Remedies for Seasickness.

Among curious remedies for seasickness is that which is popular among the mariners in the Levant—the daily swallowing of iron rust, which is obtained by scraping it off the anchor or anchor chain. But this is only part of the necessary treatment, for a small pouch containing roasted salt and flowers of thyme must be tied upon the abdomen as firmly as can be borne—this being considered to counteract the effects of the internal disturbance caused by the rolling of the vessel.

Loss of Appetite

Is loss of vitality, vigor or tone, and is often a forerunner of prostrating disease.

It is serious and especially so to people that must keep up and doing or get behindhand.

The best medicine to take for it is the great constitutional remedy

Hood's Sarsaparilla

Which purifies and enriches the blood and builds up the whole system.

Get it today in usual liquid form or chocolated tablets called **Sarsatabs.**

Loose Shoes.

Quite as bad as too tight shoes, against which we are always warned, are too loose ones; they cause corns and bunions and often produce flattening of the arches. The woman with the peculiarly shaped foot who cannot get shoes exactly to fit her except when made to order, should get them a little too long rather than a little too wide; it is the lesser of two evils.

Cattle From the Sahara.

The cattle raised on the fringe of the Sahara are known to be of good quality and are estimated at 2,000,000 head. With a little scientific feeding during the dry season their numbers might rapidly be increased and the Soudan region might become a sort of second Argentina.

MEXICANS SHOOT DOWN RIOTERS

Soldiers and Police Pour Hot Shot Into Mobs.

Total Killed at Zacatecas May Reach 500—Town in State of Terror Under Martial Law.

El Paso—One hundred persons were killed in riots which took place at Zacatecas, in the interior of Mexico, Saturday night, according to reports received here.

Soldiers fired into a struggling body of rioters with disastrous effect.

One hundred is the lowest estimate of the loss of life, which may reach 500.

A dispatch from Del Rio, Texas, on the Mexican border, 250 miles east of here, states that rumors are current of a fight which is supposed to have taken place near there early Sunday night between Americans and Mexicans.

Reports that bands of Mexicans have crossed the river at different points cannot be verified. County officers and United States river guards state that they have no positive information of trouble, but have heard rumors of an invasion and attack at different points.

Upon what is regarded as good authority, it is learned that Brigadier General Hoyt, commanding the department of Texas, has been instructed from Washington to hold troops in readiness for service on the Mexican border.

Francisco Madero, father of the alleged Mexican revolutionist leader, made denial to what purported to be interviews with him, sent out from this city last night. The elder Madero was quoted as asserting that certain members of the Mexican senate were in league with his son. He gave out no interview, he said.

IRRIGATION GOOD FOR ALL.

Secretary Wilson Says Humid as Well as Arid States Must Come to It.

Chicago—Hundreds of "back to the soil" boomers were present when the land show opened here Saturday. Fruit and other products of the soil from all parts of the country were on display. An exhibit of more than a million apples was the feature of the exhibition. Elaborate plans for the entertainment and instruction of visitors and delegates have been made. Special days have been assigned to various states. Among other attractions will be the giving away by lot of farms in different states. Secretary of Agriculture James Wilson delivered the opening address, taking "Irrigation" as his theme. "The day will come," he said, "when irrigation will be applied, as a matter of national necessity, to growing crops in the humid regions. The thing has been done in Europe for hundreds of years, and we must come to it out here sooner or later. We must begin at the source of our rivers and construct reservoirs so that the supply will be steady and not entirely dependent upon the caprice of the season.

COLLEGE DECLINE FEARED.

Professors Unable to Live Unless Higher Salaries Are Paid.

Boston—Unless immediate steps are taken to remedy the great discrepancy now existing between the cost of living and incomes provided college professors, the status of American colleges will rapidly decline, is the prophecy of President Hamilton, of Tufts college, and President Faunce, of Brown university.

Fourteen have left the Brown faculty in the last two years. President Faunce says:

"The cost of living in Providence has enormously increased. Our professors, unable to withstand the strain of increased cost of bare necesities of life, are leaving Brown and going elsewhere."

Revolt Fails to Develop.

Mexico City—The insurrection which was said to have been planned for Sunday against the government of Mexico failed to materialize.

Sunday passed without unusual incident and while the authorities have not relaxed their vigilance, is it believed no further trouble will occur.

Special dispatches received here from many places, including Vera Cruz, Puebla, Pachuca and Orizaba, said that everything had been quiet all day in these cities. Two suspected mine bosses were arrested in Pachuca.

Custom Frauds Charged.

New York—Isaac and Manning Phillips, members of the firm of I. & S. Phillips, importers, at 18 West One Hundred and Eightieth street, were arrested, charged with defrauding the government out of duty on woolen wearing apparel imported from France, by means of false consular invoices. The govenment is in possession of evidence concerning a number of alleged fraudulent importations by the firm. Bail was fixed at $10,000 for each prisoner. This was furnished. It is believed the frauds are extensive.

Another Outbreak Occurs.

Laredo, Tex.—Fighting occurred at Guerrero, Mexico, Sunday. Reports reaching Laredo are that an outbreak took place in that village, in the state of Coahuila, and that the Federal troops are in control exercising martial law. Guerrero is about 50 miles from Cotulla, Tex., in a western direction and is in the district to which Francisco I. Madero, the alleged revolutionist, was making his way when he was last seen in Texas.

Johnstone Laid to Rest.

Kansas City—Funeral services were held here Sunday for Ralph Johnstone, the aviator who plunged to death during a spectacular flight at Denver Thursday afternoon. The services were held at Trinity Episcopal church and were attended by throngs who had known the daring aviator in life. Wilbur Wright and Walter Brookins were present at the funeral and attended the interment.

BULL ON A RAMPAGE

MAKES WEARER OF HOBBLE SKIRT HUNT TALL TIMBER.

Animal Chases Autoists and Tosses Up Girl With Freak Gown—Fair Feminines Climb Trees and Jump Fences.

Pottstown, Pa.—A pretty girl automobilist in a big mushroom hat and a hobble skirt had a lively experience with an infuriated bull over in Chester county in the vicinity of Buck. She was one of a gay party of six, evenly divided as to sex, who had come up from Philadelphia in a large touring car, and acting on the suggestion of one of the men, that a stretching would do them all good, they got out.

The three girls, charmed by the rugged beauty of the landscape and anxious to get some wild flowers growing on a slope of the Chestnut hills, ventured forth. Their course lay over a field in which some sleek cows and an innocent-looking bull were browsing.

The girl wearing the mushroom hat with its gay Parisian trimming lingered some distance behind her companions, and the bull saw her and got busy in a twinkling. With a whisk of his stubby tail and a snort and loud bellowing, he charged.

One of the girls in the lead quickly hurdled a fence, while the other sprinted to a tree and clambered up.

But she who had excited the ire of the bull seemed doomed. She moved as fast as she could with the handicap of her hobble skirt, and realizing that her mushroom hat had put the bull into action she adopted the strategic movement of casting it aside. It worked, and her enemy stopped long enough in his pursuit to make it look as if it had been in a cyclone. Then he charged again, and the girl's safety hinged on the question whether she or the bull reached the fence first. She made it twenty feet ahead of the beast; but that hobble skirt was a dead weight to her free movement.

As she reached the third rail the bull came up, and a wicked jab of his horns sent her to the other side. Only a few bruises and some rent garments resulted.

"For goodness' sake, don't tell him who we are!" exclaimed the three girls in chorus when a passerby got inquisitive; and even the license tag was taken off the auto to destroy any clew to their identity.

LIZARDS SCARE STEVEDORES

Ugly Reptiles Send Men Flying, but Norwegian Workers Do Not Fear Them.

New York.—Battle-ax lizards routed an army of stevedores from the deck of the British steamer Parisiana. They had hardly begun taking out the bales and cases from the open hatch when one of the men caught sight of a battle-ax and thought he had seen the devil in person, for it must be understood that a battle-ax lizard is about the ugliest reptile on earth. His yells drew the attention of the other workmen, and one look was enough for all of them.

The stevedores carried the officers off their feet in their mad rush for dry land and nothing could induce them to return to work. Some Norwegians were found who were not afraid of battle-axes or anything else and the work of unloading the ship proceeded.

The lizards were brought on board at Calcutta by a dealer who wanted to consign them to New York, but nobody wanted to assume the care of them. The bamboo cage in which he carried them came apart and they escaped into the hold.

HOUND HEEDS CALL OF WILD

Dog Raised in Captivity Now Leads Coyotes and Returns to Civilization to Steal Chickens.

Portland, Ore.—A grayhound raised by Martin Smith of Sandy has answered the call of the wild and has become the leader of the wildest band of coyotes that community has known for many years.

The hound never returns to the village except to steal chickens or other forage, and residents believe that its knowledge of surroundings has made the varmints it leads much more effective thieves. Several persons have seen the hound this fall and its especial companion is a large coyote. The hound pays no heed to the calls that formerly summoned it from chasing game of any kind. The dog was known in the village from a puppy.

Bible 300 Years Old.

London.—The three hundredth anniversary of the authorized King James version of the Bible will be celebrated in 1911, when arrangements will be made for special services and sermons and there will also be an exhibition of the English Bible.

Hen Lays Her Egg Flat.

Athens, Pa.—Athens is to the front with a hen which lays flat eggs. This peculiarity is accounted for by the fact that when she was driven from an irate neighbor's garden she escaped through a picket fence so narrow that in making her exit she nearly had the life squeezed out of her.

An effort to hatch these eggs, laid since her predicament, has proved futile, owing to the inability of the mother hen to turn them during incubation.

Poultry dealers declare the flat egg is one on them, but believe the same effect may be produced by equipping hens with corsets properly laced. Flat eggs would be much safer carried in the pocket, anyway, as they would take up less space. They could be piled up in transportation.

World War on Cholera.

Paris.—The International Bureau of Public Hygiene has recommended the calling of an international sanitary conference to combat the cholera epidemic.

Costly Articles.

The most costly book in the world is a Hebrew Bible, owned by the German government, which a few years ago refused the Pope's offer of $125,000 for it. The most costly medicine a few years ago was metallic gallium, which sold for $150,000 a pound; but radium is now the priceless gem of the mineral world, selling for more than that price an ounce.

Human Life as National Resource.

The gradual lowering of the death rate is one of the great achievements of science and civilization. Conservation of life is the most important of the many current projects for conserving national resources. But human life is still held far too cheap and methods of checking waste are still more or less rudimentary.

Anxious Father's Advertisement.

A Frenchman's advertisement, in a Boston paper, ran in the following singular strain: "Lost, last evening; a child about five years old; whoever will return him to his home, in Fore street, shall be handsomely rewarded by his afflicted father, Jean Baptiste, who likewise deals in French brandy."—From a London Newspaper, 1807.

Strange Hobby.

William James, probate court deputy, tells of a pest extraordinary that comes about that office. She is a woman, a middle-aged, heavy jowled person, who comes around shortly after she has read in the paper of the death of a prominent man. And she comes because she wants to read the dead man's will as soon as it is probated. She has no hopes of receiving a bequest in any of the wills. She just likes to look them over. Reading wills is her hobby.—Cleveland Plain Dealer.

Liberia.

Liberia, the West African negro republic, was founded mainly through the efforts of American quakers, organized under the title of the Pennsylvania Colonist society. The chief bar to the development of Liberia is a law by which white men are not allowed to hold property in the country. Capital has, therefore, gone elsewhere and Liberia possesses none of the resources of modern civilization.

Bulls Haul Street Cars.

Four miles of street railway and some bulls are making a rich man out of a resident of Daet, in the Philippines. The little railroad runs from Daet to the port, and has no lack of passengers or of freight traffic. The cars are of the small street railway type, and they make the four miles uphill from the port to Daet in twenty-eight minutes, although the bulls who draw the cars do not exert themselves unduly.

For Business Use

There are a great many places and occasions when the possibility of getting extra heat immediately effects an economy by decreasing the discomfort of the worker. In the office, in the early morning or late at night, before or after the steamheat is on, it is of importance to have extra heat. In the builder's outside office, in the shipping room, in the checker's shack, on exposed lofts, in railroad stations, in studios, the

PERFECTION SMOKELESS OIL HEATER

Absolutely smokeless and odorless

is often a necessity. It is safe, smokeless and odorless. Apply a match, and it gives heat quickly. With four quarts of oil it burns nine hours. Has **automatic-locking flame spreader,** which prevents the wick from being turned high enough to smoke, and is easy to remove and drop back so that the wick can be cleaned in an instant.

It has a cool handle and a damper top. An indicator always shows the amount of oil in the font. The filler-cap it is put in like a cork in a bottle, and is attached to the font by a chain.

The burner body or gallery cannot become wedged, because of a new device in construction, and consequently, it can always be easily unscrewed in an instant for rewicking.

The Perfection Oil Heater is finished in japan or nickel. It is strong, durable, well made, built for service, yet light and ornamental.
