FARMERS URGED TO COOPERATE

(Continued from page 1)

upon approval by the county farm machinery rationing committee. The machinery in a second category (Group B), including items somewhat less scarce, may be sold upon certification by the farmer to the dealer that it is required to meet current agricultural needs. A third classification (Group C), includes the smaller items that may be sold without restrictions.

Group A includes beet lifters, beet loaders, combine, corn pickers, disc harrows, feed grinders, fertilizer spreaders, grain drills, grain elevators, hay balers, lime spreaders, manure spreaders, milk coolers, milking machines, pickup balers, potato diggers, shredders and tractors (including garden tractors).

Group B machinery, which can be purchased upon certification to a dealer that it is needed for current production, includes most other farm equipment and machinery.

Group C, which is exempt from any form of rationing control, includes hoes, rakes, forks, scythes, shovels and all hand-operated and one and two-horse drawn farm machinery and equipment not included in Group A. There are no restrictions on sale

or transfer of used farm machinery, equipment or repair parts.

Eligibility requirements for Group A purchases include inadequacy of present equipment and inability to meet farm production goals by repairing, or by purchasing or renting used machinery, or by custom or exchange work. A purchaser must turn in replaced equipment and agree to rent or let others use the new machinery on specified terms and conditions. The purchaser must present a satisfactory reason if changing from horses or mule power to motor power, or from hand labor to machinery.

Applicants who are refused certification for machinery may appeal to the State USDA War Board and then to the Special War Board Assistant to the Secretary of Agriculture.

One War Week

A calendar of events on one war job in one recent week gives a graphic picture of how General Electric is working to meet wartime emergencies.

1. THURSDAY: An order was received at an eastern G-E factory for equipment needed by a U. S. warship near Australia. A special call went out.

2. THURSDAY NIGHT: As many workers as could be efficiently employed on the job worked all night, all day FRIDAY, assembling the equipment.

3. SATURDAY: Under police escort, the equipment was rushed to a nearby airport. Traveling by plane, it arrived in San Francisco on SUNDAY.

4. WEDNESDAY: A bombing plane landed the equipment at its Pacific destination—10,000 miles from the factory—six days after receipt of order.

General Electric believes that its first duty as a good citizen is to be a good soldier.

ROADS AND RUBBER

BUSES MAKE THEM Work without Waste FOR VICTORY

Two of America's greatest war essentials are roads and rubber, and buses make both work without waste for Victory. For buses use up only a fraction as much rubber per mile as private cars. For better trips follow these tips:

1. Plan trips well in advance; go during mid-week.
2. Select the least crowded schedules.
3. Get tickets early. Take only one traveling bag.
