The Age of Discretion.
Senator DIIIngham, discussing im .
migration in New York, made use of
the phrase "the age of discretlon" the phrase, "the age of discretion""
"What Is the 'age of discretion,'
Senator?" asked one of hls auditors.
" should say," returned Senator Dil.
Ingham, smlling, "that the age of dis lingham, smilling, "that the age of dis
eretion is reached when a young man
removes from his mantel the rich colremoves from his mantel the rich col-
lection of actresses' and dancing girls'
photographs and substitutes the porphotographs and substitutes the
tralt of hils rich bachelor uncle."

Her Majenty'M Etiquette,
Queen Alexandria of England strict on such polnts of etiquette
make it a breach of decorum, make it a breach of decorum, for
stance, to hand anything but new and stance, toon, fresh from the mint, to
unused cort
the consort of the British soverelgn. To make love to her majesty is pun-
Ishable, by the law of Britain, with death, unlesss, of course, one happens
to be the king.
 Carrying Tunen.
"Dld you want to hire a boy?" ast ed the applicant at a musle store.
"Yes," "Yes." sald the manager. "What musical ablilty have you?"
"None."
"Can you even carry a tune?"
"Then you'll do. We want you to hurry these phonographic records down to the shlpplig
City Times.
Hin Lack or Courage.

the yeliow caterpiliar. good way to rid the trees of them
is by spraying with paris green, but on the trees, a torch made of cloth or small rags and saturated with kerosene may be applled to the lufested limbs
and the lasects destroyed In thls man-
How book Learning Payn.
"Book learning" for farmers has "Book learning" for farmers has
been a thing to laugh at in the past. It used to be thought that an almanac were all a man needed to make him competent to "run a farmi". We are
getting past that day, and doing it at a of the report just publishes. Thin commissioners appolnted a couple of years ago in the State of Louisiana to
investigate crop pests, with particular reference to the boll weevil and the ter-
ible injury it has wrought to the cot on crop. For two years these commls imenting on the State farms in the Red river region, and now they send
word out to the world that they have not be hurt by the boll weevil. Just how they have done this we must walt
to learn. The great fact is that they mean in money to the farmers of the
cotton growling States! Nor will the benefit of thelr work stop there. Other people than the cotton growers are in-
terested in cotton. We all have use for the plant and its products. Fron
the poor man down in the most obscure quarter of the elty to the millionalre
in his beautiful home, we all need cot on In some form or other. And "book farming" cuts the cloud which has
bung over the men who grow the plan hung over the men who grow the plant
and lets the sunshine gut all over the world.

Cact an stook Food. ton bas Isued a very creditable bulle tn dealling with the composition and feeding value of the prickly pear and other cacti. The splines of the cact
are removed by slngelng with a torch. The proteln content in the alr-dry material ranges from 2 to 10 per cent, the frult being the richest part. The cactl compare favorably with many
forage plants. Heretofore the great difficulty in the way of utillzing cect1 as forage has been the spines, but a large amount of cheap forage is made avallable to the stockmen of the arid
plains. plains.

## The Collte Dog.

The Intelligence of the colle is be-
leved by many to come as near to hu lieved by many to come as near to hu-
man thought as that of any animal, and it is possible to teach them so
many things that some very remarkamany thlings that some very remarka
ble storles are told about them. They are for thls reason the grea sheep dog, and no Scotch herder would attempt to get along without hls col-
Hes, with which he lives alone far off ines, with which he lives alone far off
on the hills, says the Clrcle. beauty and charm is companions. ing of horse meat seems to be quite
yeneral In Germany, for no less than
82,000 in 182,000 horses were slaughtered for uman food in 1906.
"Horsetlesh is very generally ndver-
tised in the German tised in the German papers," says
Consul Ifft, "especially in those in large industrial centers, and most German cities have at least one market wutch makes it a specialty, clalming nent than that of beef, veal, mutton or pork. Neither is it unusual to find
dvertisements of dog meat or for the purchase of dogs for slaughter. In the city of Cassel recently the police, in
earching for a lost dog, alscovered a private slanghter house and arrested making a regular business of stealing and killing dogs.
In the city of Chemnitz alone, Con-
sul Ifft reports, cas dogs were slaughered for human food in 1906, this be Ing an Increase of elghty-eight over the

Che Cabhage Rot. growers as black rot, or stem rot, has come Into prominence within the last few years, and is sald to be a serlous
hindrance to cabbage growing in sevhindrance to cabbage growing in sev-
eral States. From a recent farmers' bulletin prepared by the chlef of the
division of vegetable pathology, it appears that no way is known of curing the disease or of entirely ridding a
locality of it when once It is well eslocanty of then once it is well es-
tablished. The whole subject of treat--preventing. The disease is not conned to the cabbage, but attacks a number of specles belonging to the mustard
amilly. The planting of other for a long peries of yenrs other crops e the only satisfactory way to get rid has once become serious.

The trimedge trimmer
