

OFFICIAL U. S. TREASURY WAR BOND QUOTAS FOR JULY

The above map of Oregon shows the War Bond quotas, by counties, for the month of July, 1942. Total War Bond quota for the state is \$8,865,000. With the National quota total placed at a billion dollars, the nation goes into high gear in its support of the War financing and to give our fighting forces adequate implements of war which will bring ultimate Victory.

or immature deer in a certain portion of Grant and adjoining counties: 2,000 tags at \$5 each for the taking of antlerless elk in specified portion of Umatilla, Union, Baker, Malheur, Grant, Harney, Morrow, Wheeler and Gilliam counties; and 1,500 tags at \$3.50 each for the taking of antelope in certain portion of Lake, Malheur and Harney counties.

At the rate that applications are being received by the game department office, it is apparent that a drawing undoubtedly will be necessary to determine to whom the doe deer tags shall be issued and also perhaps for the antlerless elk.

Anyone wishing to take part in the drawing should have his application in by August 1. Each application must be accompanied by the proper fee together with the information as to the number and kind of 1942 hunting license held by the applicant.

FARMERS URGED TO PAY DEBTS

"Members of National Farm Loan Associations in Umatilla county are taking President Roosevelt's advice to pay their debts and thus "provide a form of insurance against post-war depression," R. H. Loveless, secretary-treasurer of these associations, declared recently.

"Since last fall," Mr. Loveless reported, "our members in Umatilla county have set up future payment funds totaling more than \$30,000.00 with the Federal Land Bank of Spokane. These future payment funds are designed to protect land bank and land bank commissioner borrowers against possible "lean" years in the future when they may not be able to make their regular loan payments. The funds earn interest at exactly the same rate the borrower pays on his loan, so he saves as much interest as if he paid it on his loan right now, and he gets the future protection besides.

"This is concrete demonstration of

the fact that farmers haven't forgotten the lessons of the last war, or of the more recent years when crops and prices were both low.

"As a matter of fact," Loveless said, "money going into the future payment fund is doing double duty. All over the country farmers are remembering these old lessons, and the land bank is taking in more money than it is loaning out. The result is that in the past year the bank has bought more than five million dollars of government bonds. And that's carrying out the President's idea, too, because he said recently in a letter to the Secretary of Agriculture, "Repayments to creditors will enable them to buy more bonds, thereby contributing materially to the war effort. I cannot emphasize too strongly the need for a continuation of the constructive policy of the Farm Credit Administration and its cooperating borrowers."

LESS HAY MORE FEED GRAIN FOR OREGON IN 1942

Less hay but somewhat more feed grain will be produced in Oregon in 1942 than in 1941, according to crop prospects information summarized in a report on the agricultural situation just released by the O.S.C. extension service. The hay and feed grain production outlook in the three Pacific northwest states combined is similar to that of Oregon, but in the country as a whole a larger hay crop is expected than last year. Feed grain production may be slightly larger if the corn crop holds up in condition as good as early in July.

With reserve stocks of hay nearly cleaned up in Oregon, a smaller crop of hay than last year and more animals on hand, hay prices have advanced materially in some localities

compared with a year ago. Reserve stocks of feed grains have been reduced, also, but there is an abundance of wheat, some of which will be used for feed. The supply of high protein feeds in the country as a whole is expected to be larger than last year.

In some localities in Oregon the hay and feed situation is more favorable than the average, but seasonal conditions and the farm labor shortage have made it difficult for hay producers to put up as much hay as last year.

During June this year the United States index of farm wage rates advanced from 183 per cent of the 1910-1914 level to 202, the highest in 22 years. The advance brought the index up to a level 26 per cent over July 1941 in the whole country, but in Oregon farm wage rates are nearly 50 per cent higher than a year ago.

The demand for farm labor is the highest since 1920 and the supply of farm labor is the smallest on record. Washington is the only other state in which farm wage rates have advanced as much as in Oregon.

Ordinarily, July is the month of greatest farm labor demands in Oregon, but there is much farm work yet to be done in August, September and later.

DRAWING FOR ELK TAG SET

A public drawing will be held by the Oregon State Game commission at its offices in 616 Oregon Building, Portland, at 1:30 p. m. Wednesday, August 5, if the number of applications for the special tags permitting the taking of doe deer, cow elk or antelope exceeds by August 1 the specified quota of tags to be issued.

The commission has authorized the issuance of 3,000 tags at \$3.50 each for the taking of female, spike male
