FROM THE RAILROAD GANG

Bowen showed up about half past eight: He was crabby, as usual, because he was late As he was handed the turn over, you could hear him roar, Something had happened the day before.

An empty went through switch on six The bottom fell out of a car of bricks Sixty-six left about three hours late, A draw bar down on a car on track eight.

A car of ice was melting on the east end of two, A special for 3:00 P. M., call the crew; The bundle building want a switch right away, They claim you promised them this very day.

A drag of empties will arrive at four, They want an engine—maybe more; Someone ran through the cross over switch, I think it was U. P. engine number six.

The scale is not switched and nothing is set, And Captain McCoy is mad as a hen that is wet; Someone shoved a car in on three And Bowen started on another spree.

For the 12 cars there were setting fine, But were soon seen going down the line; Bowen was in a terrible rage And said naughty things for a man of his age.

Just then the phone rang and the roundhouse said The night crew forgot to go to bed; Berry came on as usual at four But did not seem quite so sore.

Until Bowen began to give turn over papers Then you should see him cut up swing shift capers; As he left that night he was heard to say If I only, only had my way.

And wasn't afraid they would grab my rights, I certainly would can that gang on nights; Mr. Cox, we don't hear much of, only The waste baskets in a mess from his good old peerless.

To close, the crews asked Mr. Dooley for more pay, His answer, "Brothers, the 15th, I'm on my way".

**A "SECRET WEAPON" the Navy shares with you**

To lubricate Uncle Sam's submarine Diesel engines so they run clean and smooth on long cruises, the Navy uses RPM DELO.

The Navy is sharing this "secret weapon" with the home front . . . and RPM DELO is doing a great job in thousands of tractor, truck, marine and stationary Diesel engines. It's specially compounded to prevent sludging and gummed-up pistons—it actually cleans and frees rings stuck through use of other oils. Millions of test miles in laboratories and actual service proved that it just about **DOUBLES THE TIME BETWEEN OVERHAULS**. The Navy can't afford to take chances with its fighting Diesels—and neither can you. Get RPM DELO and you get the all-around lubricant for all Diesels.
