

## JAPS MAKE PROTEST

Appeal to Mikado in Trouble With Hawaiian Officials.

## CLAIM TREATY RIGHTS VIOLATED

Tension is High in Honolulu and Police Are Ordered to Sleep On Their Arms.

Honolulu, June 15.—M. Negoro, one of the editors of the Jiji, made formal complaint to the Japanese foreign office today that the territorial authorities invaded his rights as a Japanese subject under the treaty between Japan and the United States when High Sheriff William Henry raided the office of the Jiji and seized alleged incendiary documents; and is preparing to bring court proceedings against the territory for \$500,000 damages.

The alleged violation of his rights as a Japanese subject guaranteed under the treaty between the United States and Japan, he sets forth in his complaint, consists in the search of his office and the seizure of his private papers by the territorial authorities without due process of law. Territorial Sheriff William Henry admits that the search was made by force of arms, and without search warrants or process of law, but claims that the papers seized contained evidence of criminal purpose. However he declares the courts of the territory are open to Negoro for redress if he has been damaged.

While but slight disturbance of any kind has occurred so far, the city is full of striking Japanese, and the tension is so great that orders were issued this afternoon for the full force of police to sleep at the police station to-night, ready for any emergency.

An incident of the day that threatens a disturbance was the chasing of a carrier of an "extra" of the Japanese newspaper Shinpo, announcing the arrest of the editors. The paper from the start has been opposed to the strike and among the papers seized in the raid upon the office of the strike organs, were letters containing threats against the life of its editor.

Although the strikers have returned to work on the Ewa and Waiialua plantations it is not certain that they have abandoned the struggle. From the papers seized by Territorial Sheriff Henry it was seen that it was the original plans of the Japanese to return to work at intervals to earn enough money to maintain the strike and by this method of working and again striking to wear out the planters by the uncertainty and irregularity of plantation operations.

## RIFLE SHIPMENT FOUND.

Mauers Packed as Planos, Destined for South America.

Norfolk, Va., June 15.—Packed in piano boxes and evidently ready for shipment, a quantity of rifles and ammunition, believed to be destined for Venezuelan revolutionists, was discovered at Franklin today.

The rifles are said to be a part of a consignment of 15,000 Mauser weapons shipped from New York to St. Louis and back to Franklin, billed as pianos, and packed to weather the trip to South America. The filibuster suspect steamer Nanticoke was lying near Franklin and in the black water below the steamer was her consort, the tug Dispatch.

The revenue cutter Pilimico is blocking the two suspects, and it is not believed that either could pass her even in the darkness. Orders have been issued from Washington to seize the vessels in case either should lift anchor. The Nanticoke is not built for deep sea navigation, but the dispatch could navigate far off shore and the officers in charge of the situation believe the plan of the filibusters was to transport the arms to another steamer at sea.

## Employe Stole Cash.

Los Angeles, June 15.—Theft by postoffice employes and not an error in routing was responsible for the loss of registered packages containing \$30,000 in currency mailed by the First National bank of Los Angeles to the Bank of Biebe, Ariz., a week ago today. To a sudden uproar in the postoffice following the discovery is attributed the failure to apprehend the thief, who made away with two packages containing \$10,000 and \$5,000, respectively. This alarm is responsible for the recovery of the other packages.

## Arkansas Seizes Capitol.

Little Rock, Ark., June 15.—Governor Donaghey and two members of the state commission today formally took possession of the uncompleted capitol building, after breaking through a door which had been locked by the contractors, Caldwell & Drake, whom the legislature ordered discharged. The building, which has cost nearly \$1,000,000 already, and which engineers say is already about half completed, has caused political contention for years. The legislators have been charged in the courts with grafting.

## Girl Leads Rescue Party.

Vancouver, B. C., June 15.—Urged on by thoughts that a brother mountaineer, Ralph Jennings, lay at the bottom of a drop in the mountains suffering with a fractured leg, Miss Baynes, teacher in a local school, started out at 4 o'clock yesterday morning over a rough mountain trail in search of assistance. Arriving at the Capilano hotel after six hours of travel, she organized a search party and led them to the wounded man.

## Rescued Japs Travel Far.

San Francisco, June 15.—The British steamer Winniebag arrived last night from Shanghai bringing five Japanese, three men and two boys, who were picked up off the east coast of Japan, May 29. The Japanese were sighted 200 miles off the coast in a dismantled sampan. They will be turned over to the Japanese consul to be returned to their own country.

## CANADA IS ANGERED.

Retaliation in High Tariff Is Being Urged in Dominion.

Ottawa, Ont., June 15.—That the new American customs tariff when finally revised will further increase the tariff against Canada, is the representation made by many commercial bodies to the Dominion government.

Inquiries are also put as to what course the government is likely to pursue in the matter. In some quarters retaliation is being urged and Ottawa authorities are beginning to give their attention to the situation which the Payne tariff is likely to create.

Lumber interests as well as pulp manufacturers and paper makers of the province of Quebec are jubilant over the announcement recently made by a provincial leader, Sir Lomer Gouin, that stumpage dues would be increased and that export of pulp wood from the province will be prohibited. This prohibition will only apply to timber cut on government lands.

Increases on oysters, hops and potatoes will not make much difference to Canada's trade. Canada is more interested in the coal, wheat and lumber duties. The opportunity afforded by the Payne tariff for reciprocity in coal is likely to be a live subject for discussion at the next session of the Canadian parliament.

## DE PAUL GOES HOME.

Venezuelan Envoy at Paris Recalled in Disgrace.

Paris, June 15.—Jose J. de Paul, the special representative of Venezuela to Europe, received his recall by telegram from the Venezuelan government just as the protocol with France was concluded.

Senor Paul says that he was stupefied by the action of his government. "I cannot understand," he said, "how President Gomez could have allowed himself to be hoodwinked by the interference of some few groups."

These groups, he said, had accused him of high treason at the time of the downfall of President Castro, because as minister of foreign affairs he had notified the United States government through Senor Lorena, the Brazilian minister to Venezuela, that Venezuela desired to settle all difference with foreign powers and requested the American government to send a warship to Venezuelan waters. A similar notification was sent to Great Britain and Italy.

Senor Paul declared that the situation at the time was desperate, that the support of the army was uncertain and that many of Castro's friends and relatives were in high positions.

"It is less a conciliator than a man with an iron hand that Venezuela needs," he said.

"Nevertheless, in spite of my disgrace because I am conservative, I shall continue to give President Gomez my support in maintaining the regime I helped to establish."

## CHINESE COOLIES FOUND.

Inspector Falls Among Band of Nine in Steamer's Hold.

Seattle, June 15.—Immigration officials, after picking up on the wharf a stray Chinese who admitted he came over as a stowaway on the Great Northern liner Minnesota, searched the vessel yesterday and discovered nine more smuggled coolies and a quantity of silk and cigars.

Inspector C. E. Keagey, who is a heavy man, stepped into the sail locker of the steamer and fell 20 feet through a hole in the floor, alighting squarely on top of nine naked Chinamen, whereupon they screamed in terror. Further investigation brought to light several leather sacks resembling government mail pouches filled with raw silk and a number of boxes of Manila cigars. The bags of silk are supposed to have been taken aboard with the mail sacks. Three Chinese stowaways were captured on the British steamer Cymeric last month, and it is believed organized smuggling is in progress on Oriental steamers.

## Spain Is Pressing Cuba.

Paris, June 15.—It is stated here the Spanish minister to Cuba has handed the Cuban government a note concerning the payment of a share of the Spanish debt. It is pointed out in the note that the American plenipotentiary at Paris in 1899 refused to decide this point, holding the suzerainty had descended on the Cuban republic and not on the United States. The Spanish government now considers the time has arrived to press the claim, the republic having now assumed sovereignty.

## Aid for Castro Feared.

Bufort, N. C., June 15.—The revenue cutter Pilimico hunted off this coast today for the steamer Nanticoke, suspected of filibustering intentions against Venezuela. The Treasury department's activities were invoked because of persistent rumors that friends of ex-President Castro were planning a hostile expedition against the Gomez government. It is alleged 10,000 stands of arms had been shipped from Belgium to America for this purpose.

## Turkey in More Trouble.

London, June 15.—An Athens dispatch to a London news bureau says that advices from Uskup, European Turkey, report a fierce engagement at Djakovitch, in Northern Albania, between 10,000 Albanians and 12 battalions of Turkish troops. According to the dispatch, the Albanians were repulsed by the deadly fire of the Turkish artillery.

## Hunt Down Mutineers.

Manila, June 15.—Brigadier General Harry H. Bandholtz, chief of the Philippine constabulary, who is at present on a tour of inspection in the island of Jolo, will at once proceed to Davao, Mindanao island, the scene of the mutiny. The insular government is determined to make an example of the mutinous men.

## FARMERS' CORNER.

**Feeding Horses.**  
It might be said that grass is the natural ration for the horse, but when confined to a barn and also when worked, the animal needs a more strengthening and nutritious food. To feed properly there must be a mixed diet. The intention of the food is to supply heat and muscle, but not an oversupply of fat.

The quantity of food given should be based on the amount of work the horse has done—the more work the greater the amount of food that should be given.

The foods that are generally fed are hay, grass, corn, oats, barley, rye, bran, carrots, turnips and apples. Of the grains oats is best, with corn second, but both are improved if fed in a crushed state. Oats build up the muscles, make blood and put nerve and endurance in the horse. On account of the price, oats are not generally used, and in such cases corn must be taken in the hay given is rather rich in protein.

Corn and timothy hay are of a heat nature and hard on the digestion, causing the animal to perspire freely. If corn is liberally used, some bran, with clover or some well-cured pea-vine hay, or clover with corn, will help balance up the ration and keep the digestive organs in a healthy state. In feeding green food care must be taken.

**Average Milk.**  
It has been shown that 100 pounds of average milk contains about 87 pounds of water, 4 pounds of fat, 5

## A ROAD IMPROVER.

## THE SPLIT LOG DRAG.

Drag may also be made of 2 inch planing stiffener at the back by 2x4's

On behalf of a number of farmers who wish to construct splitlog drags, a correspondent asks for publication of plan. The dimensions of the several parts are indicated in the illustration. D. W. King of Missouri, who has been the most prominent advocate of this road implement, describes it as a lever for smoothing down the rough places and packing the surface soil. Best results are obtained on clay roads. It will improve even sandy soils, though it cannot make a hard roadbed of such material.

pounds of sugar, 3.3 pounds of casein and albumen and 0.7 pounds of mineral matter or salts. The composition of the milk depends largely upon the cows producing it. Both Jerseys and Guernseys give rich milk, upon which the cream quickly rises. Durhams and Ayrshires give milk of an average richness, upon which the cream slowly rises. Holstein cows are noted for giving a large quantity of milk in which there is a small proportion of fat.

## Poultry Profits.

The cost of food required to produce a pound of beef pork or chicken does not differ greatly, although chicken sells for 12 to 20 cents a pound by the carcass, while other meats sell at from 4 to 8 cents. This difference is further increased on the farm from the fact that poultry picks up a good deal of material that would otherwise go to waste, as well as numerous insects that should be destroyed, so that much of their food should not really be figured as expense at all.

But there is a greater risk of loss in raising chickens and the cost of labor per pound of finished product is more than with sheep or hogs. Then you must credit eggs produced, which complicates the problem until you get a headache. The net returns, according to capital invested and cost of maintenance, however, leaves a greater profit from poultry than any other farm live stock. If a farmer would keep close account of the income from his poultry, including the amount of eggs and butter consumed at home, he would be surprised at the returns.—Agricultural Epitomist.

## Look Out for Sore Shoulders.

The shoulders and neck of the horse will be tender when heavy spring work is started. Then, too, the horses are covered with a heavy coat of hair, which will cause them to perspire easily. This makes it very necessary to keep close watch on the shoulders and neck where the collar rubs.

The collar should be a perfect fit; one too large is more dangerous than one too small. The inside of the collar should be scraped each morning before it is again put upon the horse. The harness should be oiled before spring work is begun, so that it will be soft and pliable. It is a good plan to bathe the shoulders with cold water every night after the harness is removed. You will also find that it will pay to remove the harness while the horse is eating his dinner.—Ex.

## Hauling Farm Produce.

It is said that a Pennsylvania farmer does not average more than one ton of marketing to two horses, and he must send one man with every two horses. English and Scotch farmers generally put two tons of marketing on a one-horse cart, and place two of those carts in charge of one driver. The driver ties one of these carts behind the other and walks alongside of the first one. Thus we have a foreign farmer doing with one man and two horses the work an American farmer takes four men and eight horses to do.

## Take Care of the Orchard.

Now and then we hear of farmers with an apple orchard who cannot see that it will pay them to take good care of it, says the Rural New Yorker. In one case a farmer sold apples enough from his orchard to buy him ten good cows for his dairy, yet he cannot see that it would pay him to spray and prune the trees. There is some scale in this orchard, and the fruit is usually wormy. Taken in hand now with oil and later with arsenic for the Codling worm this orchard would give the easiest money on the farm. We would like to shake such men up and let them see the future. The demand for good apples is sure to increase, while bearing trees are not keeping pace with the demand. Young trees are being planted, while many orchards are dying through lack of care. Do not, under any circumstances, neglect good apple trees. Stay by them with all the care you can muster.

## Fountain-Like Feed Bag.

Almost everyone has noticed the painful efforts of the unfortunate horse which is compelled to take its noon-day meal out of a feed bag. In order to get the feed the horse must throw the bag and its contents into the air and catch a mouthful as he can. Besides the industry he is compelled to exercise in the pursuit of his feed, the horse loses about half the grain by reason of the fact that it is thrown over the top of the bag.

The nose bag shown in the accompanying cut is of recent invention and is designed to overcome this trouble. The feed supply is contained in a reservoir which is secured to the bridle and is suspended between the animal's eyes. The feed flows down of its own weight into a saucer-like receptacle which is held under the animal's

## Terminology.

Our woman suffragists insist. They are not ready yet. To cast aside the stately "gist," and substitute a "gette."

Extensive beds of lobsters are to be planted soon in the waters of the British Columbia, and it is expected that in four or five years the lobster-taking industry will be established on a large scale.

## When lovely woman writes a story.

Changing Tones.  
She fills it full of love and glory  
And sends it thundering down the ages.  
—Chicago Tribune.

## Reward of Merit.

The pitcher passed a man to first—  
"Take out the lanky hurler!"  
He struck the next two batters out—  
"Ain't he the demon twirler!"

In France there are 6,000,000 smokers, says the Tobacco Weekly Journal. Of every fifteen there are eight who smoke a pipe, five who smoke cigars and only two who are cigarette smokers.

## Standing Up for Him.

"Miriam, isn't that young Fergus coming to our house pretty often now?"  
"I suppose he is, mamma."  
"Do you know anything about him?"  
What is he worth, for instance?"  
"Well, he's worth any dozen of the ordinary young men of my acquaintance."  
"Yes, but—"  
"And he's worth \$100 a week to the firm he works for—even if he does get only \$25 now."—Chicago Tribune.

## Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Of the races of the world 600,000,000 are white, 700,000,000 yellow, 215,000,000 black, 35,000,000 brown, or Malayan, and 15,000,000 red, or North and South American Indians.

## Confidence Game.

Man With the Bulging Brow—What are you scowling about?  
Man With the Bulging Nose—I'd like to punch your head for you. You told me I ought to read "Reveries of a Bachelor." I got it at the public library and put in an hour or two trying to read it, and there ain't the first blamed word in the book, from first to last, about prize fighting!

## According to Contract.

House Owner—You failed to pay your rent last month. What are you going to do about it?  
Tenant—Oh, I suppose I'll do as you said when I rented it.  
House Owner—What did I say?  
Tenant—You said I must pay in advance or not at all.

## The Truth Comes Out.

"Please, mister, help a pore cripple," whined the husky hobo.  
"Sure," rejoined the kindly old gentleman, as he handed out a quarter. "How are you crippled, my poor fellow?"  
"Financially, mister," replied the hobo, as he pocketed the quarter and made a hurried getaway.

## Slight Mistake.

Harker—I met Smythe a week after he had faced the person and he declared that he had married his ideal.  
Parker—Well?  
Harker—A year later he confessed his mistake—said it was his ordeal instead of his ideal he had married.

## To Enjoy

the full confidence of the Well-Informed of the World and the Commendation of the most eminent physicians it was essential that the component parts of Syrup of Figs and Elixir of Senna should be known to and approved by them; therefore, the California Fig Syrup Co. publishes a full statement with every package. The perfect purity and uniformity of product, which they demand in a laxative remedy of an ethical character, are assured by the Company's original method of manufacture known to the Company only.

## Cheese.

The Bureau of Chemistry of the United States Department of Agriculture has come out flat-footed in answer to the question, "When is cheese not cheese?" They say that when it is "soaked curd" it cannot be sold as cheese. Pseudo-cheese is produced by soaking the curd at a certain age in cold water, draining it and putting the curd to press. This treatment is carried on solely for fraudulent purposes.

## Breeding Up Stock.

A Western stock breeder advises farmers to breed up stock rather than buy all pure-breds. He says that to establish a herd of pure-breds costs more money than the average farmer can afford, when the progeny is to be sold to the packers or the butchers. Good females of pure-bred beef stock bring high prices, and the farmer would need a considerable number to make a good start. But with a pure-bred bull he can in a few years have a herd of cows that will make it possible to market beaver of high grade.

Exact Copy of Wrapper.

## CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of

and has been made under his personal supervision since its infancy.

Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

## GENUINE CASTORIA ALWAYS

Bears the Signature of
