This is a carburetor

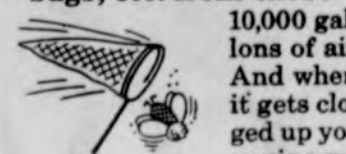

Mixing 10,000 gallons of air into every gallon of gasoline your engine uses! That's the carburetor's job.

If your engine flutters, bucks, or goes phfft at traffic stops your carburetor is haywire.

Now Shell isn't in the carburetor tinkering business, but we do help keep 'em healthy by removing goo from air cleaners.

This gadget traps dust, bugs, etc. from those

10,000 gallons of air. And when it gets clogged up your engine may breathe-in damaging grit and abrasives. Expensive!

Shell people have a knack with air cleaners. And with Shellubrication... a service designed to prevent your car from joining the 150,000 which are junked every month by Wartime Stop and Go driving.

GIRLS... A SECRET!
Cars aren't mysterious at all. Alice in Motorland proves it. Your FREE copy awaits at nearest Shell pump.
