Expects Congress, With Aid of Hot Weather, to Adjourn by June 20-Monument Unveiled.

Gettysburg, Pa., June 1.-Yesterday was the day of tardy honor to the "regular" at Gettysburg. An imposing shaft of granite, erected by congress to the memory of those of the regular manded the attention of everyone. army who fell in the three days' battle, was unveiled by the president's daughter. Miss Helen H. Taft, while the and present.

The president puts himself on record as opposed to any reduction in the standing army. He told of the prejudice that often had arisen against the possible aggressions of a regular army and a professional soldiery, and of the corresponding difficulty in arousing that love and pride in the army which expresses itself today and has frequently expressed itself in the past in behalf of the navy. The president asserted that the services of the regulars had never been commemorated adequately by congress or the nation.

"The profession of arms always has been an honorable one," he declared. 'All honor to the regular army of the United States. Never in its history has it had a stain upon its escutcheon.'

On the way to Gettysburg from Pittsburg, the president's car was sidetracted at York for two hours and during his stay he made a brief address, in which he declared again his hope for the early enactment of a tariff law,

"I have been called an optimist for predicting that congress would adjourn by June 20. Perhaps I am. But if the Lord is good to us and the weather gets hot enough in June, I think our national legislators will be mighty glad to get out of those two close chambers at Washington."

Four regiments of the regular army were here to participate in the exercises. There also was a personal escort to the president composed of veterans of the regular army who fought in the Gettysburg campaign. The president was taken for a drive over the battlefield. At several points he alighted and stood on the prominences overlooking the valley below and the mountains in the far distance.

The ceremonies of the unveiling were simple. Miss Taft pulled the silken cord that released the flags draped about the monument. In failing one of the flags caught on a bronze eagle decorating one of the inscribed tug, but it could not be released until a large hole had been torn in the folds of the stripes. After the president's speech, Secretary Dickinson presented mission. After the unveiling the president reviewed the troops. A mounted battery of artillery which recently served in Cuba was a source of much interest. When the review was concluded, the president hurried to his train.

PUT LINCOLN ABOVE ALL.

Hollingsworth Protests Against Honor Paid Jeff Davis.

Washington, June 1.—Memorial Day was generally observed here yesterday. All the government departments and practically all the business houses were closed in order that tribute might be paid the nation's dead. The principal exercises were at Arlington, under the auspices of the G. A. R. Every grave was marked with an American flag, while flowers were strewn everywhere. Appropriate exercises also were conducted at the Soldiers' Home National cemetery and other burial a dispatch from Bitterfeldt announced

places in the city.
At the Soldiers' Home Representative Hollingsworth, of Ohio, was one of the speakers. He referred to the recent discussion in the house when he protested against placing the head of Jefferson Davis on the silver service of the battleship Mississippi, declaring that "it would be a dark day indeed for the republic when the name of Abraham Lincoln ceases to be revered above all other figures of the civil war period, or when it shall be replaced by that of Jefferson Davis in the hearts and affections of the American people. The thought of it is as shocking as the first thrill of horror that followed the firing on Sumpter."

TORNADO KILLS 32.

Town of Zephyr, Texas, Demolished and Ruins Burned.

Brownwood, Tex., June 1 .- A torvillage of Zephyr, in the eastern portion of Brown county, at 1 o'clock this morning and left a path of death and destruction seldom paralleled. The OPPOSED TO REDUCTION IN ARMY death list has reached a total of 32, AUSTRALIA IN FAVOR OF POLICY and the number of seriously or fatally injured will reach 50.

The storm formed a half-mile west of Zephyr and swept down upon the village, cutting a wide swath directly through the residence and business districts, Nearly 50 houses were demolished. Lightning started a fire which destroyed one entire business block.

No effort was made to fight the fire, as the care of the dead and injured de-

A section employe rode a handcar to score of Brownwood citizens.

Hundreds of persons directly in the storm's pathway saved themselves by taking refuge in storm cellars. More

and two children, who had gone to Zephyr to spend the night, were killed. The big stone school building and two low the lines lately laid down in an archurches were demolished.

Brownwood hurried her second relief train at 12 o'clock today, laden with tention in authoritative circles in Engprovisions, clothing and necessary articles and carrying 40 nurses. Three only an understanding with America persons are still unaccounted for tonight. Two children were found dead late

today two miles from town, having been blown that distance. A special train will leave Zephyr tonight for Temple, carrying the more seriously injured to a hospital. The storm wept the earth for a distance of prob-

ably less than a mile. Surgeons from Brownwood found a sides at Zephyr were covered with debris of all kinds, carcasses of animals and human bodies. The ruins were dimly lighted by the burning buildings, and the cries of the injured rose above the roar of the elements which threatened a second storm.

A hog roaming through the streets the body of an infant. Bodies were found twisted about trees and in every conceivable attitude. Residents walked the streets almost naked. Houses which had escaped the storm were turned into hospitals. One house collapsed on a family of nine without serious injury to any of the occupants. Brownwood, which organized the relief work, has the situation well in hand.

Floods in Mississippi. Jackson, Miss., May 29 .- The town of Quitman is submerged as the result

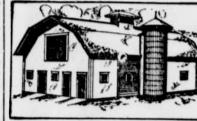

of a flood. All business is suspended and the residents have been forced into the upper parts of their houses. Some railroads is estimated at \$1,000,000.

Plans for Farm Barn

The many very marked changes in farm life would lead one to believe that the large farm is, or soon will be, a thing of the past. The high price of farm help, the necessity for better cultivation and farming, fewer and better bred stock, better care of stock, better buildings for housing the hay, grain and stock, has or soon will bring he small farm, and, so planned and arranged that a greater variety of products are raised.

Many instances are known where the man who had struggled for years with 200 to 500 acres, barely made a living, and of doubling their income by sim-

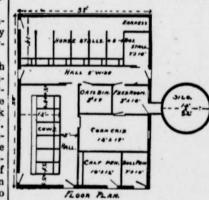

HANDT SMALL BARM.

ply renting out all of the land except fifty to eighty acres. That several cows must be kept on such a farm goes without saying, not only for the monthly income and profit, but for the manure that is necessary to keep the soil alive. Present sanitary requirements call for many devices and appliances that cannot be installed on the small farm, but cleanliness and kindness is within the possibilities of any of us, and while it is true that to house the cows in the same building with the horses has some disadvantages, it also has its advantages, and to build separate buildings for both, is not only expensive, but calls for extra help in caring for and feeding them.

A careful study of the barn shown n the illustration herewith will show what we will call a condensed arrangement, and, while the cows are in the same barn with the horses, a good, tight partition separates them from the horse barn, to keep out the dust and odors. For the same reason the silo is located where shown, for stlage, no policy from that of Japan in the Paci- matter how well cared for, has an offensive odor, that is readily absorbed by milk.

The floor plan is self-explaining, the silo is an ordinary stave structure, with wire cables for hoops, as the cable is not so easily affected by contraction nd expansion as the solid iron hoops. The crib has the foundation left out is shown, and the floor is of 2x6 inch

studding, with one-half-inch spaces be tween. The siding is drop siding, the same as the balance of the barn, but the top and lower edges are beveled. ad a one-half-inch space is left between each board. ultivation That Damages Corn. The corn is often damaged by the roots being broken in deep cultivation. This is not the case to a serious extent early in the season, when the corn is small, but the check to the crop may be quite marked if cultivated deep late in the season, when the corn has reached a height of 2 to 3 feet or more, particularly if the previous cultivation has been shallow or neglected. If dry weather happens to follow such treatment the damage to the crop is much increased. When not followed by some form of cultivation that will level down the ridges left by the large shovel cultivator, the ground will dry out quite deeply and in the furrows be tween the ridges this drying readily

reaches the roots of the corn. To

is something to be gained by it, deep cultivation should not be followed .-Oklahoma Station. Co-Operation Among Farmers. Men in all other lines of business organize and work together. Farmers are beginning to see the need of concerted action, but as a rule we still work single-handed. At Lombard, Ill., about twenty miles west of Chicago, the farmers who produce milk for sale in the big city have tried several times to organize in order to force the milk trust to pay them a price in accordance with what the customer pays, but the trust is always able to hire some farmer to break the rules of the local association or to talk against the project to such an extent as to defeat its ends. That is one great difficulty in forming protective measures among farmers. There are always a few men

ADJUSTABLE HANGER. Show in winter .--Sam Avery, in Farm and Home.

All in Management. Folks say that if you want any class of stock that can always be sold at a ing old age, you want a mule. We do comfortably fixed? not raise mules, so can not speak from experience. This much we do know, however, several good friends of ours have been dickering in mules for years without making any money. Perhaps these are the exceptional cases that prove the rule. Others have raised and bought mules and made good money. We surmise it's more the man desk. and his management than it is the mule, that reaps the profit. The same man dealing in razorbacks might make some money.—Farmers' Mail and Breeze.

Fertilizer for Potatoes. For potatoes the past year we used 1,200 pounds of fertilizer to the acre, one-third applied broadcast and the rest scattered in the furrow, brushing the fertilizer into the soil of the furrow before planting the seed. After planting, the surface was kept well stirred to prevent weeds starting and the cultivator was run often enough to keep down the weeds. A little hand hoeing was done. The yield was 250 bushels per acre. The crop followed that is regular can't be a freak, and any corn and the land was very thoroughly harrowed before potatoes were planted. Plenty of harrowing and liberal use of fertilizers may be depended on to give a good crop.

Rotation of Forests.

The necessity of the rotation of crops is well recognized among modern farmers, and now it appears that in India nature is seen practicing the in India nature is seen practicing the same thing in the forests. The soil becoming exhausted after a long period of one kind of forests, seedlings of other species gradually reality of the species of one kind of forests, seedlings of the species other species gradually replace the old trees as they die out. On the Indian soil, the deodar tree has been observed taking the place of the blue pine, pine and oak slowly exchange places, and spruce and silver fir have been noted gradually extending into a forest of falling oaks.

Breeding Corn. Prof. R. A. Moore says that painstaking in breeding corn has raised the average corn production in Wisconsin from 25 bushels per acre in 1901 to 41.2 bushels per acre in 1907. This increase is worth striving for in every State and on every farm.

Give growing pigs food to produce bone and muscle rather than fat. The pig should have a warm, dry bed kept clean and free from dust. No domestic animal responds so quickly to good treatment as the hog. Thrifty hogs turn grains into money
