OUR PORTLAND LETTER

Portland, Ore., Nov. 14. (Special) Oregon's influence beyond the state lines was illustrated during the past week when the Portland Commercial Club's special train excursion visited Lewiston, Idaho, and Walla Walla, Wash. In both places the Oregon system of community publicity was praised and the same methods were incorporated in the Idaho-Washington Development League. Relations between this state and its neighbors were never so cordial and the whole northwest is actively co-operating for development of the whole section.

The program for the twentieth annual meeting of the Oregon Dairymen's Association, to be held in Portland December 7-8, has been issued and contains a great deal that will be of much interest to the keepers of cows. Addresses by practical experts and exhibits showing improved methods will be seen. Nothing can be of greater value, not only to those actively engaged in the dairy industry, but to the whole state as well. A large attendance at the sessions of the convention is expected. Butter and cheese makers will meet in Portland at about the same time.

A special committee of the Portland Commercial Club is boosting flax culture with the hope of building up an industry in this state. A meeting was held during the week and considerable progress is being made. Investigations have shown that flax of exceptionally long fibre can be grown here and all facilities are favorable for linen manufacture.

That seaweed of the Pacific Coast will produce \$12,000,000 annually in potash for fertilizer is a discovery lately made by Secy. Wilson of the Department of Agriculture. Here is a chance for Oregon's coast line to contribute an entirely new product to the wealth of the state.

Hood River and Albany have had their apple fairs and are ready to show their prize-winners at the Oregon Apple Show in Portland November 15-18. Both fruit displays were a credit to the two apple centers and they will be heard from when the prizes are awarded at Portland. Preparations are complete for this event and it promises to be the best exhibit yet held by the State Horticultural Society.

A step of state-wide value has just been taken at the Oregon Agricultural College, where a division of extension has been added to the organization, the object being to extend the work of the institution into every section of Oregon. Instruction in farming will be carried into the homes so that people on the farms may carry on such studies as they wish. Farmers' Institutes will be extended and the scope of the work of the college will be much enlarged. One of the most important things contemplated by the new work will be a campaign to have agricultural instruction carried on in the rural and city schools of the state.

Boys Conference at Corvallis.

On December 1st, the Friday following Thanksgiving Day, there will assemble at Corvallis between a hundred and fifty and two hundred of the picked boys of Oregon for a three days conference. This will be the Sixth Annual State Boys' Conference held under the auspices of the Oregon-Idaho Young Men's Christian Association and is open to any boy over fourteen representing any Boys' Bible Study Club or Sunday School Class in the State.

The theme of this conference will be "Responsibility" and the motto "Dare to DO IT". The papers will be prepared and read by the boys after which open discussion will take place. Besides a number of papers by

the boys on topics in line with the theme, there are to be four addresses given by prominent men in the state who are not only interested in the boy life of Oregon, but who are informed as to its conditions and needs. Such men as Mr. Fred Lockley, manager of the Pacific Monthly, Mr. H. W. Stone, General Secretary of the Portland Y. M. C. A. and Mr. I. B. Rhodes, the General State Secretary for Oregon and Idaho Y. M. C. A. will be in the conference.

The good people of Corvallis are throwing open their homes to the boys and entertainment will be provided for all bona fide delegates. The Oregon Agricultural College Y. M. C. A. men are also planning to assist in entertaining the boys and will give them a banquet in their building Saturday evening. The College men will also serve as guides taking the boys over the campus and through the buildings.

Mr. H. A. Dalzell will be very glad to answer any inquiries as to the reduced rates that may be obtained for the credited delegates and as to the arrangements for entertainment. He will have programs ready for distribution by the middle of the month. Address Y. M. C. A. Portland, Oregon.

Cherry Gummosis

OREGON AGRICULTURAL COLLEGE, Corvallis, Ore., Nov. 11.—Some of the results of investigations on cherry gummosis is made by Fred L. Griffin, formerly a graduate student and assistant in plant pathology at the Oregon Agricultural College, are given in a preliminary report in "Science."

"Certain varieties of the cultivated sweet cherries found in the Pacific northwest are very subject to a diseased condition which is commonly called 'cherry gummosis,'" says Mr. Griffin. "The disease is characterized by more or less copious exudation of gum from the trunk, branches, spurs and buds as well as by a pustulated appearance of the bark near the diseased areas. Often but little gum is exuded, but in such cases an examination of the affected trees generally discloses discolored tissues which is infiltrated by the variation in color of the bark as compared with that of the normal."

"Cherry gummosis appears in both a localized and generalized form. In the former, the disease is apparently confined to rather limited areas on the trunk or branches, such areas being most often associated with a blighted spur or bud. In the generalized form, large areas of the trunk or branch may become involved, and it often results in complete girdling. This latter type of gummosis often appears to originate in the crotch of the tree."

Hemlock used for Paper.

[Oregonian]

Warsaw, Wis., Nov. 12.—The problem whether a commercial grade of paper can be made from native woods, other than spruce, for the solution of which the United States Government has established a laboratory here, has been partly solved, according to announcements made by J. H. Thickens, who is in charge of the experimental work.

Experiments have been going on for more than a year. Tests of pulp manufactured at the laboratory have just been concluded and are reported highly satisfactory. The previous tests were not as satisfactory as the last one, which is said to have proved that it is possible to use hemlock and jack pine and from mixtures of these woods with spruce to make pulp which will be of quality high enough for the manufacture of the cheaper grades of paper.

One of the mills of Wisconsin already has begun to use the mixture of spruce and hemlock for the manufacture of paper.

## O. A. C. SHORT COURSES

Begin Jan. 3, Continue Four Weeks

YOU ARE INVITED

(47-1229)

Every citizen of Oregon is cordially invited to attend the short courses of the Oregon Agricultural College, beginning Jan. 3. Eleven distinctive courses will be offered in Agriculture, Mechanic Arts, Domestic Science and Art, Commerce, Forestry and Music. Every course is designed to HELP the student in his daily work. Make this a pleasant and profitable winter outing. No tuition. Reasonable accommodations. For beautiful illustrated bulletin, address H. M. TENNANT, Registrar, Corvallis, Ore.

FARMER'S BUSINESS COURSE BY CORRESPONDENCE

The man who fancies he can dodge the making of enemies by trying to please everybody is really to be pitied. It is not to be inferred that one should go hunting for beams to knock his head against, dispute every other man's opinion, and elbow and crowd all who differ from him. That is another extreme. Other people have a right to their opinion, differ as they may from yours. So have you, and no one will respect you more for turning your coat every day in vain attempt to match the color of your neighbor's garment.—Ex.

Tungsten a Remarkable Mineral.

The mineral tungsten (the name meaning heavy stone) has been known for many years, but only comparatively recently has it become of economic importance. The most important use, according to Frank L. Hess, of the United States Geological Survey, and the one which makes

tungsten mining on an extensive scale possible, is as an alloy for tool steel. Lathes using tools made from tungsten steel may be speeded up until the chips leaving the tool are so hot that they turn blue, an operation which would ruin the temper of high-carbon steel. It is stated that about five times as much can be done by the same lathes with carbon-steel tools. From 16 to 20 per cent of the tungsten is ordinarily used in lathe tools. The melting point of tungsten is exceedingly high—5,576 F.

Tungsten also has an important use in making incandescent electric lamps, crucibles for electric furnaces, and various other articles.

Greatest Iron Producing Region in the World.

The Mesabi Iron Range in Minnesota produced in 1910, according to the United States Geological Survey, 53 per cent of the entire iron-ore production

of the United States. The Lake Superior district, including Minnesota, Michigan and Wisconsin, produced 81 1/2 per cent of our total iron-ore production. Figures from other countries are not yet available for 1910, but this is probably a greater production than the entire year's output for any foreign country.

Mr. and Mrs. D. Richmond, of Chicago, visited this week with M. A. Mayer.

Col. Sobieski's lecture in Lamb's Hall, last night, was most interesting. His theme was "My Army Life," and the story was told with great vividness and force. The Count is a pleasing speaker and captivates his audience with his humor. The lecture was certainly a success.

School Notes From Dist. No. 8.

Mr. Middleswart was a school visitor not long ago.

Supt. Neff spent Tuesday forenoon of last week with us. Marie Van der Putten has been dropped. She will resume her duties in Portland.

Owing to the severe weather of the last week, a number of pupils were absent.

The names on the Roll of Honor are: Elsie Cobine, Robert Cobine, Pearl McClure and Bessie Jones.

Parcel Shower.

Mrs. Ralph Cummings entertained delightfully last Friday afternoon. The occasion being a parcel shower in honor of Miss Sarah Clement, the guests being the members of the "We and Our Neighbors Club."

The rooms were profusely and appropriately decorated with hearts, and the afternoon was passed very pleasantly. Dainty refreshments were served by the hostess. Those present were Mrs. Ralph Cummings, Mrs. C. C. Clement, Mrs. Arthur Kuhn, Mrs. C. J. Littlepage and the Misses Sarah and Ruth Clement.

For The Boys And Girls

The Mosier Valley Bank has received a supply of neat little Savings Banks which will be furnished free to the boys and girls who will call and leave their names. This is by way of teaching the saving habit, which is one of the most important things in the life of every person.

Counties Share in Cash

Salem, Or., Nov. 12.—(Special.)—Apportionment of the five per cent received from the United States Government for the proceeds from land sales in Oregon was made by Secretary Olcott today. The total amount received for the year was \$12,785,667 to be apportioned pro rata among the counties according to acreage. There are 60,957,760 acres of land in the state and the apportionment is made on a basis of .00020974638.

The apportionment among counties is as follows:

County.	Acreage.	Amount.
Baker	1,914,880	\$ 401.64
Benton	415,680	87.19
Clackamas	1,107,200	232.23
Clatsop	523,520	109.81
Columbia	431,040	90.41
Coos	1,094,480	210.69
Crook	5,122,560	1,074.44
Curry	949,120	199.07
Douglas	3,263,360	684.48
Gilliam	658,200	138.27
Grant	2,874,560	602.93
Harney	6,780,160	1,422.11
Hood River	347,136	72.81
Jackson	1,786,880	374.79
Josephine	1,099,520	230.62
Klamath	3,984,240	821.00
Lake	5,130,240	1,076.05
Lane	2,604,160	546.21
Lincoln	687,440	143.70
Linn	1,859,520	394.45
Malheur	6,277,440	1,316.67
Marion	709,680	148.59
Morrow	1,298,240	272.30
Multnomah	251,920	59.13
