His many Mosier friends regret to see his departure from our midst, but all join in wishing him abundant success wherever his field of work should be.

It is not surprising that people living several thousand miles from Mosier do not know that such a place is on the map. Even these "benighted heathen" are being educated; but what shall we say of a conductor and trainmen on the main line of the great Harriman system who informed some recent arrivals here that they didn't know where Mosier was? These railroad men pass thru Mosier probably three times a week on their regular runs, but they had to inquire at Pendleton for the location of Mosier. What?

Booster Meeting

Don't forget the meeting of the Commercial Club in Stroup's Hall tomorrow evening, August 13th. It is the duty of every citizen of Mosier district to attend this meeting and assist in making it a success, for it is only through the united efforts of ALL that good can be accomplished for our community. While the Commercial Club may take the initiative and start the ball rolling, so to speak, yet, without the co-operation, support and good will of the people at large they can do little, and their mightiest efforts will be in vain.

Every resident of these Mosier Hills wishes, or should wish, to see the district grow and advance rapidly to the front ranks, to witness the incoming of desirable people to settle on the unoccupied lands, to watch Mosier grow and progress so that the trainmen, and all the country, will know we are on the map; and by the combined energies of everyone directed towards these ends they can be accomplished. The satisfaction of having been instrumental in so good a work is no small factor.

Arrange your affairs so that you can be present at this meeting tomorrow evening, and go there determined to assist in every possible way for the advancement of Mosier.

Was It a Miracle?

Last Tuesday's Telegram contained an article of particular interest to Mosierites, concerning Dr. W. S. Nichol, of Portland, a brother of C. Nichol, of this place.

Dr. Nichol was one of a party of about twenty-three who attempted to scale Mt. Hood last Sunday. During the ascent the Dr. lost his footing and fell, striking against a rock and bouncing into a crevasse, a distance of about 800 feet. The remainder of the party were horror-stricken but rushed to his assistance as rapidly as possible, expecting to find him seriously injured if not killed. What was their surprise when on reaching the spot they saw him crawling out and picking himself up, seemingly none the worse for his adventure. While he was bruised and scratched to some extent his injuries were slight, unless later developments should prove to the contrary.

Dr. Nichol is a large man, probably tipping the scales at 280. The fact that he was so little injured seems almost like a miracle.
