COOK WITH CARE

Cooking failures are serious nowadays

Pearl Oil HELPS PREVENT THEM

Food scarcities make careful cooking a "must" in every kitchen this year. And that means clean steady-burning PEARL OIL to make your stove behave. Solvent Refined PEARL OIL causes none of the disagreeable odors you get with most kerosenes. It burns clean and hot and steady . . . there's no "creep up" to blacken your steak or burn your baking. That's because all the impurities have been "strained" out of PEARL OIL, to get rid of smoke, soot and odor and give you clear, heat-producing flame. Pearl Oil means more clean heat, for safe dependable cooking.
