The increase in acreage of fruit trees in Mosier District will be quite large this year. Companies having large holdings, and individuals are busy clearing land and setting to commercial apples. The increase of bearing orchards is in about the same ratio. Many fine orchards now exist and more are being rapidly developed here.

Quite a number of these lots have already been disposed of. It is Mr. Hail's intention to dispose of some thing like one-third of this property and then take the remainder off the market until he is able to make improvements, at which time the price will be considerably advanced. **Harriman Inventory**

Plans for taking one of the biggest inventories in history are being made by the engineers of all railroads belonging to the Harriman system. A complete valuation of the entire system, involving the listing of everything from bolts and steel rails to cars, buildings and franchises on more than 16,000 miles of track, will be taken. The task probably will require two or three years.

**Unprovoked Assault**

Last Monday afternoon a man giving his name as Otto Martin came into Mosier with a terrible gash extending across one side of his face made, he said, by the watchman at Tunnel No. 3. It appears that he and a companion were walking the railroad track from The Dalles to Mosier, and Martin stopped at the watchman's cabin to ask for a drink of water. The watchman greeted him with a blow across the face with a hatchet, severing the ear and making a severe gash along the jaw bone. The injured man and his companion walked on to Mosier and Dr. Robinson dressed the wound which required fourteen stitches to close.

Constable C. H. Dunsmore went to Hood River Tuesday and got Martin's companion and took him and Martin to Rowena to identify the assailant. He then took the parties to The Dalles, where the watchman plead guilty to assault and battery and was sentenced to jail for 40 days. The watchman, as an excuse for the deed, said he was tired of having people stop at the cabin and thought as he was working for the railroad company he had a right to drive him away.

**An Eskimo Woman**

Mary Coonie, the richest woman north of the Arctic circle is a full-blooded Eskimo. She can neither read nor write, but employs an Englishman who was graduated from Oxford as her secretary. She has little opportunity for spending money, and her one extravagance is dress.—Milwaukee Free Press.

"There is considerable speculation by the several railway towns in Central Oregon as to where the wool center will be established within the next few weeks," says the Portland Telegram. "It is believed that the most important wool-handling point in Oregon will be established finally this year, and the strife is keen between Shaniko, which has had the distinction of handling the wool for the interior for the past several years; Madras and Metolius. Business men of Madras held a meeting a few days ago and took steps to induce woolmen to haul to the Madras Union warehouse, Prineville capital is backing an enterprise that will provide ample warehouses at Metolius, and Shaniko is doing all that can be done to hold the business. It is to their interest, say the wool producers, to decide upon and ship to a single point where sales will be held on regular dates, and a regular market will be established. While the Shaniko market will have considerable local business, 75 per cent of the territory that was formerly tributary to that point will be handled at either Madras or Metolius in the future."
