

Insomnia

"I have been using Cascares for Insomnia, with which I have been afflicted for twenty years, and I can say that Cascares have given me more relief than any other remedy I have ever tried. I shall certainly recommend them to my friends as being all that they are represented."

Thos. Gillard, Elgin, Ill.
Pleasant, Palatable, Pure, Taste Good. No Food, Never Sickens, Weakens or Grips. No. 25c. 50c. Never sold in bulk. Guaranteed to cure or your money back.

Perhaps.
In the lurid glare
Of a sulphurous torch,
Some day and somewhere,
The scorched will search!

Fair Warning.
Young Gollygity (to pretty girl)—Is the seat next to you engaged, miss?
Miss—No; but I am. And he's going to get in at the next station.—
Comic Club.

Best Test.
"Tell me," said the lovelorn youth,
"what's the best way to find out what a woman thinks of you?"
"Marry her," replied Peckham,
"promptly."—Catholic Times.

Court of Last Resort.
"Prisoner, stand up. Have you any reason to offer why the sentence of the court should not be pronounced upon you, according to law?"
"Yes, your honor, I have. Mr. Gompers says the law is unconstitutional."

Going to Headquarters.
"And that young man kissed you on the lips? Why didn't you offer him your hand?" said the father.
"O, I didn't have to, papa," said the girl; "he's going to ask you for that!"
—Yonkers Statesman.

C. Gee Wo The Chinese Doctor

This wonderful man has made a life study of the properties of roots, herbs and barks, and those who know him at that time described him as a sociable young man, always full of fun. He was noted, however, for a mind of his own. What he wanted he generally obtained, but his desires and ambitions were, at that time, at least, neither very sweeping nor particularly important.
How he obtained his start and the funds which enabled him to buy a seat on the New York stock exchange, have never been clearly explained. The most widely accepted explanation, however, was to the effect that during the famous "gold corner" engineered by Gould, Fisk, Kimber and others, Edward H. Harriman plunged with all his own money and some borrowed from

HARRIMAN IS DEAD

Victor in Financial Battles Loses to Grim Reaper.

MIND REMAINED CLEAR TO LAST

Secrecy Preserved Until Stock Market Closed—Time Misstated—Whole Family Present.

Arden, Sept. 10.—Edward H. Harriman, the greatest organizer of railroads the world has ever known, met the only lasting defeat of his active life at the hands of death. Secluded in his magnificent home on Tower Hill, he succumbed to an intestinal disorder yesterday after a fight against disease that will rank for sheer grit with his remarkable struggles in the financial world.

The exact time of his death is known only in that limited circle of relatives and associates who had shielded Mr. Harriman from all outside annoyance during his last illness. The time was given out as 3:35 p. m., but Mrs. Mary Simonds, sister of the dead man, said last night that Mr. Harriman died at 1:30 p. m. Whether this apparent discrepancy has any bearing on the current belief that every effort was made to lessen the influence of the financier's death on the New York stock market is problematical. But it is significant that the time of his death, as officially announced, was just 35 minutes after trading had ceased on the New York exchange.

Mr. Harriman died peacefully and to the end his brilliant mind retained its clearness. After a relapse on Sunday he sank slowly and soon after noon yesterday there came a relapse that marked the approach of the end. His wife, two daughters and two sons, who have been constantly with him, assembled at the bedside and a carriage was hastily dispatched for Mrs. Simonds, whose home is three miles from the Tower Hill home. Mrs. Simonds entered the great silent home in time to be present at her brother's death. She joined the wife and children, who, with Dr. W. G. Lyle, of New York, and Orlando Harriman, a brother, and the nurses, formed a group at the bedside.

Mr. Harriman will be placed at rest in the family plot at the little graveyard behind St. John's Episcopal church at Arden. He will rest beside his eldest son, Edward H. Harriman, Jr., who died 22 years ago, soon after the family first came to Arden. The services will be held at 3:30 o'clock Sunday afternoon, and it is understood, will be strictly private.

Edward Henry Harriman will go down in history as one of the most spectacular financial geniuses, most daring stock speculators and greatest railroad magnates of his time. He was born at Hempstead, L. I., February 25, 1849, the son of Rev. Orlando Harriman, Jr., rector of an Episcopal church in that town, founded in 1702.

The early life of the future man of millions was one of great poverty. His father was a cultured but poor man, his mother came from an old aristocratic, but equally impecunious family of New Brunswick, N. J.

Edward H. Harriman received his early education at the district school and supplemented it by a two years' course in a boys' school under church auspices, where the sons of clergymen paid practically nothing for their education.

Edward Henry Harriman began his career as clerk in a broker's office on Wall street. He showed no unusual ability and for many years gave no promise of his later brilliant development. Socially he was well liked and those who knew him at that time described him as a sociable young man, always full of fun. He was noted, however, for a mind of his own. What he wanted he generally obtained, but his desires and ambitions were, at that time, at least, neither very sweeping nor particularly important.

How he obtained his start and the funds which enabled him to buy a seat on the New York stock exchange, have never been clearly explained. The most widely accepted explanation, however, was to the effect that during the famous "gold corner" engineered by Gould, Fisk, Kimber and others, Edward H. Harriman plunged with all his own money and some borrowed from

Coal Land Thieves Arrested.
New York, Sept. 10.—Rufus Ireland, George Dally, Frank T. Wells and Wilberforce Sully are under arrest here charged with conspiracy to defraud the United States government out of 1,760 acres of coal lands in Wyoming, near Lander. All were held under \$500 bail. They were indicted on May 21 in the Federal district court of Wyoming, along with a number of others, for alleged land frauds committed in that state. It is alleged that the defendants got possession of the coal lands by employing dummies.

Squaw's Claims Settled.
San Francisco, Sept. 10.—Heirs named in the will of John R. Hite, a millionaire mining man of Mariposa, Cal., have effected a settlement with his Indian widow. It was announced today that within a week more than \$6,000,000 will be distributed. Hite was a pioneer in the California gold fields and married an Indian woman, from whom he afterwards separated, making an allowance for her maintenance. She was not provided for in his will and the contest followed at his death. The suit was compromised for \$100,000.

Suffering Follows Floods.
Monterey, Mexico, Sept. 10.—Believing that the people in the outlying districts are facing starvation and death as a result of the raging waters, several expeditions are being formed here today to go to their relief. A priest arriving from Ascension states that the town and its population of 2,000 souls have entirely disappeared. The people have fled to the hills or have perished, either in the flood or from hunger.

FARMS AND FARMERS

Bitter Butter.

Bitter cream and butter may and generally does result after the cow has been feeding liberally on moldy hay, decaying roots and certain weeds. Another fruitful source of bitter cream and butter is the holding of the cream at too low a temperature, when objectionable bacteria get in their work, causing a pungent or bitter flavor. For best results cream should be cooled and held at a temperature of about 50 degrees for six or seven hours immediately after separation, after which it should be ripened in a temperature of from 60 to 70 degrees. When it begins to turn sour it is ready to be churned, and then the sooner it is churned the better. In small dairies, where several separator skimmings are required to make up the quantity of cream for a churning, the cream should never be run from the separator into the vessel holding previous skimmings. One needs a cream can of sufficient size to hold all that is required to make up the churning, and such vessels should be kept in a place where the temperature is about 60 degrees. Each skimming should be cooled before being emptied into this storage can. When fresh cream is emptied it should be at once thoroughly incorporated with the contents of the can by stirring with a spoon or ladle. Churning should not take place within five or six hours after the last cream has thus been added.—Field and Farm.

Reclaiming Washed Land.
I had about one acre of washed clay land on one side of a good field that was absolutely devoid of vegetation, had been left out for a number of years after wasting fertilizer upon it, and was an eyesore. Early in the spring I crossed it with furrows about 5 feet apart. In these furrows I dropped wild blackberry roots, one about every 4 feet. I dropped a forkful of stable manure next to each root, partially covering it, and covered the whole with one furrow made with the turn plow. In the next furrow I dropped small pine tops and partially covered them with the plow. I went over all the land in the same way. The work required three days for two men and a team. The following spring I plowed out the middles. This was five years ago, and I have not touched the land since. I have gathered two good crops of blackberries and the land is now covered with heavy berry bushes and a good wild grass sod, with no wash to speak of. G. M. Humphreys, in Agricultural Epitome.

Water a Necessity for Crops.
This reservoir is 100 feet high and 37½ feet in diameter and will hold 3,400 tons of water, an equivalent to 30 acre-inches of rain fall. An average rainfall of 13¼ inches during the

growing season would fill to the point indicated. A rainfall of 9 inches, if completely utilized, would produce a yield of 30 bushels of wheat or 157 bushels of oats.

Silo Building.
In all silos the greatest waste occurs around the sides, particularly in the corners, because the air has greater access to these parts. The fodder is not packed tightly in the corners, the air fills the interstices and decay results. With the cylindrical silo the friction is equally distributed over the entire inside wall surface, so that the silage settles evenly.

The place a silo is to occupy may determine the form to build. There are several kinds. Chief among these are the round the stave, the square or rectangular, and the octagonal form. A square or rectangular silo can usually be constructed within a barn with better economy of space than a round silo. For these reasons square silos are most frequently employed within the barn, and the circular type when a separate building is constructed.

Mottled Butter.
Streaky or mottled butter may be caused by the salt, or it may be due to the working of the butter. The salt is so evenly diffused in the finest kind of butter that, as is shown by a microscope, every grain is surrounded by a film of clear and transparent brine, which points out the necessity of avoiding the overworking of the butter before the salt is added. In the first working every particle of milk should be gotten rid of, but enough clear water should be left to dissolve every grain of salt in twelve hours before the next working. If this is done there will be but little danger of streakiness in the butter, but to get the best results the salt should be very finely ground.

Preserving Fence Posts.
It is estimated that a fence post, which, under ordinary circumstances, will last for perhaps two years, will, if given preservative treatment costing about 10 cents, last eighteen years. The service of other timbers, such as railroad ties and telephone poles, can be doubled and often trebled by inexpensive preservative treatment.

Striped Beetles.
Look out for the striped beetles. They often attack and destroy melons and cucumbers as fast as the plants appear above the ground. An application of wood ashes, air-slaked lime, or gypsum, tainted with kerosene or turpentine or carbolic acid, will help to drive them away. If you have only a few plants you can easily protect each hill by erecting a mosquito netting guard over it until the plants begin to run.

GENERAL CORBIN DEAD

Noted Army Man Passes Away After Long Illness.

New York, Sept. 9.—Lieutenant General Henry C. Corbin died in Roosevelt hospital in this city yesterday after an operation for a renal disorder. General Corbin would have been 67 years old in a few days. Mrs. Corbin and ex-Governor Myron T. Herrick were at his bedside when death occurred. He had been ill for two years.

Accompanied by Mrs. Corbin and his daughter, Mrs. Parsons, of Ardley, N. Y., he went to Carlsbad for treatment on June 12 last. The waters there appeared to have improved his condition after two weeks' stay, and he returned to England, where his former trouble recurred and he went to Paris to consult physicians. The trouble developed more seriously while in Paris, and he determined to return to America. J. G. Schmidlapp, of Cincinnati, met him in Paris and with Mrs. Corbin they sailed for New York on the steamer Rotterdam, which arrived here Sunday. The general was taken to the Hotel Martineau in this city, and Dr. Frank Erdwurm was summoned. The physicians advised that General Corbin be removed to the Roosevelt hospital, and he was taken there on Monday. The operation was performed Tuesday morning by Dr. Laueus Hotchkiss.

Paris Press is Skeptical.
Paris, Sept. 9.—The press of Paris was today absorbed in the rival claims of Dr. Cook and Commander Peary, and there is a noticeable drift of opinion in the direction that Dr. Cook will have difficulty in proving the validity of his claim in the face of the story of an experienced explorer like Peary. Virtually all the newspapers agree that Dr. Cook has passed into the background since Peary entered upon the scene and some of them declare that since Peary's appearance he will be doubted more than ever.

Canada Lays Claim to Pole.
Ottawa, Ont., Sept. 14.—Canada claims all land directly north of the American continent, as far as the Pole, upon which it would be possible to nail a flag. This position will be taken, it was semi-officially announced today, in reply to a question asked in the British house of commons as to the ownership of the North Pole when the results of the Cook and Peary explorations became known. Canada's answer, in effect, will be that all territory between the American boundary and the North Pole is hers.

Both Stories Undoubted.
Rome, Sept. 9.—Commander Cagni, who was with the Duke of Abruzzi on his Polar expedition, said today: "The Peary would reach the Pole one day I never doubted, nor have I doubts as to the sincerity of Dr. Cook. The doubts with regard to Cook arise from the vagueness of his first statements, the misunderstanding regarding the Polar temperature, the position of the newly discovered land and his apparent lack of preparation for the expedition."

Other Hunting is Stopped.
Victoria, B. C., Sept. 10.—Word has been received by the Victoria Sealing company that the sealing schooner Thomas F. Dwyer, which has been in Behring sea hunting for sea otter, has been ordered from the hunting grounds by a United States revenue cutter. As hunting for sea otter is not prohibited, protest will be made to Ottawa with a view to having representations made to Washington.

Wellman Gives Up Dash.
Christians, Sept. 9.—A special dispatch from Tromsø says that Walter Wellman has instructed his agent to arrange for the return of all the explorer's property from Virgo bay.

THE CRY FOR CREAM

A NEW IOWA CREAM SEPARATOR

is constantly increasing. The big creamery companies are constantly on the lookout and are offering good prices. A great many dairymen are buying more cows instead of trying to get all the profits possible out of those they now have. They seem to think about all that they can do to run the milk through a cream separator, never stopping to consider whether the cream separator is doing its duty as it should. If it is an old-fashioned, out-of-date or cheap machine it can't get all the butterfat—it wasn't intended to. Your dairy profits can be increased from 5 to 25 per cent by the use of

A NEW IOWA CREAM SEPARATOR
The Separator that has won recognition by the three last expositions, St. Louis, Portland and Jamestown, and has the endorsement of all the leading dairy experts. Its use actually means the saving of a great amount of cream. It also means that your cream makes better butter and never has that separator taste peculiar to cream skimmed by other machines. This is because the Iowa is so rapidly cleaned and never becomes choked up with film and dirt. Among its many advantages are these:—Wide low supply can, enclosed gearing; ease of operation; adjustable crank; real appearance; interchangeable parts; etc. IT IS POSITIVELY THE CLOSEST SKIMMER ON THE MARKET. Send for catalogue.

Was a Plain Case.
"You want to divorce your husband? You say you cannot agree? What evidence can you give of incompatibility of temper?"
"Why, I want a divorce and he doesn't."—Rire.

On Hers.
"Tommy," asked the teacher of the geography class, "what do you understand by the 'corn belt'?"
"I never heard of one, ma'am, answered Tommy Tucker. "Ma'aw always uses a plaster."

But Not in a Salon.
"You know the artist we met last summer who boasted so of his family connections? Were any of his pictures hung?"
"No, but his grandfather was."—Baltimore American.

Yielded Gracefully.
"Minnie, didn't your father make a fuss when you showed him that diamond ring and told him Clarence gave it to you?"
"Not a bit. All he said was, 'Who's that insignificant little—but what's the use!'"

Practically the Same.
Mrs. Kawner—Do you get pastured milk?
Mrs. Crossway—I asked the milkman about that, and he said they had to keep the cows in the barn, of course, but they fed them fresh hay, and that's just about the same thing, you know.

This is a Liebel.
"Why do so many women rest their chins on their hands when they are trying to think?"
"To hold their mouths shut so that they won't disturb themselves."—Cleveland Leader.

His View.
"Excuse me, can I speak to your typewriter a moment?"
"You cannot; she's engaged."
"That's all right; I'm the fellow she's engaged to."—New Orleans Times-Democrat.

Special Offering at New York Store.
Clerk—Here is something new in chafing dishes.
Customer—What is its special feature?
Clerk—It produces only nightmares that are perfectly gentle.—Judge.

He Knew.
