Slap on the Wrist.  
Tightwad—Did you ever notice, my dear, that nearly all these misers reported in the papers are single men?  
Mrs. Tightwad—Yes; but that's only natural. Married misers are too common to be worth mentioning.

The Real Point.  
Pay a little attention to discouragements as possible. Plow ahead as a steamer does, rain or shine, rough or smooth. To carry your cargo and make your port is the point.—Mattie D. Babcock.

### Slightly Modified.

Little Viola had developed the habit of holding her thumb in her mouth even while eating. Mother had resorted to all sorts of methods to correct the child and finally in desperation said:  
"Viola, the first thing you know you will swallow your thumb, and these what will you do?"  
"Well, mother, I should hate to swallow it because I'd have a heaven of a time without it."  
"Why, Viola," said the astonished mother, "where did you hear an expression like that?"  
"Well, well," hesitated the little girl "I didn't hear it exactly like that, mother, but I thought it would sound better."

### A Mosquito Proof Steamer.

The Jonathan Holt, the first ocean going mosquito proof steamer, has arrived in the Moray, says the London Times. She is the first ship of special design for the Liverpool West Africa trade. Professor Major Ronald Ross's recommendations have been carried out by the owners for mosquito proofing all living quarters. Copper gauze fittings are provided for all doors, windows and passages to prevent the malaria bearing mosquito entering.

### Proof of Germs on Lips.

Mr. Stephen Paget, at the School of Economics, London, England, exhibited a piece of gelatine that had been kissed by a man with clean lips, and pointed out that germs had grown quickly over the parts touched by the lips. One could not, he said, even kiss the surface of gelatine without producing the outline of one's lips in germs.

Life-like.  
"What a noisy thing that bass drum is!" remarked the clarinet, disgustedly. "Yes," replied the trombone, "just like a human being, isn't it?" "Like a human being?" "Yes, it's the one with the big head that makes the most noise."—Scraps.

### APPETITE GONE --BEWARE

It is a sure sign of some inward weakness when the appetite commences to lag and you have that "don't care" sort of feeling at meal-time. It is something that needs immediate attention, for neglect only brings on more trouble and often a long illness. Restore the appetite and keep it normal by the use of Hostetter's Stomach Bitters. It is for Poor Appetite, Indigestion, Dyspepsia, Costiveness and Malaria.

### Why He Carried the Lantern.

A blind man in Khoota (a Caucasian village) came back from the river one night, carrying a pitcher of water and carrying in his hand a lighted lantern. Some one, meeting him, said: "You're blind; it's all the same to you whether it's day or night. Of what use to you is a lantern?" "I don't carry the lantern in order to see the road," replied the blind man, "but to keep some fool like you from running against me and breaking my pitcher."

### TAFT WOULD LOCATE LEAKS

Systematic Effort Will Be Made to Cut Down Expenses

President to Find Out Truth of Aldrich's Statement That \$300,000,000 Can Be Saved.

Beverly, Mass.—A force of experts will be put to work shortly in the departments of the government at Washington to locate the "leaks". Taft wants to know how much of the \$300,000,000 that Senator Aldrich says he could save the government by conducting it on business lines can really be saved.

If it is possible to conduct the government on the lines of a well-run business establishment, the president wants to know it. If not, why not. Every department is to be gone through minutely. The wastes are to be noted, lost motion located, duplications marked and a rational economy made the watchword.

At a meeting of the cabinet, which has been called for September 24, and which will be succeeded by a series of such meetings from day to day, for a week, the matter of economy will be one of the subjects discussed. The president is looking to the development of some practical plan whereby the end which he has in view may be accomplished.

After the manner in which he went about selecting a stocks and bonds commission, the president is proceeding carefully in the organization of such a corps of experts that will enable him to get the best results with the \$100,000,000 appropriated by the last congress. He already has had experience in forcing economy in the executive departments of the government.

He lopped off \$100,000,000 from the navy estimates last year, without injuring the standards of the navy, and the army establishment underwent a similar cut. He has enforced economy in other departments, and is constantly urging upon members of his cabinet the necessity for holding down their expenditures.

So far as is possible, it is desired to get some capable and efficient officials in each of the departments to offer a comprehensive plan for reform. It is not meant that his man shall be a spy. But from his experience in the department it is believed he ought to be able to point out where there are duplications, waste or other loose business methods.

Gold Bullion From Alaska Replaced By Lead Bars.

Seattle—Gold bullion valued at \$57,500, part of a shipment of \$170,000 from the Washington-Alaska Bank of Fairbanks, Alaska, to the Dexter-Hairton national bank of Seattle, on the steamship Humboldt, was stolen in transit and lead substituted in the strong box that had contained the bullion.

The gold when it left Fairbanks on a Yukon River steamer for Dawson and White Horse was contained in three wooden boxes and was in care of the Alaska-Pacific Express company. When the boxes were opened by the Canadian customs officers at Dawson the gold bars were found to be as stated in the express company's papers.

The boxes were opened again at the United States assay office in Seattle, and one contained pigs of lead, not of gold. The seals of the box were intact when it reached the office, and it was evident that the robbery had been committed by removing one end of the box. The gold was insured against loss by the express company.

### Reverie.

Reverie, like the rain of night, restores color and force to thoughts which have been blanched and wearied by the heat of the day. With gentle fertilizing power it awakens within us a thousand sleeping germs and, as though in play gathers round us materials for the future and fancies for the use of talent. Reverie is the Sunday of thought, and who knows which is the more important and fruitful for man, the laborious tension of the week, or the life-giving repose of the Sabbath—Amiel's Journal.

Were Well Taught.  
The children of an infant school in Wales are taught very much by signs. The hand of the teacher sloped signifies "oblique"; the hand held flat, "horizontal"; the hand upright, "perpendicular." One of the Welsh bishops was preaching one day in behalf of the school, when, observing several children whispering together, he held his hand upright in a warning manner, meaning thereby to impose silence, on which almost the whole school, in the midst of the sermon, shouted out, "Perpendicular!"

Mother will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

To a Certain Sweet Extent.  
"Do you wholly trust me, darling?" murmured the young man to the fair creature who was sitting beside him on the front seat of the trolley car.  
"I do to a certain extent," she responded after a little hitch of hesitation.  
"What extent?" he asked, anxiously.  
"Why," she explained, "I would trust you to the extent of not being afraid of there being any poison in a box of candy you might send me by mail."

Truly Wonderful Alarm Clock.  
A few years ago the French government acquired by purchase from a private collection a wonderful alarm clock which was once the property of the great Napoleon and which not only tells the time of day, but, as well, the day, the month, the year, the mean solar time, the phases of the moon, and indicates, in addition, the quarter hours. Its attachments also include a thermometer.

Set Age Limit on Marriage.  
According to Russian law no man or woman who has attained the age of eighty can contract a legal marriage. No other country nowadays imposes such a restriction. In ancient Rome, however, legislation on this point was even more stringent, the maximum age limit for men being sixty and for women fifty.

Delicate Irony.  
Makart, the great Viennese painter, was lectured to a fault. It is related of him that once at a dinner party he sat next to Mme. Gallmeyer for a whole hour without uttering a syllable, when his fair neighbor playfully nudged him with her elbow and said: "Come, Herr con Makart, let us change the conversation."

Teach Obedience.  
Let children understand that disobedience is sure to be followed by punishment. A child seldom disobeys Nature more than once in touching a hot lamp-glass. It will soon learn to obey you as well. Never allow it to ask why. You know; that is enough.

Physical Powers of Insects.  
Ants will carry loads 40 or 50 times as heavy as themselves. The beetle can move a weight 112 times his own weight. The house fly gives 600 strokes of its wings in one second, and this enables it to get a distance of 35 feet.

Useful New Substance.  
"Resinite" is the name of a new substance invented in Germany, useful as a substitute for celluloid and ivory. It renders wood, paper and pasteboard impenetrable and makes pine, for example, so hard that it rapidly dulls a planer.

### Children Joined in Wedlock.

Briton Ferry, in Glamorganshire, England, claims to hold the record for juvenility in marriage. Quite recently a man of fourteen years married a woman of less than thirteen, and now a youth of twenty-six has married a wife of twelve and a half. She went on her honeymoon in a short frock and traveled at half fare!

Belgium's Fine Sea Front.  
The sea front of Belgium, which extends about 40 miles, stretching from Holland to France, is paved almost entirely for the entire length, and forms one huge, wide ocean boulevard. And this, by the way, is the most productive of public works in the kingdom.

The Last Straw.  
John Smith fell down the cellar stairs the other day and broke his left leg, his right arm, two ribs, his nose, one finger, and cut his scalp, sprained his ankle, and put his shoulder out of joint. But he didn't really begin to feel bad until it till his wife asked him if he was hurt.—Exchange.

Where Appetite is Keen.  
A day's rations for one man on a sledge journey across the Polar sea consists of four ounces of condensed milk, one-half ounce condensed tea, one pound pemmican, three ounces (liquid) petroleum oil, three ounces (liquid) pure alcohol, one pound ship's blaudet.
