THE SINEWS OF WAR

We are winning the war because our boys are doing superior fighting, and because we are furnishing them with the sinews of warfare. They are heroically and with full love for their country exposing their lives to the weapons of the enemy. Unless we give them the best we have, more of our own boys will be lost or wounded by longer period of fighting.

The boys are being well trained and have already demonstrated their superiority in every phase of battle. This is not all due to training and equipment, but to the judgment and ability to act quickly in crucial tests. While they are highly trained there come times with every man when he must throw aside training and use his head in the emergency. It is this mental quality of our soldiers that is aiding greatly in the victories we are winning. We are proud of them as soldiers and proud of their abilities, heroism and patriotism. They are there to do the job, and the best we can do is none too good in support of their dangerous work for the country.

The war is going well on all fronts and we must keep it going well. Even though our forces are proving victorious, we must not relax for a day or hour in our endeavors to furnish best supplies to maintain their efforts to gain unconditional surrender. Next week will furnish an opportunity to buy bonds, and these are our SINEWS of war. We cannot furnish the many fronts without money and this is one of the large ways to supply that necessary cash that it takes in large amount to keep the boys fighting strong.

Get your fires inspected early

Like to be able to forget about tire inspections until next year? You can do it—and avoid the usual last-minute rush too, by getting the job done right now. If you have an "A" book just stop this week and see any of us Standard folks who are tire inspectors. Then you'll be finished with inspections till March, 1944. It's a smart way to steer clear of that stampede of folks who put off tire inspections till just before September 30.

How to cure the creeps

Motor oils that creep away from hot spots leave your engine exposed to extra wear. That's why we give RPM Motor Oil a special ingredient that makes it stick like a Siamese twin to hot or cold metal. Even when your car is idle it stays put, gives you instant lubrication when you start.

Down in front

Don't let your front wheel bearings down. Every 5,000 miles they need a careful cleaning and greasing that we Standard folks are specially trained to do. For safe driving, let us check them next time you come in for one of our never-miss lubrication jobs.
