The meet was attended by one of the largest groups of schools in years with some very fine marks being made, considering the late spring and being the first big meet of the year.

Null won his trial heat in the 220 at 25 flat, but because of a poor start in the finals could no better than third in a heat which was won in 25 seconds. He ran second in his trial heat in the century at 11 seconds, but

Are you protecting the soil your boy is fighting for?

Whether he thinks about it or not, your boy is fighting for the soil of America—your soil.

In the urgency of our greater need for foods, fats and fibres, it is important to remember that your fertile acres will produce more for you and for him when he returns, if their productivity is not lost through lack of soil protection.

The Ford-Ferguson Tractor and Ferguson Implements are designed to put soil protecting methods into operation, at new low costs and without any decrease in current production.

You will find this modern equipment especially suited to terracing, contour farming, strip cropping and effective control of water supply and soil erosion.

More tractors and more implements will be available than during the past season. Why not talk it over with us?
