Several bones were broken, which the doctor, with all his skill as a physician and surgeon, couldn't "set," and he had to send the disabled parts to a specialist. The accident was caused by the brake being thrown off while the machine was standing on an incline with no one near to prevent its plunging down into the bed of the creek and turning turtle.

Mr. and Mrs. Wm O. Coleman, of River Forest, Ill., a suburb of Chicago, arrived this week and are visiting Mr. and Mrs. Ed L. Howe, at "Lehova." Mr. Coleman is the president of Burley & Tyrrell Co., of Chicago, the firm Mr. Howe has represented on the Pacific Coast for many years. Mr. Coleman is also the owner of "River Forest Fruit Farm," south of town, and this is his first visit to the West. He is greatly pleased with Mosier and the fruit industry and predicts a wonderful future for Mosier District.

All trains east and west were delayed from one to four hours last Tuesday by the derailing of a freight engine in the tunnel two miles west of Mosier, caused by the cave-in of several tons of earth and rock in the roof of the west end of the tunnel. The wrecking crew was called down from The Dalles and by 11 o'clock the track was clear. Mosier presented quite a busy railroad center, with her main line and yards full of passenger and freight trains. On occasions of this kind, which fortunately for the railroad company, don't happen often, it would be a stroke of good business for Mosier's publicity committee to do a little advertising, circulate Mosier literature and Mosier apples among the waiting passengers who get off the trains to look about.

**Exhibit Building to Open**

The exhibit building will be opened on Saturday afternoon to the public. The State Library of fifty volumes will be taken out and anyone wishing the loan of books can have them from the principal of our school, who has agreed to take charge of them for the present. The library is charged to the board of the Immanuel Church.

The Commercial Club has fitted up the building so that it may be used as a reading and rest room for the public. Magazines are to be contributed by the members and we need a table and six chairs. When the table is furnished here will be waiting paper and material which will be for the use of those who wish to write a letter while in town. Specimens of the choice fruit of the Valley are requested to be brought in and placed in the window. The building will be open for a part of the time each day in the week.

**Co-operation with the Home-seeker**

Again have the various sections of Oregon their opportunity to invite the strangers into their midst to partake of the bounties

which Nature has lavished. On September 15 commenced the low colonists rates. On that day and continuing for a month the Middle West disgorged those among its own who are dissatisfied, who care not for the glories of the valleys of the Mississippi and Missouri, but prefer to trek still further westward to where the setting sun meets the horizon. Fifty or sixty years ago when the "spirit moved," it moved slowly and with a great deal of difficulty and attendant danger. Today it means but ride of a few days on board a fast train attendant with a comfort which those homeseekers would have considered heavenly. It is expected that this fall thousands will take advantage of the low rates and settle in the Pacific Northwest and take part in its future activities. All of these strangers should be met with open arms. They should immediately be shown the true Oregon spirit. All necessary aid should be given them. Furthermore, it must be remembered that there are enough homeseekers coming from all sections of the state. Care should be taken that if one happens to strike a section which in some way does not suit him,

**Harvest For Stenographers.**

While the passion for investigation shown by the Democrats at the special session is certain to have a salutary effect on the various officials of the Government who have been lax in their methods of administration, it has been a great boon to the official reporters who have had all the work they could handle. A stenographer who takes testimony for one hour daily at a hearing, like the steel or sugar hearings, will make \$25 a day, in addition to extra fees he will charge to witnesses or others who want copies of the testimony before he gets his notes written up; and the thrifty stenographer is never in a hurry to write up his notes before all such side revenues are gathered in. It will be seen, from this, that merely the taking and printing of the proceedings in the various investigations will cost the country many thousands of dollars. But the country has had a vast amount of entertainment out of it and for that alone, the investigations are doubtless well worth the price.
