

PILES

"I have suffered with piles for thirty-six years. One year ago last April I began taking Cascarets for constipation. In the course of a week I noticed the piles began to disappear and at the end of six weeks they did not trouble me at all. Cascarets have done wonders for me. I am entirely cured and feel like a new man."—George Kryder, Napoleon, O.

Pleasant, Palatable, Potent, Taste Good. Do Good. Never Sicken, Weaken or Grip. 10¢, 25¢, 50¢. Never sold in bulk. The genuine tablet stamped C. C. C. Guaranteed to cure or your money back.

HEAT CAUSES DEATH

Then He Hugged Her.
The Male Graduate—I propose to strangle the earth.
The Female Graduate—Why do you begin on such a big thing?
Extreme Conservatism.
It is the habit of some people to condemn everything they are mentally incapable of understanding, and the insist upon calling it "conservatism" instead of ignorance.

With His Usual Thump.
Mrs. Jenner Lee Oudgo—Did you feel that earthquake shock this morning?
Mrs. Seldom Holme—Very distinctly, but I thought it was my husband getting out of bed.

His Building Site.
"That lot you sold me at Lonesomehurst is all covered with water," said the city man to the agent.
"Sure!" said the flashy man: "we're going to stack it for fishing next season!"—Yonkers Statesman.

A Sad Luck.
Speeder—That auto of mine doesn't go fast enough.
Roaster—What's the matter?
Speeder—Several victims have complained that they knew what struck them, which means something defective. And I am not cruel.

Suicide for a Scorpion.
If a scorpion finds himself licked by a centipede, which is usually the case, though both little things put up a desperate fight, the scorpion commits suicide. It twists its tail portion and stings itself in the back of the neck and drops dead.

Not Yet, but Sometime.
Man from the City—You intend to keep bees, I suppose.
Suburbanite—Some day, perhaps. At present we are devoting our entire energies to keeping a cook.

Only a Contributor.
"He's a regular contributor to your paper, isn't he?" asked the caller.
"Yes," replied the city editor; "but we haven't used any of his stuff for years." "But I thought you said he was a regular contributor?" "So I did. He contributes just the same."—Yonkers Statesman.

Stalling Him.
"You people are at peace with all the world," remarked the foreigner.
"What do you need of a standing army and a big navy?"
"Principally," said the native, "to keep Capt. Hobson quiet."—Chicago Tribune.

Of all the boy workers in London newboys are the healthiest, barbers' boys the most unhealthy—a tribute to the open-air life.

A statue of King Henry VI is being placed outside of Salisbury cathedral, England, as a memorial to the late Dean Webb.

Sure of Missus.
"Bertha, where is my hat? I laid it down here a little while ago."
"Sure, missus, Fido's takin' a nap in it. Don't talk so loud, or y'll wake the little darlin'!"

Looking Ahead.
"Old chap, what are you growing those umbrageous side whiskers for?"
"I'll tell you if you won't say anything about it. I know of a big department store where there's going to be a vacancy in the floorwalker's job in a few weeks, and I'm going to apply for it."—Chicago Tribune.

From the Servants' Table.
Van Antler—I think we are sure of a good dinner to-night. You know my new English butler does the entire catering for the household. Grub—Can you rely on him to—? Van Antler—Not always, but this evening I requested him to send up something from the kitchen table.—Puck.

Luck at Last.
"The done had do proof dat dar's luck in a rabbit's foot," said Erasmus Pinsky.
"What were do proof?"
"I done sold do one I'a been carryin' so long a superstitions white lady foh fo' bits."—Washington Star.

A Nose for the Truth.
Exact truthfulness, according to a writer in the Sketch, had its proper reward in the following instance:
Teacher—Now can you tell me what the olfactory organ is?
Boy—Please, sir, no, sir.
Teacher—Quite right.

Beyond Reformation.
Patience—She says she married him to reform him. Patience—And he says he was a fool when he married her. "Well, she says she hasn't reformed him a bit."—Yonkers Statesman.

Useless Now.
"Just my luck," groaned Uncle Abner. "I've spent \$500 and six months' time in patenting a churn, and now they've found out how to make butter out of kerosene."

Color and Lies.
"But sometimes it's right to tell a white lie, isn't it?"
"Perhaps. But I notice that when a man gets that idea once, it isn't long till he becomes color blind."—Cleveland Leader.

The manufacture of wire glass is of St. Louis origin, and the largest factory in the world devoted to this product is in that city. It employs 350 men.

HEAT CAUSES DEATH

Withering Blast Sweeps Missouri, Kansas and Oklahoma.

VEGETATION IS KILLED THEREBY

Ten People Dead and Many Prostrated—Corn Shriveled Up by Fierce Blasts.

Kansas City, Aug. 17.—Unusually intense heat, officially recorded by the government weather bureau as high as 110 degrees, caused at least ten deaths, numerous prostrations and much damage yesterday in Missouri, Kansas and Oklahoma. Throughout the Southwest the day was the most trying since the devastating drought of 1901. As the withering winds swept across the plains much vegetation fell.

In this city the heat continued and prostrated a score, some of whom are in a dangerous condition. The Union depot was like an oven. Babies became seriously ill and medical attention was needed before their mothers could resume their journeys. The distress of a party of immigrants was great.

The likelihood of an ice famine added to the gravity of the situation here. Dealers reported that the factories were running night and day, but that the demand had exceeded the supply. Most of the dealers refused to deliver more than 25 pounds to any residence, and feared they would have to cut this quota down.

At Wellington, Kan., the official temperature was 106. Corn was suffering greatly in that district. The day was the hottest Topeka has had for eight years, 102 degrees being officially recorded. Two prostrations resulted there.

QUAKE FELS MOUNTAIN.

Thousands of Buildings Destroyed and Great Property Loss.

Tokio, Aug. 17.—Reports received today concerning the earthquake in Central Japan Saturday, show there were many fatalities and great damage was done to property. The dead at present are said to number 30, though it is feared further fatalities will be reported from the outlying districts.

The number of persons injured is 82. Thus far 362 buildings, including many temples, are reported to have been destroyed and more than 1,000 others badly damaged.

The town of Asaku, in Gifu, suffered terribly. The banks of the Hida river broke and the country is inundated. The people of the district fled to high ground and remained in the open all night. Intermittent shocks were felt throughout Saturday night and early Sunday morning.

The mountain Iuki, a short distance west of Gifu, collapsed with a thunderous roar.

Slight damage was done at Nagoya, to the southwest of Gifu, and neighboring villages.

CANADA CAN FEED BRITAIN.

Grain Crop of Dominion is Reported Greatest in History.

Winnipeg, Aug. 17.—From all points in Manitoba, Alberta, Saskatchewan and British Columbia the unanimity of opinion points to the anticipatory result of this year's harvest as being the greatest in the history of the Canadian West. In some places, such as Southern Alberta, the phenomenal growth makes it hard for the people to conceive such prospects. Farmers are now busy gathering the hay crop, which is a heavy one. The grain harvest will be general during the latter part of the present month.

The statement is made on good authority that the completed Grand Trunk Pacific railway from Winnipeg to Edmonton is tributary to wheat lands capable of feeding the whole people of Great Britain and Ireland in case of need.

Plan Red Cross Annex.

London, Aug. 17.—Based on the German and Japanese models, the war office has issued proposals for a great voluntary Red Cross scheme in connection with the territorial army plan. It will be worked in connection with the existing Red Cross society and St. John's Ambulance society and will provide the entire country with complete organizations. Men and women are to be trained in establishments in every territorial area as nurses, stretcher bearers and other branches of the Red Cross service.

Spanish Turn on Moors.

Madrid, Aug. 17.—Fighting between the Moors and Spaniards was resumed today at Mellilla. After a disastrous week for the forces under General Marina, during which the Moors have kept the garrison of 35,000 men closely hugging the walls of the city while they poured shot into the fortifications from the mountainside, Marina moved aggressively against the tribesmen today. The long expected munitions arrived several days ago and in spite of the attempts of the Moors a number of French field guns have reached Marina.

Yuma Flooded by Rain.

Yuma, Ariz., Aug. 17.—The most disastrous rain storm experienced in this vicinity since the great flood of 1891, when the downtown part of the city was washed away and hundreds of people rendered homeless, broke over Yuma today. The adobe houses of the poorer classes crumbled like sugar. Dozens of families were compelled to move out, wading waist deep in the water, which poured over window sills.

CANKER ATTACKS TREES.

Orchardists Find It Most Troublesome Pest in Northwest.

Black spot canker is one of the most troublesome fruit pests of the Northwest and one which fruit growers must understand and be able to recognize if they expect to make headway against it.

During the fall the spores or "seeds" are lodged on the apples, being distributed by the wind on other agencies. Later, when the apples are stored in cellars where there is an abundance of moisture "sweating" occurs, a condition very favorable for the germination of spores.

Black spot canker is responsible for the great part of fruit rotting that occurs. The most effective treatment is a thorough spraying with bordeaux mixture in November, when the spores or seeds are floating in the orchard.

Because the fungus gives such slight evidence of its presence in the bark in the fall, and because so apparent in the spring, many orchardists make the mistake of attempting to combat it in the spring after it has already gotten in the bark. Such treatment is ineffectual, however. The spore must be killed before it has germinated.

DEPOSIT TO BE MINED.

Nehalem "Beeswax" Has Been Found to Be Ozocerite.

That the product found in the sand at the mouth of the Nehalem river, popularly believed to be beeswax from a wrecked Spanish galleon, is valuable substance known to chemistry as ozocerite, was the statement made by J. J. Walter, president of the Neacaway City Hydrocarbon company, a corporation organized to exploit the product.

For years visitors to that coast have picked up the wax-like lumps that have strewn the beach there. The general opinion has prevailed that it was beeswax brought from Manila for one of the Spanish settlements in California and that the ship was wrecked there. The discovery was made as early as 1813 by the Indians.

Kit Carson, the famous scout, now employed as an assayer by the government, visited the place and announced that the supposed beeswax was none other than ozocerite, a product of hydrocarbon oil, found only in South America and in small quantities in Northern Europe.

ALL NATIONS INVITED.

Official Call is Issued for Fourth Dry Farming Congress.

Billings, Mont.—Secretary John T. Burns has issued the official call for the fourth annual session of the Dry Farming congress, to be held at Billings, Mont., October 26-27-28, 1909. The call is addressed to the president of the United States, the diplomatic representatives of foreign nations, ministers and secretaries of agriculture of all countries, governors of states, presidents of agricultural colleges, state land boards, state engineers, state boards of agriculture, national, state and county agricultural associations, or grange lodges, livestock associations, horticultural societies, county commissioners, mayors of cities, presidents of town all commercial bodies, railroad and immigration companies, and members of the Dry Farming congress. In addition to these the call is sent to about 30,000 individual farmers and others interested in agriculture in the West.

Big Washington Project.

Kennewick—That preliminary plans have been made for a big irrigation project, which will water thousands of acres of sagebrush land in Grant county are under way, is the information given out by J. M. Spencer of Plains, Mont. Mr. Spencer, who has large land interests in the Crab creek country, says that the farmers in that section have begun active preparations to place 550,000 acres under irrigation by means of a pipe line to be built from the Columbia river to the Crab creek valley in Grant county.

It will cost \$5,000,000 to complete this gigantic undertaking, which will be one of the longest gravity systems in the world. The pipe line will run more than 100 miles before it reaches the nearest land to be watered and the farthest point will be the Columbia river, on the northern boundary of Benton county.

Central Oregon Settling Up.

Burns—Notwithstanding heavy immigration and settlement the past few years, there are yet in Harney county over 3,000,000 acres of government land subject to entry, including timber, grazing, mineral and agricultural land, a greater area than the entire state of New Jersey, and two-thirds the area of the whole of Massachusetts. Up to a short time ago, this vast domain was devoted entirely to stock raising, immense herds of cattle, sheep and horses feeding over the illimitable ranges during the greater part of the year, while large quantities of hay have been cut for their winter use.

This has been changed. The past few seasons have brought hundreds of industrious settlers who are opening up farms and meeting with the most encouraging success in agriculture.

Cretan Government Resigns.

Canea, Island of Crete, Aug. 17.—The British battleship Swiftsure arrived today in Huda bay. The Cretan government has resigned and the administration of the island has been entrusted to provisional committees. The committees have had the armed peasants expelled from the fortresses which they occupied Saturday night, intending to resist the order of the powers that the Greek flag be lowered. The committees, however, have not had the flags hauled down, but probably will at the proper time.

Suit to Oust Book Trust.

Newport, Ark., Aug. 16.—Suit has been filed in the Jackson Circuit court by R. E. Jeffrey, prosecuting attorney, and Hal L. Norwood, attorney general of Arkansas, against the American Book company. The state asks the exacting of fines amounting to \$2,000,000 and the ousting of the defendant company. It is alleged in the suit that the American Book company, as publisher and distributor of school books, maps, etc., is party to a pool or trust.

THE GAME.

Cheating Even a Street Car Company Cannot Be Honest.

The car was crowded, but the two pretty girls who entered it at Madison avenue had no trouble in getting seats. They thanked the men who gave them places, and immediately fell into an absorbing conversation, so absorbing that one of them did not look up when the conductor called for fares. He glanced at her doubtfully, but after a second's hesitation, passed on; it was almost beyond human possibility to be certain of every one at the crowded hour.

As they left the car, one of the girls turned to the other triumphantly. "An other nickel!" she exclaimed.

"Another nickel? What do you mean?" the other asked, puzzled.

Claire laughed, showing her prettiest dimple. "I mean," she explained, "that that five nickels I saved this week by free rides. Of course I don't care for the nickels, but it's loads of fun to do it."

"But—Claire Ellis—it isn't honest!" Claire laughed again. "What's the harm?" she asked. "The company's far too rich. Lots of people do it, only they don't own up."

"But I should think the conductor would catch you."

"That's just the fun of it—I've found out how. If I think the conductor is going to ask me, I just smile right into his eyes. They never insist when you do that. Once, though, I did nearly get caught. I took a big chance that time, for I'd been shopping, and had spent every cent except a ten-dollar bill—and the conductor was a grim old thing, who wouldn't know a pretty girl from a cow! When he said, 'Fare, miss,' I was scared for a second; then before I realized it, my life was saved. The man who had given me his seat and was standing just in front of me, said, 'I paid for that young lady—I gave you two tickets.' The conductor looked doubtful, but he couldn't be sure because the car was crowded, so after an instant he went on."

"But, Claire Ellis—to let a strange man pay for you!"

"Well, of course I didn't quite like it, but what could I do?" she protested. "And I'm sure he was very nice about it, only he did keep staring at me afterward. I wouldn't have father know it for anything—he's so fussy over some things. Don't you dare breathe it to a living soul, Bess Harriman!"—Youth's Companion.

QUEER STORIES

A new machine automatically weighs or measures a medicine and fills eight capsules while one is filled by hand.

Chao Ping-chun, vice president of the Chinese ministry of interior, has been ordered to retire, owing to his opium habits.

The United States government maintains fifty-seven wireless telegraph stations and has ninety-six vessels fitted out with such facilities.

Helium is the ideal gas for all lighter than air airships, said Prof. Erdmann the other day in a lecture in Berlin. Had Count Zeppelin used it, he declared, the catastrophe at Echternagen last August would never have occurred.

Next year's international exhibition in Brussels is to have a very uncommon feature. It is proposed to give an ocular display of the misery and poverty in which the Belgian home workers exist, with a view of bringing their needs under public notice.

A new social experiment has been made by the authorities of Charlottesville, Berlin's fashionable suburb. They have appointed to their elementary schools women officials under the title of "Schulchwestern," or school sisters, whose function it is specially to look after the health of the children.

The hen gathers, mixes and puts together in organic form, 650 grains of water, 120 grains of fat, 106 grains of lime, eighty grains of albumen, twenty-six grains of sugar and ten grains of ash. With her marvelous inside fixtures she puts her humble grist together and shells out the most marvellous of animal products—the egg.—Farm Journal.

The total electric light and power generating capacity in Japan at the end of 1908 was 86,000 kilowatts, an increase of 12,000 kilowatts over 1907. Of this capacity 54,550 kilowatts was generated by steam, 31,951 kilowatts by water power and 105 kilowatts by gas engines. Last year the Tokio Electric Light Company began taking power from Katsura, forty-seven miles distant, the voltage being 55,000.

The Turkish bath as known in the west differs materially from the Turkish bath as used in the east. According to F. G. Afes, wanderer and mighty hunter, the difference lies in the fact that at home the bath is visited only by men who wear broadcloth, whereas in Damascus almost the poorest are able to frequent it. Disrobing in the nafsourah men are to be seen whose wardrobe would not fetch a sovereign.

Use of Salt.

Salt in moderate quantities is good for everybody. It aids digestion, and, better still, it makes one thirsty. If we eat plenty of salt and salty foods we will drink more water, and most people do not drink enough water. Try eating a raw apple sprinkled with salt. It is very good, particularly good for children. Pepper, on the other hand, and spices should not be given to children, unless in the most meager quantities. At many of the sanitariums the food is not seasoned at all, except with salt.

Delayed by Fido.

The New Husband—See here, pet. I'm awfully anxious to get to the office early this morning. Can't we have breakfast?

The New Wife—Why, Alfred dear, of course we can't have breakfast until Fido gets up.—Cleveland Plain Dealer.

Guaranteed under the Food and Drug Act.

Exact Copy of Wrapper.

Profited Somebody.
"Gimphe, how have you invested your profits in that little wheat deal?"
"Profits! Huh! Ruggles, the profits in that transaction are invested in a neat but gaudy promissory note, secured by mortgage, on which I am paying interest at 6 per cent."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

False Alarm.
"Mamma, young Prof. McGoozle proposed last night—"
"Mercy, child! What on earth has he got to live on!"
"I wish you wouldn't interrupt me, mamma. He proposed that we start in and read President Elliot's five feet of books."—Chicago Tribune.

Nature of the Offense.
"He testified that the agents of the company tried to bribe him, eh? What could have been his motive in giving them away?"
"It is generally supposed that they didn't offer him quite as much as he had expected."

Views on Pence.
"Won't it be lovely when peace reigns throughout the world?" she exclaimed.
"Yes," replied the man, "and I think there'd be money in bidding for the guns and other junk the nations would have to sell."—Philadelphia Public Ledger.

A good locomotive will travel about 1,000,000 miles before it wears out. With ordinary care it ought to last twelve years.

To Break in New Shoes.
Always shake in Allen's Foot-Ease, a powder, it cures hot, sweating, itching, swollen feet, cures corns, ingrowing nails and bunions. At all drug stores, and shoe stores, etc. Don't accept any substitute, sample mailed FREE. Address Allen S. Gimsted, Le Roy, N. Y.

Proposed schemes to irrigate the Desert of Sahara are said to be impracticable because of the great depth of the overlying deposit of sand.

Putting It Up to Her.
Self-Possessed Young Woman—Geoffrey, you have been coming to see me for more than a year. Don't you think it's time to tell me what your intentions are?
Bashful Youth—Why, Miriam, I was in hopes you'd suspect what my intentions are by this time.

LEADER PNEUMATIC WATER SUPPLY SYSTEMS FOR COUNTRY HOMES

The best and most logical method of furnishing water yet devised. The tank is placed in the basement or in the ground near the house and keeps the water cool in summer and proof against freezing in winter. It never leaks. It is impossible for impurity to get into it. It costs a little more to begin with, but there is no second cost. We have a catalogue which illustrates and describes the Leader system. Ask us for it.

STOVER GASOLINE ENGINES

are especially adapted to pumping duty and in fact any duty that requires a strong, reliable power. They are economical, simple and easily understood. It is an engine which anyone, no matter how little he knows about such engines, can operate as successfully as an expert. In short, it is an ideal engine for any kind of work. Send for STOVER Engine Catalog—Free.
