPOSED ORDINANCE OF THE CITY OF HERMISTON

AN ORDINANCE granting to Pacific Power & Light Company, a corporation, and to its successors and assigns, a non-exclusive license and franchise for a period of twenty (20) years to construct, maintain and operate in and on the present and future streets, alleys, bridges, and public places of the City of Hermiston, electric light and power lines and appurtenances for the purpose of supplying electricity and electric service to the City of Hermiston, the inhabitants thereof and others, subject to the terms and conditions and to the making of the payments specified in the ordinance.

THE CITY OF HERMISTON DOES ORDAIN AS FOLLOWS:

Section 1. The city of Hermiston, hereinafter called the City, does hereby grant to Pacific Power & Light Company, a corporation, and to its successors and assigns, hereinafter called the Grantee, a license and franchise for the period of twenty (20) years from and after the effective date of this ordinance, to construct, maintain and operate in and on the present and future streets, alleys, bridges and public places of the City, electric light and power lines, with all the necessary or desirable appurtenances, for the purpose of supplying electricity and electric service to the City and the inhabitants thereof, and to persons and corporations beyond the limits of the City, subject to the terms and conditions and to the making of the payments hereinafter specified.

Section 2. The license and franchise hereby granted shall not be exclusive; and the City expressly reserves the right, at any time during the term of the license or franchise hereby granted, to grant licenses or franchises for such purpose to other persons or corporations, as well as the right in its own name as a municipality to use said streets and public places for such purposes, in the event that the City shall hereafter decide to engage in the business of supplying electricity and electric service for municipal or other uses. If, during the term hereof, the City shall decide to engage in such business, and shall elect to acquire by condemnation or otherwise the property used by the Grantee in furnishing electric service hereunder, no value or damages of any kind shall be claimed by or allowed to the Grantee on account of the unexpired term of the license or franchise hereby granted.

Section 3. The locations and methods of installation and maintenance of all poles, wires, fixtures, underground conduits, and appurtenances shall be subject at all times to reasonable regulation by the Council of the City, or by such committee of the Council or such official of the City as may be designated by the Council; and all such poles, wires, fixtures, underground conduits and appurtenances shall be so constructed and maintained as to interfere as little as practicable with street or other traffic. All of such poles, wires, fixtures, underground conduits, and appurtenances shall be installed and at all times maintained by the Grantee in safe order and condition and in accordance with good electric practice, and the Grantee, at its own cost and expense, shall promptly repair all streets, alleys, bridges and public places in any way disturbed by the Grantee, and shall restore the same to as good condition as the same were in prior to the doing of any work thereon or therein by the Grantee. The Grantee shall comply with all lawful present and future charter provisions, ordinances, rules, or regulations of the City relating to the use or improvement of the streets, alleys, bridges and public places of the City.

Section 4. The service to be furnished hereunder by the Grantee shall be continuous and shall be adequate for the requirements of the City and its inhabitants, subject to accidents, interferences or interruptions beyond the reasonable control of the Grantee, and shall be furnished under such reasonable rules and regulations as the Grantee may make from time to time for the proper conduct of its business. Such service and all rates and charges therefor, and all rules and regulations pertaining thereto or to the making of necessary and proper extensions of service, shall be subject at all times to any rules, regulations and orders lawfully prescribed by the Public Utilities Commissioner of Oregon, or by any other authority having

jurisdiction in the premises.

Section 5. When necessary, in order to permit any duly authorized person to move any building or other structure across or along any street, alley, bridge or public place within the City, the Grantee shall temporarily raise or remove its wires, fixtures and appurtenances upon such streets, alleys, bridges or public places, upon reasonable notice in advance from the Recorder of the City, and at such time and in such manner as may be necessary reasonably to accommodate such moving, consistently with the maintenance of proper service to the Grantee's customers; provided, however, that the cost to the Grantee of such temporary raising or removal, and of any interruption of the Grantee's service to its customers caused thereby, shall first be paid or satisfactorily secured to the Grantee by the owner or mover of such building or other structure.

Section 6. The City shall have the right, without payment or charge therefor, to attach its fire alarm or police signal wires to the poles of the Grantee, but at its own risk and only in accordance with good electrical practice. Such fire alarm or police signal wires shall be subject to interference by the Grantee only when and to the extent necessary for the proper construction, maintenance, operation or repair of the Grantee's poles, wires, fixtures, conduits, and appurtenances.

Section 7. The Grantee hereby agrees and covenants to indemnify and save harmless the City of Hermiston and the officers thereof against and from any and all claims, and all damages, cost and expense to which it or they may be subjected by reason of any acts or neglects of the Grantee, its agents or servants, in any manner arising out of the construction, maintenance, or operation of any property of the Grantee in or on any street, alley or highway within the City of Hermiston.

Section 8. The Grantee shall pay to the City on or before the 20th day of the month following the close of each calendar quarter during the term hereof, beginning with the calendar quarter ending December 31, 1941, a fee or charge equivalent to two per cent (2%) of the Grantee's gross receipts during the preceding calendar quarter from electric service furnished by the Grantee within the corporate limits of the City, other than such receipts from service to the United States of America or any agency thereof. The amounts so payable by the Grantee shall be in lieu of all other license, occupation, franchise or excise taxes or charges which might otherwise be levied or collected by the City in respect of the use or exercise of the license or franchise granted hereby. The Grantee shall keep proper books of account, and shall make verified quarterly reports to the Recorder, within 20 days following the close of each calendar quarter, which shall contain accurate statements in summarized form of the Grantee's gross receipts from electric service furnished by it within the City, and such other information concerning the Grantee's said business as the City through its Council or Recorder may from time to time request of the Grantee.

Section 9. This ordinance shall be in full force and effect from and after the expiration of thirty (30) days after the date of its final passage by the Council and its approval by the Mayor of the City, but shall become null and void unless within thirty (30) days after such effective date the Grantee shall file in the office of the Recorder the Grantee's unqualified written acceptance hereof and of all the terms, conditions, restrictions and obligations to be complied with or performed by it hereunder.

Section 10. If the Grantee shall fail to perform or comply with any of the obligations and requirements imposed by this ordinance, after the receipt of written notice from the City of Hermiston specifying the respect in which the Grantee is deemed to be in default hereunder, and demanding that such default be remedied within a reasonable time to be fixed in such notice, the right and franchise granted hereby may be terminated and annulled by the Council of the City of Hermiston, after reasonable opportunity for the Grantee to be heard and appropriate determination with respect to such alleged default.

The foregoing is a proposed ordinance being considered by the City Council of the City of Hermiston. Anyone interested may discuss the same with the City Council at any regular meeting up to and including the meeting of November 7, 1941.
CHARLES TAYLOR, Recorder of the City of Hermiston, Ore. (Sept. 25-Oct. 2)

TIPS ON LAMP GLOBES

for your children's study table... by the PP&L Home Lighting Advisor

WASH OFF LIGHT GLOBES REGULARLY

... for dirty globes can absorb up to 20% of the light that young eyes need.

PUT A 100-WATT BULB

... in every table lamp by which the children study or use their eyes for close-seeing tasks. If you use a smaller globe you are inviting eyestrain. Don't take chances when a 100-watt bulb sells for only 15c at any dealer's... and costs so little to operate.

DON'T BE A BULBSNATCHER!

... after you've put a 100-watt bulb in the youngster's study lamp, don't you dare "borrow" it for use in the kitchen. If you do the youngsters will probably take the 25 or 50-watt globe from the hall sockets, and then they'll be straining their eyes even though they have a good lamp. Get a carton of spare bulbs at your dealer's today.

CHILDREN SHOULDN'T SEE A LIGHT GLOBE!

... for raw, harsh light from a bare bulb is glare and does as much harm as dim light. Shade the globe with a translucent bowl such as found on I.E.S. lamps (about \$5 at any dealer's). You can buy these bowls and screw them on most old lamps.

PHONE FOR A FREE LIGHTING CHECK-UP

A trained lighting advisor will call and measure the lighting in each room with a sight meter... a scientific instrument that shows you instantly whether you're getting enough light to prevent eyestrain. She will show you how modern lighting not only protects precious sight, but adds new beauty and charm to your home. This service is free!

SIGHT IS PRICELESS — LIGHT IS CHEAP!

Pacific Power & Light Company's new low rates make cheap electricity cheaper still.
