Welcome to the New Commander

Cordial greetings are extended to Colonel A. S. Buyers on his assumption of Commander of the Umatilla Ordnance Depot. He is to be congratulated on being placed in charge of so important a place in the war defense of our Pacific Northwest and its relation to the Pacific warfare, and should be given the fullest cooperation of all local people and civic organizations. During the past two years all the towns and farming communities have been loyal supporters of the work of building the Ordnance Depot, and have contributed to the care and housing of the thousands of workers who have come and gone, and who are still here.

During the regime of Captain R. C. Williams, Major Harry R. Schuppner, and of Colonel Ralph Cook Scott, who have all done exceedingly well under wartime emergencies, we have met citizenship requirements to the best of our abilities and economic resources. We have only high praise for each commander and those who assisted him, laborers and contractors, in the building of one of the great arsenals of democracy of the nation.

We now extend the same cooperative hand to Col. Buyers, and through our experiences hope to give stronger aid as local communities in the effort of winning this war as soon as possible.

Several weeks ago Winston Churchill stated that what had been done was the end of the beginning. Now, after the historic conference at Casablanca, the organization of French forces, unification of the four great allies, and the successes of our forces on all fronts, we may say this is the beginning of the end. But, while we may feel that the end is in sight, we cannot slacken our efforts until the forces of the Axis are completely broken, and unconditional surrender is accepted.

CHRISTIAN SCIENCE CHURCHES

"TRUTH" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, January 24.

The Golden Text was, "Teach me thy way O Lord; I will walk in thy truth; unite my heart to fear thy name" (Ps. 86:11).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Because I will publish the name of the Lord; ascribe ye greatness unto our God. He is the Rock, his work is perfect; for all his ways are judgment; a God of truth and without iniquity, just and right is he" (Deut. 32:3,4).

The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Spirit, Life, Truth, Love, combine as one, - and are the Scriptural names for God . . . Truth, spiritually discerned, is scientifically understood. It casts out error and heals the sick" (p.275).

MILK BOTTLE LOSS TOO HIGH!

Housewives are urged by the local dairyman to use only warm or cold water to rinse out milk bottles after they have been emptied.

Losses from cracked bottles are running high at both dairies. The principal causes of these cracks has been determined to be the use of hot water in rinsing bottles, too recently removed from a refrigerator. The cracks are generally very small and unnoticeable but when the bottles have been washed and refilled at the dairies they break when the force of the capping machine is applied.

The dairies point out that the trade is short of bottles and new ones are now sometimes hard to get when needed. It is not necessary to use hot water in washing the bottles because they all must be thoroughly washed and disinfected with steam before they are refilled by the dairies.

NOTICE—Milk bottles are thoroughly washed and disinfected by your dairy. Please do not use hot water to rinse empty bottles.
