the present system, stamps have point values of 8, 2 and 1 points. Thus, the average value of each stamp is four points. Under the new system, each stamp will have a value of 10 points. It will speed up the checking of points on merchandise and remove considerable congestion for the merchant during busy hours.

It will mean a saving of thousands of hours for all persons handling ration currency. Tokens are made in two colors - red and blue to correspond with the red and blue stamps in War Ration Book Four so that there will be no confusion in the tokens given for change.
