

When You Take Cold

One way is to pay no attention to it; at least not until it develops into pneumonia, or bronchitis, or pleurisy. Another way is to ask your doctor about Ayer's Cherry Pectoral. If he says, "The best thing for colds," then take it. Do as he says, anyway.

We publish our formulae. We have had about 100 years of experience. We urge you to use our Cherry Pectoral.

When the bowels are constipated, poisonous substances are absorbed into the blood instead of being daily removed from the body as nature intended. Knowing this danger, doctors always inquire about the condition of the bowels. Ayer's Pills, made by the J. C. Ayer Co., Lowell, Mass.

Hard on His Nerves.
"Did you find yourself embarrassed while in Europe by your lack of acquaintance with the French language?"
"No," answered Mr. Currow. "I think I suffered less embarrassment than the other folks. I couldn't tell half the time what they were blabbing about."
—Washington Star.

COUGHING BURST

BLOOD VESSEL

Says Danger Avoided and Cures Coughs in 5 Hours.

A writer for the medical press states that coughing is responsible for the bursting of blood vessels quite frequently. A cough or cold means inflammation (fever) and congestion, and these in turn indicate that the body is full of poisons and waste matter. Simple relief, of course, is to use a cough medicine, and while, of course, it is more than good as they cause more congestion. A cough-remedy cough syrup will, however, and here follows a prescription which is becoming famous for its prompt relief of coughs, croup, and hoarseness. It is the system of the cause, except it be consumption. Don't wait for consumption to grasp its victim, but begin the treatment, which takes some five hours. Mix in a bottle, one-half ounce fluid wild cherry bark, one ounce compound essence cardui and three ounces syrup white pine compound. Take twenty drops every half hour for four hours. Then one-half to one teaspoonful three or four times a day. Give children less according to age.

Nothing There Stationary.
Drummer—Is there a stationary store at Crow Bend?
Stage Driver—I couldn't say, pard, that you'd find anything stationary at Crow Bend, because they have a twist-er in them parts most every day what starts things moving, but she's lively, and I'm shore you'd like the place.—Judge.

TWO TRAINS COLLIDE

Ten Men Killed and 16 Probably Fatally Hurt.

INJURED DRAGGED FROM FIRE

Locomotive Bears Down on Caboose Without Warning—Flames Consume Demolished Cars.

Chicago, Sept. 28.—Ten men were killed and 16 probably fatally injured yesterday morning when a train south-bound for Cincinnati on the Pennsylvania road crashed into the caboose of a Chicago, Milwaukee & St. Paul cattle train bound for the stockyards.

Sixteen men were in the caboose of the Pennsylvania train when the passenger train crashed into it in the railroad yards a few blocks from the downtown station. The engine plowed through the caboose, tearing it to bits and setting fire to the debris.

Six bodies were recovered within a few minutes after the crash, while the flames were eating up the splintered pieces of the demolished car. Sixteen injured were dragged from the burning ruins.

The passenger train known as the Cincinnati special of the Pan-Handle route of the Pennsylvania left the union station soon after midnight. No signals had been given, so far as could be learned, that any other train was on the tracks.

The passenger train increased its speed and when at One Hundred and Twentieth street the engineer saw the rear lights of the freight ahead. It was too late to avert a collision. He used the airbrakes and reversed his engine, but the train crashed into the caboose filled with sleeping stockmen, with tremendous momentum.

PRESIDENT IN MINE.

Taft Visits Famous Copper Diggings at Butte.

Helena, Mont., Sept. 28.—Attired in a linen duster, an old black slouch hat and swinging an electric lantern at his side, President Taft was locked in a mine at Butte, he had a series of interesting experiences. Not the least of these was a thrilling automobile ride over the mountains from Butte to the mouth of the Leonard mine.

SPANISH ROUT MOORS.

Tribesmen, Driven to Dire Straits, Ask Terms of Surrender.

Madrid, Sept. 28.—The War office announces today the complete success of the maneuvers against the Moors.

Both Nador and Zetuan have been occupied. At the latter town there was bloody fighting with large bodies of Moors.

The ring around Mount Gurgura is now considered almost closed and the position of the Moors is desperate.

Kaid Amas appeared before General Marina, the commander of the Spanish forces, yesterday and asked terms of surrender for the tribes entrenched on Mount Gurgura. The results of this conference are not known, but it is believed the Moors are ready to submit without conditions.

Western Speed War On.

St. Paul, Sept. 28.—The Great Northern railway yesterday put into operation a daily mail and express train which will cut 11 hours off the present running time between St. Paul and Seattle. Mail from the East will reach Puget sound cities 24 hours earlier. This is claimed to be the fastest long distance train in the world. The new train left St. Paul at 8 o'clock yesterday morning and is due to arrive in Seattle at 6 o'clock Wednesday morning. This action is regarded as an important move.

Central States Are Shaken.

St. Louis, Sept. 28.—A slight earthquake, which was felt through Southern Missouri and in Southern and Central Illinois and Indiana, occurred today. In St. Louis the tremor came at 8:47 o'clock. So far as has been ascertained little or no damage has resulted. The general direction of the shock was west to east, and it was felt more clearly in thinly settled districts. Villages west of St. Louis reported the destruction of a few chimneys and in the west end of this city, the residence district, many sleepers were awakened.

Alaska Census in Winter.

Dawson, Sept. 28.—W. A. Mackenzie, of the United States bureau of census, was here recently, on route to Fairbanks to make his headquarters for the thirteenth census. He has three main assistants at Juneau, Seward and Nome, and he will hire a total of 125 men to cover population, mining, agriculture, schools and other statistics during the winter months, giving Alaska credit for all actual residents absent on vacation in the states.

Mrs. Harriman Takes Her Own.

Goshen, N. Y., Sept. 28.—The simple will of the late E. H. Harriman, bequeathing his vast estate to his widow in toto, without reservation or condition, was admitted to probate this afternoon. Mrs. Harriman qualified as executrix and became the sole director of the railway magnate's millions, assuming her position as one of the richest women in the world.

CLASHES WITH GOVERNMENT.

National Troops May Be Called To Settle Georgia Trouble.

Atlanta, Ga., Sept. 28.—Lawyers and judges of the state are intensely interested in the serious clash now on between the state and the Federal authorities in the case of Charles E. Steggall, in jail at Trenton, Ga., in the contempt of court by order of Judge A. W. Fite, of the Dade county Superior court. Steggall refused to testify before the grand jury in reference to an alleged distillery.

Over Steggall the bitterest legal fight in the history of the state has been precipitated, with both sides confident and standing pat.

Should the State court persist in its attitude of defiance to the mandate of the Federal court, the chances are that most interesting developments will result to pass this week, which will result in the arrest of several other officials. It is believed here that the Federal court will carry its point, even if obliged to make a direct appeal to the United States government to enforce its orders. Therefore, in the settlement of this dispute, national troops may have to be used.

The acute situation in Dade county arose over an effort to secure evidence in an alleged blind-tiger case. The people of Dade county, Rising Fawn, have believed a distillery has been located in that neighborhood for some time, and that it has paid the government license to secure immunity from Federal raids. In order to get the necessary evidence, the grand jury summoned before that body Charles Steggall, storekeeper and government gauger. Steggall then communicated with the collector of internal revenue, H. A. Rucker, asking him what he should do in the matter.

Rucker wired him that under the government rules, he would have to keep quiet. This is the outcome of a government statute, under the revised laws, by which government employees are liable to loss of position, fine and imprisonment, if they divulge information secured by the official capacity.

Steggall promptly informed the grand jury that he could not answer the questions put to him, and gave the government rules as his reason. His refusal brought the matter to the attention of Judge Fite, who ordered him to answer. Three times he was sent for, and three times refused to answer, and then he was sent to jail.

He made appeal to the Federal authorities in Atlanta for protection. As the government cannot afford to allow its employees to be kept in prison for obedience to government rules, the Federal officials determined to stand by Steggall.

Before they could take action, however, Judge Fite held that Rucker had interfered with the conduct of his court by ordering Steggall not to speak, and so he sent Sheriff Thurman of Dade, to Atlanta, to serve summons on Rucker to appear in his court.

CANADA WANTS ASIATICS.

Railroad Co.'s Actors Facing Serious Labor Famine.

Ottawa, Ont., Sept. 28.—The Canadian railways face to face with a labor famine; and unless a plan can be devised whereby Asiatic labor may be imported for construction work, much of their railroad building will have to be abandoned. This is the opinion expressed by Collingwood Schrieber, consulting engineer of the department of railways.

On the Western prairies the demand for farm laborers has temporarily demoralized the railway construction gangs, the Grand Trunk Pacific road being especially hard hit. This road has been able to retain only a small percentage of its laborers employed on construction work, the farmers in that section having offered as high as \$4 a day for men while the railroad company pays but \$3.

In the next two years, four new contracts are to be let for construction work, and 25,000 men will be needed. Sir Charles Rivers Wilson, president of the Grand Trunk system, has been here consulting Sir Wilfred Laurier upon a proposal to employ Asiatic labor in building new lines. It is proposed to bring the Asiatics to Canada and return them to their native countries after the work has been completed.

Few Changes in Minnesota.

St. Paul, Sept. 28.—Few changes are liable to be made immediately in the administration of the affairs of the state of Minnesota. Governor Eberstadt says he will continue to carry on as far as possible the policies of the late Governor Johnson. Many of the Democratic governor's appointees were Republicans, and they may hold over. Some of the Johnson men have said that they would resign. So far, however, Frank Day, Governor Johnson's private secretary, alone has made a definite announcement.

Japs Herded With Pigs.

Victoria, Sept. 28.—Captured by the Russian cruiser Shilka, in an attempt to make a sealing raid on the Skli island seal rookeries, three Japanese seal hunters of the crew of the Japanese sealing schooner Hosen Maru, have returned to Japan, being released according to information brought by the steamer Empress of China, which arrived last night. The report is that the arrested seal poachers were thrown into an outbuilding on Copper island, containing a number of cows and pigs, and were imprisoned there for 13 days.

Hardshakes Are Tabooed.

Sacramento, Cal., Sept. 28.—Harry M. Moffitt, chief of secret service on the Pacific coast, is in Sacramento consulting with Chief of Police Sullivan concerning the handling of crowds when President Taft visits this city on October 4 and talks at Capitol park. Moffitt says orders have been received from Chief Wilkie that no public handshaking will be allowed here. Crowds will be kept at a safe distance from the nation's chief.

Shipwrecked Men Return.

Victoria, B. C., Sept. 28.—Seven survivors of the Japanese schooner Hykuman Maru, given up long ago as lost, returned to Hakodate shortly before the departure of the Empress of China, which arrived here last night. Their schooner went ashore in the Kuril islands August 25, last year.

FARMERS' CORNER.

When Hayling is Done.
There's a smile of relief and a spirit of fun Comes over the farmer when hayling is done; With his haylofts all swelling with sweet-scented hay His smile is as cheery as sunshine in May. The summer's half over, and out in the field He sees the approach of a bountiful yield; As tall as his hat is the golden-topped corn, Which waves its long arms in the breeze of the morn. As fair and as fragrant as gardens of old Are his fields with their stubble as yellow as gold.

With his barn full of hay and his bedding stacked high, A smile on his face and a gleam in his eye; The cattle provided with winter rest, While apples and pumpkins are ripening fast, There's a smile of relief and a spirit of fun Comes over the farmer when hayling is done; The turnips are growing, the melons are prime, The harvest approaching, his bounteous time. Ah! Lucky the farmer who wanders afield And sees the approach of a beautiful time.

—Boston Herald.

Cultivation of Corn.

At the several experiment stations corn has received more than its share of attention, and many experiments have been made in order to learn how to derive the largest yields and to grow the crop most economically. Opinions differ, however, as to climate, variety and soil are factors governing every crop. The Indiana station found that the best results were obtained by planting seed in May. It has been shown that the greatest average yield of both ears and stocks have been obtained when the stalks stood about twelve or fourteen inches apart in the rows. Threshing planting, however, requires the size of the ears, and the percentage of grain, but thick plantings, in dry seasons, produced the heaviest yield of stalks and the highest yield of ears. So far as depth of cultivation is concerned, the yields, when corn was cultivated one, two and three inches, have been equal. In continuous corn culture heavy applications of fresh horse manure have not been profitable, but the effect of a very heavy application of manure has been noticed for many years.

There does not seem to be much difference in yields due to any particular method of using, white hill and drill plantings of corn have produced the same average yields. The "checking" of corn is still the most popular and profitable mode of growing the corn at the least cost of labor. The results at one station may not correspond with those obtained elsewhere, but where the work has extended over a number of years the results should be accepted as important, if not conclusive.

A Yard Scraper.

Besides its use in the barnyard, this is handy for covering potatoes, leveling rough ground, filling ditches, etc. It should be made of 2-inch lumber, and hard wood if possible; the scraper should be 6 to 8 feet long, and 2 feet high; its life will be prolonged if

Pasturing Sheep.

Some writers claim that sheep ought not to be pastured on land more than one year before it is plowed and reseeded, owing to parasites, but it has been shown that sheep have been kept free from parasites by the use of tar, turpentine and salt. Bore 2-inch holes in a pine log, fill with salt and smear tar around the top, and sheep will tar their noses while eating salt. Sheep soon learn to eat tar. One sheep raiser keeps it mixed with turpentine and salt, where it is accessible at all times. About one-half pint of turpentine to one peck of salt is the proper proportion.

Electric Agriculture.

William Low of Scotland will experiment on a large scale with the application of electricity to agriculture. About twenty-three acres, divided into a number of fields, will be utilized for this purpose, each field including a non-electrified or controlled plot for the purpose of comparison. A network of wires will be run over the fields at a height of about 16 feet from the ground. The poles will be put 200 feet apart one way and 300 feet another way. By means of transformers the voltage for the network will be raised to 100,000.

The Asparagus Beetle.

The best remedy is to cut the shoots soon as they appear above ground, as the beetle attacks the tips. Many persons prefer the green tops of asparagus, but the best stalks are those cut when the tips are white, as they are then tender from tip to butt.

The Duke of Portland has the largest private picture gallery in the world. Blankets were first made in England in 1705 by Thomas Blanket.

Treating Horse Corns.

Dr. A. A. Holcombe, Inspector of the United States bureau of animal husbandry, says of treating horse corns: "As in all other troubles, the cause must be discovered if possible and removed. In a great majority of cases the shoeing will be at fault. For a sound foot, perfectly formed, a flat shoe with heels less thick than the toe and which rests evenly on the wall proper is the best. In flat feet it is often necessary to concave the feet as much as possible on the upper surface so that the sole may not be pressed upon. If the heels are very low the heels of the shoe may be made much thicker. If the foot is very broad and the wall light toward the heels a far shoe, resting upon the walls, may add to prevent excessive tension upon the soft tissues when the foot receives the weight of the body. A piece of leather placed between the foot and shoe serves largely to destroy concussion, and its use is absolutely necessary on some animals to enable them to work. Among the preventive measures may be mentioned those which serve to maintain the suppleness of the hoof. The dead horn upon the surface of the sole not only retains moisture for a long time, but protects the living horn beneath from the effects of evaporation. For this reason the sole should be pared as little as possible.

Milk Contamination.

There are a hundred and one places where milk can be contaminated from the time it is drawn from the udder till it reaches the table in the form of sweet milk, cream or butter. First, a great deal of bacteria, impurities and disease germs get into the milk at the barn or lot in which the cows are kept. Second, a great many more of these owe their existence to milk to the attendant and the place in which the milk is kept. The moment the cow shows signs of being ill, or when even a slight eruption is noticeable, a person may contract disease by partaking of her milk. Impure water is another way in which milk is contaminated. If the cow is compelled to drink out of a mud hole, filled with disease germs, she cannot help but drink a large number of those germs into her system, some of them being sure to reach her milk. Milking the cow into an open pail when the barn is filled with dust, and from which there hangs an untold number of dirty cobwebs, or milking her in an offensive smelling lot, where the filth is ankle deep, or milking a cow whose udder, flanks and legs are covered with dirt and filth—in such cases it is impossible to avoid contamination of the milk. It is believed that more disease germs are given the human family through milk than are given in any other agency; and we also believe that less attention is paid to the care of milk than to any other food consumed upon the table.

Cooling Cream.

Different conditions on the farm will govern arrangements for the cooling of cream. Where windmills are used, many farms have cheaply constructed milkhouses in which can be placed a tank or half barrel, through which all water is led from the windmill to the stock watering tanks. With the cream cooled and held in these tanks the arrangement is everything required.

Where windmills and milkhouses are not used, a half barrel can be set near the pump and a cheap shade constructed. The water can be pumped by hand with small expenditure of time and labor. The cooling of the cream will heat the water. Run out the warm water and pump a fresh supply in which the cream can set over night or through the day before being added to the supply can. When another lot of warm cream is to be cooled, the operation can be repeated. A large box can be set over the barrel to protect the cream from the sun. The farmer's ingenuity may suggest some other protection equally as good.

There are a dozen or more arrangements, inexpensively and easily made, which can be devised on every farm for the proper care of cream. These remarks suggest only the principle of keeping the cream in good condition.

Secours in Calves.

A stockman claims that when calves 3 or 4 years old become sick and die with scour it is due to indigestion, apparently, and yields to treatment with pepsin if taken in time. A teaspoonful twice a day given in a little warm milk after feeding will cure it, and if given when the calf is born, and continued for a few days, will prevent it. The pepsin is the common kind sold in drug stores, and can be purchased by the pound.

Lack of Water Lessens Milk Flow.

Don't let the cows shift for themselves in the matter of water. They must have all they want of such a temperature as will induce them to drink enough to supply their needs. Many a cow "falls down" in her milk production because she is starving for water, the water being either difficult of access or too cold to be palatable.

Special Bee Sense.

Gaston Bonnier affirms that the ability of bees to fly straight to their hives from a distance as great as two miles it not due, as some have believed, to either sight or smell, but to a special sense of direction possessed by bees. M. Bonnier bases his belief in the existence of this strange sense, which would be extremely useful to man also, on a series of experiments with homing bees. He does not know in what organ the sense is located, but he says that, at any rate, it is not in the antennae.

CASTORIA

The Kind You Have Always Bought has borne the signature of Charles H. Fletcher, and has been made under his personal supervision for over 30 years. Allow no one to deceive you in this. Counterfeits, imitations and "Just-as-good" are but experiments, and endanger the health of Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

The Kind You Have Always Bought Bears the Signature of

Charles H. Fletcher
In Use For Over 30 Years.

THE CENTAUR LAMP, 27 MURRAY STREET, NEW YORK CITY.

The Safe Side.
"May I ask you a question?"
"Sure, stranger."
"Why is everybody in this section mixed up in a feud?"
"Well, nobuddy keers to take chances on being an innocent bystander."
—Louisville Courier-Journal.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Belted by Comparison.
The Shah of Persia was asked if a pension of \$25,000 would be satisfactory.
"And with Mrs. Howard Gould getting \$35,000?" he queried, peevishly.
"Not on your tin type!"—Philadelphia Ledger.

A good honest remedy for Rheumatism, Neuralgia and Sore Throat is Hamlin Wizard Oil. Nothing will so quickly drive out all pain and inflammation.

He Must Slip Some Time.
Mrs. Crawford—You must have your husband dearly if you save all the letters he sends you while you're in the country.
Mrs. Crabshaw—I'm keeping them for comparison, my dear. I'm sure to catch him in a lie.—Judge.

You Can Get Allen's Foot-Ease FREE.
Write Allen S. Olmsted, 140 N. Y., for a free sample of Allen's Foot-Ease. It cures sweating, hot swollen, itching feet, makes new or tight shoes easy. It makes corns, ingrowing nails and bunions. All druggists sell it. 25c. Don't accept any substitute.

Absent Minded.
"Wilkins is the most absent minded cuss I ever met."
"How so?"
"Why, the last time he got into the barber's chair he planned the newspaper around his neck and began to read the towel."
—Philadelphia Record.

SOUR STOMACH

"I used Cascarets and feel like a new man. I have been a sufferer from dyspepsia and sour stomach for the last two years. I have been taking medicine and other drugs, but could find no relief only for a short time. I will recommend Cascarets to my friends as the only thing for indigestion and sour stomach and to keep the bowels in good condition. They are very nice to eat."

Pleasant, Palatable, Potent, Taste Good, Do Good, Never Sickens, Weakens or Grips. 10c, 25c, 50c. Never sold in bulk. The genuine tablet stamped C. C. C. guaranteed to cure or your money back. 505

CRESCENT

CRESCENT MFG. CO.
MAKERS OF MAPLE, (Better than Maple).
CRESCENT BAKING POWDER

Every Man Read This

This treatment is said to have acquired a wonderful reputation throughout the East, owing to its peculiar propensity to fortify the nervous force and generate health and a consequent personal magnetism, so essential to the happiness of every normal human being. It is said to be a blessing to those who are physically impaired, dizzy, dependent, nervous, and who have trembling of the limbs, dizziness, heart palpitation, cold hands and feet, insomnia, fear without cause, timidity in venturing and general inability to act rationally as others do. Also of vast benefit to writers, professional men, office workers and the victims of society's late hours and over-existence in wines, liquors, etc.

By preparing the treatment at home secretly, no one need know of another's trouble, while the ingredients are much used in filling various prescriptions, so that even the purchase of them separately need occasion no timidity.

If the reader decides to try it, get three ounces of ordinary syrup sarsaparilla compound, and one ounce compound fluid for salivary; mix and let stand two hours; then get one ounce compound essence cardui and one ounce tincture codliver compound (not cod liver); mix all together, shake well and use a teaspoonful after each meal and one at night.

This contains no opium whatever, and may also be used by women who suffer with their nerves with absolute certainty of prompt and lasting benefits.

C. Gee Wo

The Chinese Doctor
This wonderful man has made a life study of the prevention of Rheumatism, Gout, Herbs and Barks, and is giving the world the benefit of his secret.
