**Vagaries of Style Never
Effect Old Silverware**

Silver is easy to buy because of the marking which is stamped on every genuine piece of silver plate, the term for solid silver. These marks or punches carry documentary evidence of its place of manufacture, its quality, the date and name of the maker. This system of marking has been in effect in England since 1300, when the Goldsmiths' guild was first established to protect the public against fraud by stamping with a steel punch all gold and silver plate.

Before a piece of silver is offered for sale by a silversmith it must be assayed by the Wardens' guild. If the quality is satisfactory it is stamped with the symbol of the town where assayed. In London this is the leopard's head. Other assay offices were established toward the end of the Fourteenth century at Edinburgh of which the mark is a thistle. The anchor stands for Birmingham and the crown for Sheffield. In addition to the mark of quality there must be the initials or private mark of the maker.

The quality, the place of manufacture being given, the next mark added is a date letter. Beginning in 1660, on May 30 of each year, a new punch was, and still is, made for the 12 months following. Every piece of silver assayed bears one letter of the alphabet which tells the date when it was made. In London a cycle of 20 letters is used, beginning with A and ending with U, the letter J being omitted. The style of the letter and the shape of the shield surrounding the letter is changed with each cycle.

**Most Vegetables Lose
Vitamins by Long Storage**

Will cooking "kill" vitamins? This is a question that can't be answered by "yes" or "no." An article in the Journal of Home Economics summarizes research conducted at several colleges.

Vitamin A, which is an absolute essential to good eyes, is lost from most vegetables by long storage. In the case of sweet potatoes, however, storage definitely increased the A content. Ordinary boiling caused no loss and increased the A content in string beans and carrots! Freezing caused no loss, but drying robbed spinach of Vitamin A.

The researches indicate that vitamin C, which prevents scurvy, is destroyed to a greater or less extent by heat, light, alkalies and some metals. Acids and sugars have a tendency to protect C. But storing foods at room temperature, or boiling, caused high losses. Refrigeration seemed to conserve a goodly portion of this essential, while pasteurization and irradiation robbed milk of 50 per cent of its C content.

Less definite information was available on vitamin B1, although there are indications that it will withstand a considerable amount of boiling, according to the best authorities.

'Kindergarten'—German Heritage

A little over a century and a half ago, there was born a man who made a mark upon the educational systems of his time that has endured, undimmed, to this day.

He was Friedrich Froebel, considered by many one of the greatest of educational reformers, who, in 1837, in the little village of Blankenburg, near Keilhau, in Germany, started an institution whose fame soon echoed and re-echoed 'round the world.

Froebel's youth had been completely neglected—he furnished his own best and most horrible example of how not to be reared.

Believing that children should be educated through play, through occupations which delighted while they developed the senses and the body and guided the affections—ideas deemed revolutionary—Froebel conducted his class in a room opening on a garden.

For the name of his type of school, he invented the term "kindergarten"—a German composite meaning literally "children's garden."

Adjustable Curbs for Roads

Disappearing curbs, or metal "fins" running longitudinally in the street, can be set to give three-fourths of the roadway for an excess load of traffic in one direction on the North Side Outer Drive in Lincoln park, Chicago.

There are three strips of these inverted U-shaped barriers, which are 8 inches high when hydraulically raised and level with the street when lowered. When the traffic rush is toward the business district of the city, the separations can be adjusted to provide three two-car-abreast lanes one way and one lane in the opposite direction. Three double lanes can similarly be established for the outbound evening traffic.

Vitamin Halts Hemorrhages

Great progress in the treatment of spontaneous hemorrhages and hemorrhagic states by the use of vitamin K has been reported by a group of Baltimore physicians.

Vitamin K is necessary for blood clotting and can be introduced into the blood stream when it is not absorbed.

At the same time, the physicians reported that the existence of vitamin deficiency states has been found to be the cause of many nervous syndromes. Many cases of neuritis, a study indicates, are due to deficiency of vitamin B.

**COLLEGE SPEAKER
TO BE PRESENT AT
FARM MEETINGS**

There will be a very important meeting for all farmers at 10:00 a. m. on Tuesday, January 27, at the Columbia park hall on small seeds, forage, and hay crops. There will be a similar meeting at the Stanfield Grange hall on the same day at 1:30 p. m.

At this meeting, Lawrence Jenkins, assistant farm crops specialist, Oregon State college, will discuss outlook for the small seed industry, prospective new seed crops, and new information on pasture and hay crops. Kenneth Gray, department of entomology, Oregon State college, will also be present to discuss insect control on the small seed crops and any other crops.

Mr. Jenkins will discuss farmers machinery priorities as related to the small seed and hay crops according to the latest information that is available on that subject.

**CO-OP LAUNDRY &
CANNERY ELECTS**

At the annual meeting of the Co-operative Laundry and Cannery Saturday, three of the present directors were re-elected, Mrs. H. M. Sommerer, Mrs. H. J. Harding and Mrs. Otis Buell. Holdover directors are Mrs. W. A. Mikesell, chairman, Mrs. A. W. Turnblad and Mrs. A. E. Bensch.

The business report for the year showed some decreases. Both the cannery and laundry are operated at a minimum cost to patrons and have been operated as a service to the community for many years.

**TOWNSEND CLUB
NEWS**

By Mrs. Joe Udey

In last week's issue of the Herald an article, written by Mr. Williams, stating that Townsends were sponsoring a tax on cigarette, slot machines and pin ball machines to raise funds to pay old age assistance. Someone may be misinformed, thinking that the clubs are back of a state issue. We want everyone to understand that Townsends individually did work for the cigarette tax, and may vote for most anything that will give

them a little more for decency and health, but neither of these are sponsored by the Townsend clubs.

There will be many candidates running for the state legislature that will sponsor some bill for the benefit of the old age assistance. Our members probably will vote to help put men in office who they think will do something to help; but so far we, the Townsend clubs, are not sponsoring any bill in the state.

**PUBLIC MEETING
SET FOR FRIDAY**

(Continued from Page One)

last city election is qualified.

Election will be held at the public library between the hours of 8:00 a. m. and 8:00 p. m. Judges will be Mrs. George Harkenrider, Mrs. B. J. Nation and Mrs. Paul Bracher, and clerks, Mrs. Roy Hale and Mrs. Gerald White.

Hermiston taxpayers have shown considerable interest in the forthcoming election and discussions can be heard at every corner. Below appear some of the questions which are be-

ing asked, which are answered by W. J. Warner, city attorney, through a courtesy to the Herald.

Question: How are the sewer and water bonds to be paid? That has not been definitely determined, probably in 25 years, one-twentieth each year beginning after 5 years, or payments may begin after two years.

Question: How much will the connection charges be? Nothing except that each person will have to pay for his own connection to the sewer. This is estimated to cost about \$1.00 per foot.

Question: Will there be monthly rates and how much will they be? Yes, probably \$1.00 per month for ordinary dwellings and more for business places making more use of the sewer.

Question: Will everyone be compelled to connect with the sewer? Probably not, at least for some time, but the City Council and the State Board of Health would have authority to compel use of sewer.

Question: Is there any possibility that a lien or mortgage be placed on city property if the revenue is not sufficient to cover the cost? No.

**GIRL SCOUTS PASS
TESTS THURSDAY**

At the Intermediate Girl Scout meeting held Thursday, January 15, at the U. S. O. building, the following Tenderfoot Scouts completed passing their tests and have now earned their second class ratings: Ann Piersol, Lucy Holloman, Lelelall Reeder, Delores Carr, Arla Mae Jorge, Rosemary Doyle, Nancy Jo Wines and Marjorie Hughes. Patricia Delany, also a member of the troop, passed her tests at Tillamook before she came to Hermiston.

To attain second class rank the girls must complete satisfactorily ten activities, one chosen from each of the ten program fields: Arts and Crafts, Community Life, Health and Safety, Homemaking, International Friendship, Literature and Dramatics, Music and Dancing, Nature, the Out-of-Doors, and Sports and Games.

During the coming weeks the girls, under the direction of their leader Miss Thomas, will each choose the particular fields in which they wish to concentrate. They will then proceed to earn badges for accomplishments in these major fields and several other related program fields and work for first class rankings.

**PIERCE ADVANCED
IN ARMY RANK**

Corporal Gene Pierce, former head teller and general bookkeeper for the Pendleton Branch, First National Bank, was advanced to his present grade in the army after less than six months' service at Camp Roberts, Calif., the nation's largest replacement training center.

Corp. Pierce has been company clerk of the Intelligence Company of the 87th Headquarters Battalion, Infantry Center, since the completion of the 13-weeks basic training course in September. He was retained as a company cademan on the administrative staff at the end of the training period.

Corp. Pierce, who is a son of Mr. and Mrs. O. C. Pierce of Hermiston, was inducted from Pendleton last June 14. After going to the reception center at Fort Lewis, he was assigned to Camp Roberts.

Project Farm Executives To Meet

A meeting of executives of the Project Farm Bureau will be held Friday night at 8:00 o'clock in the county agent's office. President A. H. Cable will be in charge of the meeting. It is urged that all those concerned be present for the meeting.
