Here's a Preview of 1942 Ford

DEARBORN, Mich.—A distinctive frontal design sets the style for the new Ford passenger car line for 1942, introduced recently at a preview for the nation's automobile editors. The new Fords will be shown to the public soon in all Ford dealers' showrooms. A rustless steel radiator grille blends gracefully with an entirely new front contour which features a new arrangement of headlights and parking lamps. Offered in three lines—the Super DeLuxe, DeLuxe and Special, the 1942 Ford has a distinctive trim for each series of cars. Engineering improvements emphasize comfort and safety. The Super DeLuxe and DeLuxe lines are offered with either the famous V-8 or the new Ford "6" engines.

FORD CARS FOR '42 STRESS SAFETY IN LOWER BODY STYLES

The Ford car for 1942, powered with either an advanced six-cylinder engine or the famous V-8, went on display today in dealers' salesrooms throughout the country.

Featuring new exterior lines and new styling within, the 1942 Ford car was disclosed to be lower, safer and easier riding than any of its more than 29,000,000 predecessors.

Either of the optional Ford engines delivers 9 horsepower. Their performance is even higher than before, and operating economy has been improved through a long series of engineering refinements.

Although production of 1942 Ford cars will be sharply curtailed as the immense program of defense work being carried out by the company gets into full swing, Ford engineers declare the new cars are unquestionably the finest in the 38 years of the company's history. While some new materials have replaced old one because of defense requirements, the change has meant added manufacturing cost rather than any let-down in service or appearancee of the parts affected.
