NELSON PRAISES ARMY ORDNANCE TRUCKS IN USE

Army Ordnance trucks are destined to play a significant and far-reaching role in the rehabilitation of our post-war world. This is the opinion of Donald M. Nelson, chairman of the War Production Board, who got a close-up of them at work in foreign fields during his recent inspection

tour of England, North Africa, Russia and the Near East.

Nelson informed Col. Hoffman, commanding Umatilla Ordnance Depot, that the sturdy Ordnance truck, because of its great flexibility, has made a definite contribution to Allied victories in North Africa, Sicily and Italy, and that when the entire story of the war is told, the Ordnance truck will occupy a conspicuous place on the stage with other mechanical heroes.

Arriving in England, Nelson visited several cities where Army Ordnance trucks were being assembled by Ordnance troops as fast as they were unloaded from ships.

"It was a revelation to see the speedy manner in which these trucks were assembled by skilled Ordnance mechanics—boys from all states in the Union," he said. "In at least a dozen cities, the assembly of trucks was being carried out efficiently and in a manner characteristically American."

In North Africa, the WPB chief had tea with a famous British general who, during the invasion of Sicily, was a member of Gen. Montgomery's staff. This general was enthusiastic concerning Ordnance trucks and especially the performance of the 2 1/2-ton six-wheel truck which proved so successful during the invasion and subsequent engagements.

"The troops landed and, after the bulldozers completed their job, the Ordnance trucks rolled right ahead delivering supplies to the advancing infantry and artillery," the general said.

Visiting that part of the Russian front evacuated recently by the Germans, Nelson said he failed to observe any real roads, yet lend-lease Army Ordnance trucks managed to negotiate the difficult terrain, roaring along in a giant supply line connecting the home front and the fighting lines.

"Army Ordnance Department trucks are making their own roads, and doing a good job of it, too," he declared.

"Briefly," Nelson concluded, "Ordnance trucks have been lifesavers to our allies. They have been especially valuable because this is a war of movement. The tempo is vastly different from the first World War. And when the chapter on transportation in World War II is written, I believe that the Ordnance truck will receive all the

or manpower, or in general, improve the efficiency of the work done, is wanted. Awards of five dollars and up are being paid to the authors of such suggestions. Take for example, the fellow who suggested that there be waste containers around for helping the grounds clean, and the man who suggested that there be doors on the roof of the coal bins, and the lady who suggested the lights at the south end of the parking lot. All these and

many others are perhaps ordinary ideas, but the suggestion committee thought they were of great enough value to be eligible for cash awards, and so, they all received checks. Why don't you get in on some of this free money! In addition to being paid for ideas, you will feel that you are helping your country by selling your ideas to your government.
