Junction until nearly 5 o'clock, when near Cecil "Granny" was climbing down from the top of a car when from some cause he slipped and went to the ground. At lone and Lexington there was no switching or freight work to do and he was not missed until the train pulled into Heppner. The engine was sent back to find him but the section men had found him walking on the track in a dazed condition, not knowing which way or where he was going. The section men recognized him and brought him to Cecil and notified the Conductor at Heppner that he was there and unhurt except for a few slight bruises, but the engine had left Heppner in search of him. "Granny" was very fortunate in not sustaining more serious injuries as the train was running at high speed and he fell on his head and shoulder.

THE LIMIT OF LIFE

The most eminent medical scientists are unanimous in the conclusion that the generally accepted limitation of human life is many years below the attainment possible with the advanced knowledge of which the race is now possessed. The critical period, that determines its duration, seems to be between 50 and 60: the proper care of the body during this decade cannot be too strongly urged: carelessness then being fatal to longevity. Nature's best helper after 50 is Electric Bitters, the scientific tonic medicine that revitalizes every organ of the body. Guaranteed by W. P. McMillan, Druggist. 50c
