REPORT CARDS ARE DIFFERENT

This year instead of the usual type report cards a new style has been put into use. Each student will receive a white slip from every class he takes. Included on it will be his name, period, subject, grade, number of times absent, work made up, reasons for unsatisfactory work and the name of the teacher of that particular class. A duplicate copy will be filed in the office so the students need not bring their slips back to school.

but

HE LEAVES THE READING LAMP BURNING AT HOME!

Electricity for every use has long been so cheap and abundant here, it's natural not to pay much attention to a lighted lamp or so. But, right now needless light is a "peacetime" luxury.

While there isn't any shortage of electric power... and it isn't being rationed... there is a nationwide shortage of materials that go into all kinds of electrical supplies and equipment. And, every hour you burn a lamp bulb, for example, uses up an hour of its life.

So the Government says: "Conserve"

The government can't allow you, or us, to use vital materials for non-essential jobs. We must get along with what we have already. And the way to do it is to conserve all along the line. It's our job, and yours, to look ahead and use everything we have wisely.

In the end, it's going to mean fewer burned out lamp bulbs, fewer replacements; your electric range, your refrigerator, and other appliances will last years longer. You'll be assuring yourself of continued good service and economy till the time comes when you'll be able to get the marvelous new electrical servants that will be yours after the war.

USE WHAT YOU NEED...

BUT NEED WHAT YOU USE!

The WPB asks everyone to help save by avoiding waste. But don't endanger your eyes, your safety or health. Follow the rule of "Use what you need... but be sure you need what you use."
