### CAN VITAMINS CHANGE GRAY HAIR?

Read the 'amazing' experience of gray-haired people in Calcium Pantothenate tests sponsored by a leading housekeeping magazine.

According to this report:  
Age—did not seem to affect results. The earliest response occurred in a 50 year old; the latest in a 23 year old.  
Color—began to appear near the roots of the hair. The color may not appear all over the head at the same time. Symmetrical areas, perhaps on the temples or the back of the head, may show traces of color first, after which the color will spread to other parts of the head.  
Time—varied from 1 month to 6 months.  
Results—85% of those tested had positive evidence of a return of some hair color.  
Now thousands use GRAYVITA, which contains 10 mgms. of Calcium Pantothenate (the same amount used in tests above) PLUS 450 U.S.P. units of B<sub>1</sub>, the vitamin necessary to healthy nerves. Try GRAYVITA. See what a difference it may make in the way you look. 30 day supply, \$1.50, 100 day supply, \$4.00. Please, write

## Thank You . . . . .

I wish to take this means of thanking the people of this vicinity for the cooperation shown in recent weeks in making donations towards the purchase of six soldier chests for our boys in the armed forces. It again proves that this community is backing the efforts of the men at the fronts. Efforts of this type will help greatly in making the hardships of our boys a little more bearable.

As director of the Victory Service League, I want to thank the Rotary club for sponsoring the drive—also all who so generously donated to the cause.

Another great job now lies ahead of us—the Third War Loan Drive. We must—and will—buy more bonds to enable our government furnish war supplies to the fighting front. Let's all be boosters!
