*The Competitive Town*

Wires from Washington, D. C. state that a new town is to be built just south of the Ordnance Depot. It will be in the sagebrush desert where all conveniences of modern life must be provided.

For several months it was understood that this housing was to be distributed among the towns of Echo, Stanfield, Hermiston, Umatilla, Irrigon and Boardman. At all these places are domestic and irrigation water, electricity, shade, schools, churches, entertainment conveniences, marketing places and other provisions for the American ways of life. Surrounding them are farms where vegetables, dairy products, milk, beef, pork, mutton, eggs, chickens and turkeys are supplied, within easy reach of workers.

These towns and country districts have given loyal support to the defense work and have gone all out in their efforts to make life more comfortable for the many strangers within their gates for the last two years. Many more houses would have been built by local citizens and new residents if a definite program had been

provided and assurances of investment not been threatened. A year ago we were told not to build more, as the igloos would be completed by snow fly. Again in the Spring of this year when construction began with new work, housing was assured by the government in each town. Investors hesitated. Now, a new competitive town is proposed at the axis of the semi circle within ten minutes to half hour drive from all these towns and farms. Our investments are to be depleted and property values reduced by non tax paying properties, which will cost Uncle Sam around two millions.

The glass top desks do not take these facts into consideration. To date only surveys are made, but contracts are said in the making, and the absurd proposition may go on to completion and more.

It is still time to acquaint the higher authorities with the waste that is proposed and the injustice that is being done to the local region.

At Hermiston alone are over 700 housing units owned by citizens, and in all the towns and adjacent communities are 2500 houses, which does not include trailers, tent frames and shacks. Immediately others would be built if the housing units proposed were distributed. A thorough investigation should be made at once of the entire situation. There is much more to be said.

**FOR 4¢ I SEW UP A SQUAD TENT FOR THE ARMY!**

...I'm the lowest-paid worker in town!

*Raddy Kelovant*  
YOUR ELECTRIC SERVANT

When the Yakima Tent & Awning Company turns out those pyramid tents that house eight of Uncle Sam's soldiers, the big job is sewing the canvas together. Fortunately, this work is done quickly and thoroughly with electricity that costs only 4¢ per tent... so low are PP&L rates.

The same kind of story is true in many phases of the Pacific Northwest's war effort.

For only a few pennies PP&L electric power performs vitally important jobs on 12,500 farms, in army camps and airfields, in shipyards, and in scores of war factories.

In other words, the same low-cost electricity that makes life comfortable in your home is now helping to make life tough for Hitler and Hirohito.
