This is a spark plug

Your car yells "Gimme a light" about 5400 times a minute. And the spark plugs must deliver it on the split instant.

Those 5400 explosions per minute give spark plugs a Turkish Bath that boils the sparking ambition clear out of 'em after about 10,000 miles. Result—spark weakened, and gasoline that's wasted just like pouring it out on the street.

Here's where Shell comes to the rescue. They'll clean your plugs, or sell you new ones if the old ones have cracked (as they sometimes do). And they'll Shellubricate your entire car for you, too.

You need Shelllubrication because it protects your car against Wartime Stop and Go wear... the villain that's sending 10,000 cars to junk yards every week!

FOR THE LADIES
Free, amusing booklet, *Alice in Motorland*. Facts of life about your car to help you keep it from going haywire. Your copy at any Shell pump.
