Mr. and Mrs. Walter L. Blessing returned to Portland Sunday after bringing Mrs. August F. Linder here with them Saturday. Mrs. Linder is Mrs. Blessing's mother and has been ill for some time in Portland. The Blessings formerly resided in Hermiston.

Mr. and Mrs. Ray Oviatt and grandson, Gerry Oviatt of Pendleton, are spending this week in Portland. While there they will see the departure of their two sons for war service. Marian has joined the navy and Kenneth will be employed with the U. S. government at Kodiak, Alaska. The Oviatts will also visit with his parents at Sheridan while in the valley. Mr. Oviatt is on vacation from his duties at the Hermiston Food store.

PILGRIM HOLINESS CHURCH

O. A. Wells, Pastor

It is hard these days for people to attend church services, but if we make a special effort, how much better off our spiritual man will be. Make an extra effort this Sunday and take in all the services at the Pilgrim Church where everyone is welcome.

CENTRAL CHURCH OF CHRIST

C. Warner, Pastor

Our revival meeting continues until at least Easter Sunday. The interest grows with each service. The evangelist spends a few minutes each evening this week discussing some of the many prophecies that are being fulfilled today that point to the second coming of Christ. Jesus said, "No man knoweth the day nor the hour when the Son of Man cometh but when you see these signs you will know that the day is drawing near."

The evangelist's sermon for Sunday morning will be "When Jesus Touches Life", and Sunday evening, "A message that thrills the heart of any old-fashioned, genuine Bible Christian."

Monday evening will be Old Fashioned Night. The women will wear house dress or apron and the men overalls or work clothes. The Monday evening sermon will be "Three Great Facts, Proving that America is facing Disaster from within and Inevitable Destruction—but it can be averted."

HERMISTON BAPTIST CHURCH

Grayden D. Love, Pastor

Sunday, March 29, is Palm Sunday. Our morning message will center around the story of Christ's en-

Harry Ford has rented the Dent place and will farm it with the one he is now on.

Mr. and Mrs. Truman Messenger and family of Meacham were visiting friends and relatives here Sunday.

DR. BELTON TO VACCINATE FOR SLEEPING SICKNESS

Dr. W. H. Lytle, state veterinarian, has stated in correspondence with the assistant county agent that farmers in the west end of Umatilla county would probably do well to have their horses vaccinated for immunity to sleeping sickness. Due to the erratic history of this disease, it is impossible to tell whether there will be any of this trouble in this territory prior to the time that it is apt to appear. The year 1940 was a bad year in this district, causing the death of many horses from the malady. The year 1941 was not as bad, but there were some cases of the disease present last year.

In view of the increasing value and importance of horses on farms, it was thought by Dr. Lytle to be advisable to have all the horses vaccinated.

Every farmer in west Umatilla county is being contacted by mail relative to his desire in regard to vaccinating.

Dr. M. J. Belton, assistant state veterinarian, La Grande, has again been assigned the job of doing this vaccinating by Dr. Lytle. Dr. Belton plans to be here Thursday, Friday and Saturday, March 26, 27 and 28, to get started with the job. The cost will be one dollar for the two shots necessary for immunization.

NO LIMIT ON TIN FOR HOME CANNING; INCREASE DESIRED

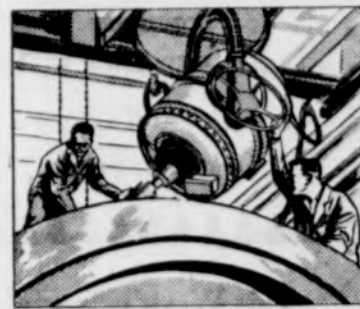

Plenty of tin cans will be available for home canners this year, Robert B. Taylor, chairman of the Oregon USDA war board, has been informed by the war production board.

Tin cans for home canning are not included in the recent order restricting tin for commercial packing of many commodities, Taylor reported. Home canners can obtain all of the cans they need from their usual suppliers, and will not be required to present any kind of a priority certificate. Hardware stores and other distributors will be able to buy home-canning type cans from their manufacturers without restriction.

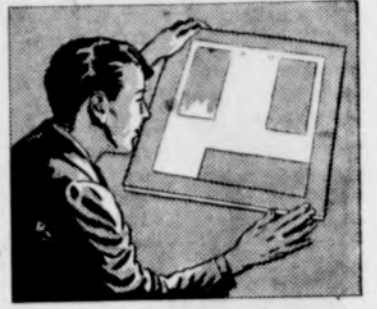

Home canning is being encouraged this year as a means of lifting some of the load from commercial can-

Steel-Piercing Eye

Steel used in vital parts for war machines—planes, tanks, ships, guns—must be flawless, because America's fighting men must have weapons that are both accurate and tough.

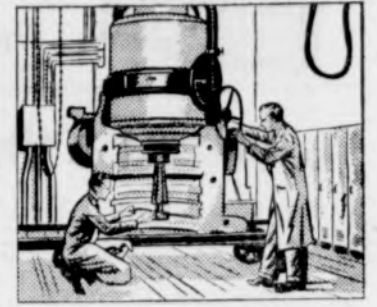

1. The new million volt X-ray built by General Electric saves precious hours in finding flaws. It is so powerful that its rays can pierce thick steel castings.

2. Defects in the steel show up on X-ray film. Therefore faulty materials are tossed aside before costly hours of machining have been spent on them.

3. A regular check-up on pieces of X-ray film worn on workers' wrists helps guard against prolonged exposure to the rays given off by the X-ray tube.

4. X-ray exposure needed for 5-inch-thick steel is now 2 minutes instead of previous 3 1/2 hours! Whole days are saved in examination of even thicker castings.

General Electric believes that its first duty as a good citizen is to be a good soldier.

ners, who have been asked for capacity packs of many fruits and vegetables. Oregon pea and tomato canners have been asked for a 25 per cent increase over last year's pack. Taylor said, and bean and sweet corn canners are asked to operate at capacity.

"A 100 per cent increase in home canning over 1941 will release a lot more of the commercial pack for other needs, including food for this country's armed forces and for those of other united nations," the war board chairman observed.

The war production board's recent tin conservation order, designed to stretch one year's tin supplies over three years' needs increases the quota of tin for canning basic foods such as peas, tomatoes, green beans, corn, asparagus, tomato juice and evaporated milk, Taylor pointed out. The order prohibits the use of tin for packing such items as dog food, coffee, tobacco, caviar, beer and motor oil.

Tin for packing many fruits and vegetables which can be preserved by drying is restricted to 75 per cent of the 1940 requirements. In this group are apples, prunes, apricots and freestone peaches. More home drying is expected this year as well.
