Caleb followed his son out and across the yard to the old log homestead which served as the superintendent's office and laboratory. When the door was shut he dropped heavily into a chair. "Son," he said, brokenly, "you're-

you're crazy-plum' crazy. Don't you ow you can't do the first one o' these things you've been promisin'?" Tom was already busy at the desk,

emptying the pigeonholes one after an-other and rapidly scanning their contents.

"If I believed that, I'd be taking to the high grass and the tall timber. But don't you worry, pappy; we're go-ing to do them-all of them."

"But, Buddy, you can't sell a found of foundry product! We may be able make pig cheaper than some others, but when it comes to the foundry or, South Tredegar can choke us off in less'n a week."

gave him his first hint of the inward-"Walt," said Tom, still rummaging. "There is one thing we can make-and ness. "I'd like tolerable well to know what that's at the bottom of it." he said to

Tom, over a grill-room luncheon at the Mariboro one day. "It takes money to It is," was the hopeless rejoinder. "You ought to know, better than any It's cast-iron pipe-water one else. Where are the plans of that invention of yours that Farley wouldn't let you install?"

Caleb found the blue-prints, and his hands were trembling. The invention, a pit machine process for molding and casting water- and gas-pipe at a cost that would put all other makers of the commodity out of the field, had been wrought out and perfected in Tom's second Boston year. It was Caleb's one ewe lamb, and he had nursed it by hand through a long preparatory period.

Tom took the blue-prints and spread them on the desk, absorbing the details as his father leaned over him and pointed them out. He saw clearly that the invention would revolutionize pipemaking. The accepted method was to cast each piece separately in a floor flask made in two parts, rammed by hand, once for the drag and again for the cope, with reversings, crane-hand-lings and all the manipulations necessary for the molding of any heavy cast-But the new process substituted ing. machinery. A cistern-like pit; a circular table plyoted over it, with a hun dred or more tron flasks suspended upright from its edges; a huge crane car rying a mechanical ram, these were the main points of the machine which, with a small gang of men, would do the work of an entire foundry floor.

"It's great!" said Tom, enthusiasti-"I got your idea pretty weil cally. from your letters, but you've improved on it since them. I wonder Farley didn't snap at it."

"He was willin' to," said Caleb, grim-18. "Only he wanted me to transfer the patents to the company; in other words, to make him a present of the controlling interest. I bucked at that, and we come near havin' a fall-out. If there was any market for pipe now

"There is a market," said Tom, hopefully. "I got a pointer on that before I left Boston. Did I tell you I had a little talk with Mr. Clarkson the day I came away ?"

"Well, I did. I told him the conditions and asked his advice. Among down at Gordonia late in the afternoon. other things, I spoke of this pipe pit of There was no one at the station to ago I shut down on lending tyours, and he said at once.
