Having Trouble Getting Help?

So are we. Like you, we're faced with the biggest production job in our history. And, like you, we've lost many of the men who used to help us.

Yet that's only part of the story. Every day, on farm and factory, there's something new to test the skill of those running the business. Not only getting help, but—to mention a few others—rising costs, making a fair profit, and setting aside reserves for a rainy day. Essentially, those problems are the same for farm and factory, though they may at times differ in size.

But it is that thing called "management," that peculiarly American ability to think through problems no matter how tough, that is helping to see us through today.

It is this skill in management that farmers and businessmen have most in common, a skill which insures the realization of our determination to produce all that's needed for our country today, and, tomorrow, to make a fair living through greater service to our fellow Americans.
