

# OWES HER HEALTH

## To Lydia E. Pinkham's Vegetable Compound

Scottville, Mich.—"I want to tell you how much good Lydia E. Pinkham's Vegetable Compound and Sanative Wash have done me. I live on a farm and have worked very hard. I am forty-five years old, and am the mother of thirteen children. Many people think it strange that I am not broken down with hard work and the care of my family, but I tell them of my good friend, your Vegetable Compound, and that there will be no backache and bearing down pains for them if they will take it as I have. I am scarcely ever without it in the house."

"I will say also that I think there is no better medicine to be found for young girls to build them up and make them strong and well. My eldest daughter has taken Lydia E. Pinkham's Vegetable Compound for painful periods and irregularity, and it has always helped her."

"I am always ready and willing to speak a good word for the Lydia E. Pinkham's Remedies. I tell every one I meet that I owe my health and happiness to these wonderful medicines."

—Mrs. J. G. JOHNSON, Scottville, Mich., R.F.D. 3.  
Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and to-day holds the record for the largest number of actual cures of female diseases.

**Industry in Switzerland.**  
Dairy farming constitutes an important industry in Switzerland. The production and handling of large quantities of milk, consumed in numerous chocolate factories and milk-condensing concerns in the confederation, the domestic consumption of milk, butter and cheese and the manufacture of these for export engage the attention and services of a large number of people.

**Shake Into Your Shoes**  
Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, sweating feet. Makes new shoes easy. Sold by all Druggists and Shoe Stores. Don't accept any substitute. Sample FREE. Address: A. S. Clinch, Le Roy, N. Y.

**Depends on Crops.**  
The financial barometer rises or falls with assurance of promise of greater or lesser crops. With large crops every interest of manufacturers, trade, transportation and commerce are active with promise of general prosperity, and with private interest should be able in any manner to obtain preference or advantage over at industry upon which the prosperity of all great interests are so largely dependent.

Constipation causes many serious diseases. It is thoroughly cured by Doctor Pierce's Pleasant Pellets. One laxative, three for cathartic.

**Never an Overproduction.**  
So long as there are thousands of poorly nourished and underfed men, women and children in every large city, many of whom are sustained by charitable aid, there can be no overproduction of foods. In every large city there is an enormous underconsumption not only of foods, but of other necessities that are having a serious effect upon the best development of cities.

**Threshing Machines.**  
The fall was the only instrument formerly used for threshing grain. The Romans used a machine called the tribulum—a sledge loaded with stones or iron, drawn over the grain sheaves by horses or oxen. The first machine attempted in modern times was invented by Michael Menzies at Edinburgh, about 1732. Another was invented in 1776. It is only within the past thirty-five years that the threshing machine was brought to anything like perfection.

**Beating the Bachelor.**  
In Sicily the first tree is unknown as a Christmas adjunct, but the very ludicrous custom of "beating the bachelor" is observed by the women. All of the unmarried men in the village are driven into the church after mass by the outnumbering women and run about the sacred edifice and beaten until they will wed (often falsely) that they will wed another Christmas come around.

**Specialized Farming.**  
Miss Jessie Nicholson inherited a farm of 225 acres in New Jersey, which her father had farmed in the old way. When she took it she realized that the new way to do things is to specialize, so she began to do this on the farm. She raises Canada field peas, her own hay and makes a silo, sells chickens and milk, and that is all. There are 100 cows and she puts away \$3,000 each year.

Mothers will find Mrs. Winstow's Soothing Syrup the best remedy to use for their children during the teething period.

**But Barts of Trade.**  
Cities are not the producers of wealth. They are but the marts or trading places for the products of the wealth of the earth and of labor, and for the distribution of commerce. They are not the places for homes, for they have to be continually giving way to the growth and demands for trade.

**To Polish Furniture.**  
For furniture there is nothing to equal olive oil or raw linseed oil, rubbed into the wood, according to the grain. The woodwork may require retainting as well. Ordinary old oak is always improved by rubbing it with warm beer. It should be remembered that linseed oil has the effect of darkening mahogany.

## SIRE IS HALF THE HERD.

His Importance in Producing Good Dairy Stock Underestimated.

L. P. Whitney, Former Instructor in Dairying, State Agricultural College of Washington.  
Many dairymen have given no other thought to the sire than that he was a necessity in bringing the cows to their milk. Any kind of a sire would answer this purpose, and when it came to considering the offspring, the sire was never taken into consideration. A heifer was saved from the herd because her dam was a good producer, and when perhaps no one knew or even cared from what sire she came. The poor dairy sire, then, is directly responsible for our having so many unprofitable cows at the present time.

"The sire is half the herd," is a saying, the truth of which is vouched for by all progressive dairymen, and in the using of a good, pure-bred sire on grade cows, as the great majority of the dairymen should do, he is more than "half the herd," for his characteristics are firmly fixed by continued breeding along the same lines, while those of grade cows are not, and his characteristics appear much more prominent in the offspring.

In selecting a dairy sire, the following points should be considered: (1) pedigree, (2) type, (3) type, (4) prepotency, and (5) health.

**Purity of Breeding:** Under no consideration should anything but a pure-bred sire be used. We cannot discard the grade cow, for there is but a very small per cent of the grade that are pure-bred, and they could not begin to supply the demand for dairy products, but as one sire is enough for about forty cows, and as he alone will have as much or more influence on the offspring as will the entire forty cows, it is really to meet the demand for sires from the pure-bred herds that we have and also to see that purity of breeding is of much more importance in the sire than in the dam.

**Podgers:** The men, as a rule, save the heifers from their best cows, realizing that they will make better cows than would the heifers from the poor cows. The same thing is true of the dairy sire, that is, the better his ancestry is the better he should be. First of all, one should consider the merit of his sire's mother, his dam, and also the daughters of his sire, and granddaughters. All of the females, as far back as they can be traced, should be considered. The further back continuous records can be traced the better for the animal.

**Type:** By all means, select a sire that is distinctly masculine. This is noticeable in the head and back of the animal. He should have a bold, bright eye, and a well arched, masculine neck. From the shoulders backward to the tail, the same general outline as the dairy cow, he should carry no surplus flesh, but should always be a strong, vigorous, active animal.

**Prepotency:** Prepotency is the term that signifies the power which an animal possesses of transmitting its characteristics to its offspring. Unless a dairy sire is prepotent, he is useless, no matter how fine an individual he may otherwise be. The purer the breeding the more likely he is to be prepotent, other things being favorable. The full value of a dairy sire is never known until he has sired a number of daughters, and for this reason a middle-aged bull is much better than a young one that has no descendants. A good individual should never be destroyed until he is too old for service.

**Health:** The health of the dairy sire must be given careful consideration. Any predisposition to disease makes him useless, for this would more than likely be transmitted to his offspring. He must be free from contagious diseases, as it is possible for the sire to have a contagious disease to all animals in the herd in a very short time, and extreme care is necessary in handling and caring for him.

We are facing a shortage of dairy cows in the United States and if a man expects to have a good herd of cows he must raise them rather than buy them. For this reason the dairy sire should be selected with the greatest care, and the points which have been discussed in preceding paragraphs should be carefully considered.

**On Going to Sleep.**  
How do you go to sleep? How does Mother Nature charm away our consciousness? First of all, she throws her spell on those centres of our bodies that preside over the muscular system, causing one group of muscles after another gradually to collapse. Thereafter, various powers of mind succumb in regular order. First, the sense of sight and judgement. Then memory goes, and imagination wanders away in reveries of its own ideas of time and space cease to control thought as gentle sleep—the nurse of our life—draws nearer. Then comes the turn of the special senses, beginning with sight—eyelids close and eyeballs turn upward and inward, as if to shut out all light, the pupils contracting more and more as slumber steals over us. The power of hearing and breath is drawn more and more slowly. Temperature falls by perhaps two degrees, and the body loses three times less heat than when awake.

**Coffee Cream Pie.**  
Heat one cup coffee and one cup milk in double boiler. Mix half a cup of sugar, seven level tablespoonfuls sifted pastry flour, quarter teaspoon salt, little milk (reserved from the cup), and the yolks of two eggs. Add to hot coffee and cook till thick, stirring constantly, then add walnut of butter and let it cool (covered) while making frosting of whites of two eggs beaten stiff, then add one heaping tablespoon of confectioner's sugar. Put cream in baked shell, frost and brown lightly.

**Willing to Oblige.**  
"Look here," roared the angry man who had bought a lot of suburban real-estate, "that ground you sold me is under water, and there are actually little fish swimming about."

"O, I'll fix that all right," assured the oily tongued agent.  
"Then you'll give me another lot or return the money?"  
"Not exactly that, but I'll send you out some fishing tackle to catch the fish."

## A WARNING TO MANY

Some Interesting Facts Regarding Health Statistics.

Few people realize to what extent their health depends upon the condition of the kidneys. The physician in nearly all cases of serious illness, makes a chemical analysis of the patient's urine. He knows that unless the kidneys are doing their work properly, the other organs cannot be brought back to health and strength.

When the kidneys are neglected or abused in any way, serious results are sure to follow. According to health statistics, Bright's disease which is really an advanced form of kidney trouble, caused nearly ten thousand deaths in 1909, in the state of New York alone. Therefore, it behooves us to pay more attention to the health of these most important organs.

An ideal herbal compound that has had remarkable success as a kidney remedy is Dr. Kilmer's Swamp-Root, the great Kidney, Liver and Bladder Remedy.

The mild and healing influence of this preparation is soon realized. It stands the highest for its remarkable record of cures.

If you feel that your kidneys require attention, and wish a sample bottle write to Dr. Kilmer & Co., Binghamton, N. Y. Mention this paper and they will gladly forward it to you absolutely free, by mail.

Swamp-Root is sold by every druggist in bottles of two sizes—50c and \$1.00.
