### This is a distributor

Talk about dealing!  
 More than 5000 times each minute your distributor deals the right amount of electricity to the right spark plug at the right instant.

If it should get out of whack, your engine runs jerkily, knocks, or backfires.

To keep your distributor dealing sparks without a miss—and protect all the other important parts of your car at the same time—is the job of Shelllubrication.

Shelllubrication is the best guarantee we know that something hard to replace won't burn out, break, or just get tired and quit. (And 5000 cars do quit every day—junk pile victims of neglect and wartime stop and go.)
