**More greasing — less gassing!**

You may never have realized that regular greasing, plus transmission and differential lubrication, can improve your gas mileage as well as protect your car. Much of the gasoline you use is only to overcome friction inside your car. Proper and frequent lubrication can keep that friction down to a minimum. Manufacturers' specifications for most cars call for greasing at each 1000-mile period. And you know we are experts at lubrication.
