

**CITIZENS URGED TO SAVE LIGHTS**

R. L. Woolley, manager of the Umatilla Electric Cooperative association, this week received information from the office of war utilities

on the subject of "Voluntary Conservation Program for Electric Utilities." The report has been issued to attempt a uniform program of voluntary conservation of electricity. Rules which have been clarified include the following: No daytime indoor and outdoor advertising, promo-

tional and display sign lighting. Night burning hours should be reduced as much as possible but in no case burn lights after 10 p. m. Electric signs necessary for direction or identification of places of public service may be burned but only while establishment is open for business. Show window lighting which does not provide essential interior illumination should not be burned during daytime and only until 10 p. m. at night. All wattage should be reduced by maximum practicable amount.

**CHRISTIAN SCIENCE CHURCHES**

"GOD the Preserver of Man" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, December 12. The Golden Text was, "The Lord is faithful, who shall establish you, and keep you from evil" (II Thes. 3:3).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "And the Lord went before them by day in a pillar of a cloud, to lead them the way; and by night in a pillar of fire, to give them light: to go by day and night" (Exodus 13:21).

The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Human codes, scholastic theology, material medicine and hygiene, fetter faith and spiritual understanding. Divine Science rends asunder these fetters, and man's birthright of sole allegiance to his Maker asserts itself" (p. 226).

**THE TRUTH ABOUT TIRES**  
IS THAT  
**ONLY AN INSIDE INSPECTION**

Can tell about Fabric Breaks which do not show from the outside until too late. It's like this:

Tires less than a year old are usually sound, but **OLDER TIRES** (which are most of them) **GENERALLY SHOW FABRIC DAMAGE SPOTS**, often started by a puncture, severe bruise or rock cut which occurred so long ago the owner has probably forgotten all about it.

**AN INSIDE INSPECTION AND THEN VULCANIZED REPAIR OF ALL WEAK SPOTS WILL GIVE YOU MUCH EXTRA MILEAGE**
