UMATILLA NEWS

By Mrs. Glenn Ostrom

The marriage of Marjorie Enbysk to Herbert Schuler of Los Angeles Friday afternoon in Lewiston, Idaho, came as quite a surprise to local friends. Marjorie had been making her home here at the Bill Switzer home and is the sister of Mrs. Gene McFarland.

The freshmen were initiated Wednesday and are now full fledged members of the high school. Each member was required to dress to represent certain well-known characters such as Mae West, Joe Louis and Charlie McCarthy and Baby Snooks during the day, and of course to obey all rules as set down by the upper classmen.

In the evening the freshmen, other members of the high school and their faculty met at the school and paraded down the highway, through town and to the football field, led by acting mayor Lew Brownell and by city marshal Leland Smith. They built a huge bonfire on the field and held a football rally and part of the initiation. Each freshman had been required to wear an onion necklace and after promising to act in the future as high school students instead of grade school pupils were allowed to throw their necklaces on the fire.

Mrs. William Conlon was surprised Wednesday evening when a group of friends dropped in for her birthday.

The evening was spent in playing cards after which refreshments were served.

REPORT SERIOUS EROSION PROBLEM ON WHEATLANDS

The most serious soil erosion in eastern Oregon is occurring on the Columbia basin wheat lands, where heavy soil losses have occurred from both wind and water erosion, according to the report and recommendations of the Oregon state land use planning committee. Acting upon the recommendations of this committee, plans are under way to organize definite programs to combat this erosion in the five principal counties affected.

Citing studies made by the Soil Conservation service on representative farms in the Columbia basin, the planning committee reports that on 42.5 per cent of the crop land up to 25 per cent of the surface soil has been removed. On 51.7 per cent of the crop land, between 25 and 75 per cent of the surface soil has been

washed away, or been relocated. On another 5.5 per cent of these wheat lands more than 75 per cent of the surface soil is already gone.

The summer fallow type of wheat farming universally practiced in the Columbia basin is conducive to the development of erosion, the committee points out. While this type of farming is necessary as far as present knowledge is concerned, immediate steps will be required if better than half of the crop land is to be prevented from becoming marginal or sub-marginal for wheat production.

Much progress has been made in the past few years in lessening losses from erosion by the adoption of practice such as trashy summer fallow, cross seeding of slopes, and a certain amount of strip cropping using crested wheat grass. The plan of the coming campaign will be to make more general the use of such practices already found effective.

For 1942—a Beautiful New

FORD

"6" OR "8"

IN THESE UNUSUAL TIMES we invite you to inspect an unusual new car—new in its beauty, its comfort, its choice of two fine 90 horsepower engines, 6 cylinders or 8.

See it and you sense at once that here is new style that will stay good for years. On a lower, wider chassis, we have designed new long, low, wide and modern lines.

Interior treatment is entirely fresh, distinctive, pleasing. The beauty of this Ford will more than hold its own in any company.

Inside, the car is big—wide across the seats, generous in knee-room, leg-room, elbow-room. On the road this year you find the "new Ford ride" still further advanced in its softness, quietness, steadiness and all-round comfort.

At the wheel, you will find driving easier than ever. Steering, gear-shifting, action of the big and sure hydraulic brakes have all been made smoother and easier.

In quality, the car is sound to the last detail. Defense requirements have all been met without a single reduction in the basic and lasting goodness of the Ford mechanically. Some new materials have replaced old ones, usually at a greater cost to us, but in every case the new is equal to or better than the old.

If your family needs a new car, go see and drive this Ford. For what it is today and for what it will be through the years ahead, we believe that you will find in it more and better transportation for your money than you have ever found before.
