SOMETIMES - ON SOME CALLS - THE LONG DISTANCE OPERATOR WILL SAY -

"Please limit your call to 5 minutes. Others are waiting"

MANY Long Distance calls go through about as fast as ever.
 But sometimes there's an extra-heavy rush on certain circuits—especially in war-busy places.
 Whenever that happens, the operator will ask you to limit your Long Distance calls to 5 minutes.
 The idea is to give everybody a fair share of the wires. That gets to be more and more important every day.

PLANNING ISN'T NEW

THE way a lot of people are talking these days, you'd think planning is something new.
 But anybody who's ever run a farm or a factory knows that if you don't plan, you can't get the most out of what you have to work with.
 To plan properly, the farmer has to know about crops, soils, seasons, tools, and stock; and the man operating a factory has to know about machines, markets, science, and engineering.
 Yet for all this specialized knowledge which each of these activities requires, the managers of both farm and factory have much in common in their planning. They have the same problems—to mention a few—of employment and taxes, of costs and a fair profit, of setting aside reserves for a "rainy day."
 And they have the same objective in their planning—to do everything they can for their country today, and, tomorrow, to make a fair living through greater service to their fellow Americans. General Electric Company, Schenectady, N. Y.
