NOTICE

To Water Users of the Hermiston Irrigation District

The water will be cut off from the main canals of the Hermiston Irrigation District on October 3, so that the canals may be dried up preparatory to annual cleaning and repairs.

All head gates should be closed so that the drain water can be carried away to spillways. The water table in much of the area is high and needs draining out, and the drain ditches need to be dried up as much as possible to prepare and conserve the area soils during the winter months for next season's operation.

This notice is given so that farmers may prepare to care for watering of stock from other sources than the canal system.
