"We've had PP&L electric service from cellar to garret since 1911"

says H. A. Reynolds, of the Prospect Heights District, Walla Walla, Wash.

"When our farm home was built, in 1900, we had a carbide gas lighting system built in, but in 1911, the year after PP&L was organized, they brought electric service to our farm—about two miles south of town. The same line also served the Prospect Heights school house, one of the first rural schools in this area to get electric lights.

"In 1858 a log cabin was built on this place. It's still standing and is quite a historic landmark. Now it serves as a storeroom, and has electric lights like all our other farm buildings.

"As early as 1918, electric lights were installed in our chicken houses to step up egg production. I believe this was the first installation of its kind in the Walla Walla area.

"We have a big well on the place—20 feet in diameter—with two automatic electric

pumps. This well supplies water for two houses, as well as for the barns, chicken houses, and quite a bit of irrigation.

"Until a fellow stops and thinks back thirty or thirty-five years, he hardly realizes how much progress we've made electrically since PP&L started in business. And the same 'go-ahead' spirit is bound to carry us along in the future."

Mr. Reynolds was born in 1863 on the farm where he makes his home now. He attended Whitman Seminary (later Whitman College), then went to the University of Michigan, graduating in 1886. Returning to Walla Walla, he studied law and was admitted to the bar.

In 1900 Mr. Reynolds bought his present 240-acre farm, part of the 640-acre donation land claim which had belonged to his mother. He has served four terms as Walla Walla County Commissioner, and two terms as a representative in the Washington State Legislature.

Mr. Reynolds has five adult children. Two daughters live with him on the farm, and one daughter lives in Southern California. His son, Jay, was a flight instructor in Montana until recently, and Allen, his other son, teaches high school in Walla Walla.
