Steger & Son's Piano Factories

Has four gigantic plants in one covering, with electric power plant and lumber yards 23 acres of ground. They are located in the town of Steger, Ill., 29 miles from Chicago, and are supplied with lumber from the mills of Messrs Steger & Sons, who own thirty thousand acres of virgin forest located in the state of Wisconsin.

These facts are cited to give you a basis from which to reason. With so enormous a plant, capacity 20,000 pianos per year, with vast purchases of supplies for spot cash, with the necessary capital to buy the best of material and the best of workmanship, the prospective buyer needs no further argument to prove that Steger & Sons are in a position to give greater values for the money than any other piano establishment in the world.

It takes great executive ability to manage such a gigantic factory successfully and after the pianos are built the great problem is how to market them with the least expense possible.

The resourcefulness of Mr. Steger was equal to the occasion. Backed by \$2,000,000 capital, he threw open the doors of the "Bank of Steger," placing credit and capital in the hands of a network of Pacific Coast agencies on the ingenious plan of monthly payments from dealer and customers, (a pure Steger innovation) in place of long time given to firms who represent

state agencies, thus placing the small dealer on equal footing with the larger dealers.

The wholesale prices to dealers are based not on their capital or their individual business, but on the distribution of 10,000 pianos yearly for the states mentioned above.

It is doubtful whether the three largest piano houses on the coast market this many pianos during the year.

Don't you see that Mr. Steger has solved the problem of marketing the finished product of the largest piano factories in the world with the least possible expense to the consumer?

This is an age of keen business competition and rivalry, and the successful merchant is he who incurs the least expense in marketing his goods.

Messrs. Steger & Sons, with their immense capital have solved this problem for their representatives.

Mr. J. V. Steger, starting life as a mechanic, without a dollar, stands the most unique figure in the world today. The wisest in pianodom wonder what will be the next move of this mighty financier for no one can circumvent him.

Inside or out, the better the light, the better the Steger piano shows up, for from top to bottom the material used is the best money can buy.
