Support the 7th War Loan!

The Seventh War Loan started May 14. Americans as individuals are taking on their biggest quota to date—7 billion dollars, 4 billions in E Bonds alone.

"Why this biggest of all individual quotas now? Haven't we already reached the peak?"

The answers are quite obvious.

The money is needed for war. The battle of Japan has just begun. It must be backed up, paid for, fought for by a free people, intent on sweeping the Pacific clear of fascist hate—forever. The war to crush Japan will be bigger, tougher, and longer than most Americans expect.

The money is needed for new tasks, new needs. The single greatest obstacle to our crushing of Japan is distance. While in the battle of Europe supply ships from our bases in England had only an overnight run to make, ships in the Pacific have long-reach round trips taking up to five months to make. To crush Japan will take time, heroic and back-breaking effort, overpowering equipment.

And lest we forget—money will be needed to care for the sick, wounded and disabled who will require medical attention and care. Many millions of dollars will be required for mustering-out pay and benefits voted by Congress to help our veterans get started again in civilian life. That's the least we can do in return for what they've done for us.

There are other weighty reasons for supporting the 7th War Loan—reasons that take us from the present to the future.

By investing in the 7th War Loan, the patriotic American is safeguarding his own future, his country's future.

By putting every dollar over rock-bottom expenses into the purchase of War Bonds, he is delivering a body blow to wartime inflation—thus putting a lid on the cost of living and maintaining intact the purchasing power of the dollar.
