Why Deep Streams Run Still.

Deep streams run still—and why? Not because there are no obstacles, but because they altogether overflow these stones or rocks round which the shallow stream has to make its noisy way.—William Smith.

DR. WM. PFUNDER'S CELEBRATED OREGON BLOOD PURIFIER

A Tonic, Alterative and Resolvent. The best remedy for Kidneys, Liver and Bowels. Eradicates Pimples, Eruptions and Disorders of the Skin. Purifies the Blood and gives Tone, Strength and Vigor to the entire system.

Have Used Spare Time Well.

On the question of how working people, on the whole, have spent the added hour or hours of freedom from work, an author says that where cynics prophesied more drunken idleness and rowdyism, fairer observers found a kind of regeneration—no sudden mellennium, but wherever sufficient time has elapsed an extraordinary advance in physique and morals.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Always Have Something to Say.

Speak not at all, in any wise, till you have somewhat to speak; care not for the reward of your speaking, but simply and with undivided mind for the truth of your speaking.—Carlyle.

When Your Eyes Need Care

Try Murine Eye Remedy. No Smarting—Feels Fine—Acts Quickly. Try it for Red, Weak, Watery Eyes and Granulated Eyelids. Illustrated Book in each Package. Murine is compounded by our Oculists—not a "Patent Medicine"—but used in successful Physicians' Practice for many years. Now dedicated to the Public and sold by Druggists at 25c and 50c per Bottle. Murine Eye Salve in Aseptic Tubes, 25c and 50c.
Murine Eye Remedy Co., Chicago

Would That This Were True.

The principal authors met and formed a union for the sake of publishing a set of rules of writing. As a preliminary, they agreed that after this no hero would be permitted to flick the ashes from his cigarette or cigar. Also that no heroine shall hereafter bury her head in her hands or drop her eyes to the floor. The full set of restrictions will be announced later.—Life.

Red Cross Ball Blue, all blue, best bluing value in the whole world, makes the laundress smile.

Since the Telephone.

In 1876, the year in which Alexander Graham Bell invented the telephone, there were no skyscrapers, no trolley cars, no electric lights, no gasoline engines, no self-binders, no bicycles nor motor cars.—Magazine of American History.

SEVEN YEARS OF MISERY

How Mrs. Bethune was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Sikeston, Mo. — "For seven years I suffered everything. I was in bed for four or five days at a time every month, and so weak I could hardly walk. I had cramps, backache and headache, and was so nervous and weak that I dreaded to see anyone or have anyone move in the room. The doctors gave me medicine to ease me at those times, and said that I ought to have an operation. I would not listen to that, and when a friend of my husband's told him about Lydia E. Pinkham's Vegetable Compound and what it had done for his wife, I was willing to take it. Now I look the picture of health and feel like it, too. I can do all my own housework, work in the garden and entertain company and enjoy them, and can walk as far as any ordinary woman, any day in the week. I wish I could talk to every suffering woman and girl, and tell them what Lydia E. Pinkham's Vegetable Compound has done for me."—Mrs. DEMA BETHUNE, Sikeston, Mo.

Remember, the remedy which did this was Lydia E. Pinkham's Vegetable Compound.

It has helped thousands of women who have been troubled with displacements, inflammation, ulceration, tumors, irregularities, periodic pains, backache, that bearing down feeling, indigestion, and nervous prostration, after all other means have failed. Why don't you try it?

Painless Dentistry

CONTROL OF INJURIOUS PEAR SLUG IS DIFFICULT PROBLEM

Hellebore, Lead Arsenate and Paris Green Among Least Expensive of Sprays for Eradication of Pest Which is Common in Several States in Central Part of Country.

(By R. L. WEBSTER.)

Nearly every year cherry and plum trees in the central states suffer a large amount of damage on account of the common pear slug, or cherry slug. While the control of this insect has not been considered a very difficult problem, yet it often happens that foliage is greatly damaged before the owner is aware that any slugs are on his trees.

The pear slug, or cherry slug, is a dark, almost black, slimy slug, about two-fifths of an inch long when full grown, which feeds on cherry, pear and plum leaves.

These slugs feed on the upper sides of the leaves, eating out all the tissue except the veins and the lower surface. The injured leaves become dry and brown and fall from the trees, which are sometimes left entirely bare of foliage in midsummer.

Trees are often killed as a result of repeated defoliation. A short crop of fruit follows a severe attack by this

The Pear Slug.

insect, on account of the weakened condition of the tree.

Trees that have been damaged by the slugs appear as if they had been damaged by fire. The leaves turn brown, curl up and finally fall. Cherry trees, under such conditions, are forced to put out a new growth of leaves, weakening the tree and reducing the crop of fruit the following year.

The slugs appear twice during the year, and trees should be sprayed as soon as they appear. They first make their appearance about the middle of June, and the second appearance is about the third week in July.

Insect powder can be used against these slugs by merely dusting it over the leaves.

Hellebore may be used either in a dry or liquid form. It must be fresh for effective use. For a dry applica-

Angouleme Pear.

tion use hellebore, one pound to five pounds of air-slaked lime. For a liquid application use it one pound to a barrel of water.

Lead arsenate (prepared), two pounds in 50 gallons of water, is effective.

Paris green, one pound in 150 gallons of water, is also effective. Some quicklime, about a pound to each 50 gallons of water, should be added to the spray, to prevent burning of the leaves.

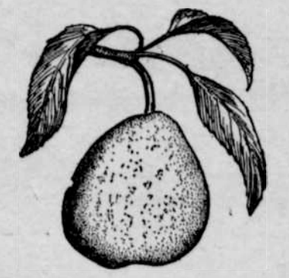
Kerosene emulsion—kerosene, two gallons; hard soap, one-half pound; water, one gallon—is good. The soap is dissolved by boiling in water and is then churned up with the kerosene until the two are emulsified into a white, creamy mixture. The stock solution is then diluted with water, while still warm, to the required amount. To obtain a ten per cent. solution one part of the stock solution, prepared as stated, should be diluted with 6 2-3 parts of water.

Whale oil soap, one pound to two gallons of water; white laundry soap and Ivory soap, one ten-ounce bar to two gallons of water, have proven effective. The soap is merely dissolved in water by boiling, and sprayed while still warm.

Hellebore, lead arsenate and paris green are the least expensive of these treatments. If a spraying is necessary while there is fruit on the trees, hellebore or some other material than arsenical should be used.

Cultivation under infested trees is of value, since it disturbs the cocoons in the soil there.

Since the slugs spend the greater part of the year in the ground under the trees infested in the summer it follows that a thorough stirring of the soil would tend to break up the cocoons containing the slugs, and so expose them to the elements. Berlese has suggested this measure against this insect in Italy. This cultivation would be most effective in the fall so that the cocoons might be exposed during the winter. Spring cultivation



Easter Beurre Pear.

would also be of value in disturbing the cocoons.

According to Dr. L. O. Howard, chief of the bureau of entomology at Washington, the slugs may be easily washed off of small trees by a strong stream of water applied from a garden hose under heavy pressure. When washed to the ground they are unable to regain their places on the leaves. Such a measure as this would be quite feasible on a small scale in cities, or where water pressure is available.

Spraying is undoubtedly the best remedy for the pear slug. Of the two generations the first is the harder to combat, especially on cherry trees, since the fruit is present on the trees at about the same time that the slugs are abundant. Consequently due care must be taken in the use of arsenical poisons at that time. Arsenical poisons may be used freely for the second generation in the late summer.

The pear slug is rarely destructive in any locality for many years at a time. This alternating abundance and scarcity of the insect is due for the most part to the activity of its natural enemies, the most abundant of which are two small egg parasites.

More Egg Farms Wanted.

We want more commercial egg farms in this country, and there is good money in the business if properly conducted. The demand for fresh eggs is growing every day, and will continue to grow. To meet the present demand it would be necessary to increase the egg production of the country at least 100 per cent.

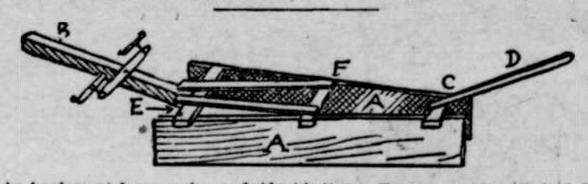
Vegetables in China.

In China the natives preserve vegetables by coating them with salt and drying them in the sun. Hams are cured by means of an alkaline earth and common salt. Pickled eggs are preserved with a compound of common mud, salt, saltpeter and soy bean sauce.

Breeding Worms and Trouble.

The lazy farmer who stacks new clover on the site of the old stack is breeding worms and trouble.

COVERING AND RIDGING POTATO



An implement for covering and ridging potatoes is shown in the illustration. The runners, A, A, are of hard wood, 6 feet long, six inches high and 2 inches thick, with iron plates on bottom. Front crosspiece E is 3 feet long and rear crosspiece C is 1 foot. One man drives while another holds rear end in place by the handle D. The device is handy and inexpensive.

TEACH COLT TO BE HALTER-WISE

Young Horses Should Be Taken in Hand When Little Fellows and Quite Easily Handled.

(By M. COVERDELL.)

You often see a man kick and cuff the colt around every time it happens to get in the way.

After a while you will notice this same fellow with the family out helping him to hem up a two-year-old colt while he can put a halter on him.

And for the first two or three times they get the halter on they have a regular circus in teaching the animal to lead and be halter-wise. It's mighty hard and dangerous work, too, this breaking in big, strong, two-year-old colts.

Why not take the little fellows in hand when they are small, easily handled and quick to learn? Slip the halter on the colt occasionally. By slow degrees get it accustomed to leading up when the lead-strap is tightened and you move.

But don't get in a hurry. The colt has been used to going ahead of you so don't expect it to follow too soon. A lump of sugar or a few oats held in the hand just in front of the little fellow are much better trainers in teaching it to lead than dragging it by the lead strap and having some one behind it with a club or a fishing pole to "shoo" it along.

Origin of the Potato.

The potato, which was already cultivated in America when the continent was discovered, is spontaneous in Chile. It was introduced to Europe in 1580 and 1585 by the Spaniards, and almost at the same time by the English, who brought it from Virginia, where it had appeared about 1550. The sweet potato and the Jerusalem artichoke are also supposed to come from America.

Wet Plowing.

If the soil leaves the plowshare shiny and wet, wait a day or two. Wet plowing makes cloddy ground.

20 DIE FROM HEAT IN EAST

Mad Dogs Add Terror to Chicago Weather.

Many Prostrations—Horses Fall In Streets—Hot Wave Helps Crops In Country.

Chicago, July 8.—Twenty deaths in the two days of torridity Chicago has experienced was the record tonight when the statistics were footed up. In addition there were half a hundred serious prostrations and 18 persons were bitten by rabid dogs.

Meanwhile the heat wave has "flattened out," to use a technical expression of the weather forecasters. Over the grain fields of the West and Southwest the blazing sunshine was making millions in agricultural wealth. The suffering in the cities meant the fortunes of the farmers.

The temperature today did not reach yesterday's extreme height and the humidity was 71, or four degrees below that of yesterday, but men and horses continued to drop in the streets, which were like hot tunnels.

Some relief came in the afternoon, when shifting winds brought a light breeze off the lake. It was confined to that portion of the city within a half mile of the lake front, however, as the breeze was so light it lost its coolness after traveling over belching chimneys.

By way of comparison, it may be noted that San Francisco, with a maximum of 60 and a minimum of 50, was the coolest spot in the country. Portland had 62 and 52, Los Angeles was next, with 78 and 58, more than 20 degrees cooler than Montreal and Toronto. Phoenix, Ariz., claims the heat record, with 104. Boston reported 90, New York 82 and Washington 90. Various Texas points had an average of 96, Cincinnati was comparatively cool at 80, or eight degrees cooler that St. Louis, which had precisely the same temperature as St. Paul, 88, and was four degrees cooler than Madison, Wis. Sault Ste. Marie, usually the abiding place of the chilly wave, sweltered at 92, 10 degrees hotter than Memphis, Tenn. Green Bay, Wis., also one of the "cold spots" on the tourist circulars, reported 94, or 10 degrees warmer than Denver.

In addition to 20 deaths in Chicago, five deaths were reported from Philadelphia, one from La Crosse, Wis. and five others from various points.

AMERICANS WIN HONORS.

Two World's Records Broken at Swedish Olympiad.

Stockholm, Sweden—The glory of the opening of the Olympic games of 1912 should be divided between Sweden and the United States. Sweden gets the lion's share, for the impressive stage setting she provided for the contests, which, with the natural beauties of Stockholm—its parks and palaces and lakes—and the moving ceremonial with which the king inaugurated the meeting, makes it by far the most memorable international festival ever held.

America's share of the honor is due to the remarkable fashion in which her brawny young men set to work on the cinder path. They ran away with heat after heat in the first rounds of the 100 meters and 800 meters; they outdid the expectations of their trainers and completely upset the calculations the public had made. They left their old-time British rivals far behind.

The smashing of the Olympic record by D. E. Lippincott, University of Pennsylvania, in the 16th heat of the 100 meters event, puts that runner in the hero class.

The world's record with the javelin, made by E. Lemming, the Swedish champion, was not unexpected, but the Hawaiian swimmer "Duke" Kahanamoku, covered himself with glory by winning the United States the second world's record of the meeting.

Champion Roper Roped.

Baker, Or.—John Spain, of Union, reputed to be the champion roper of the world, may never rope again as the result of an accident at an exhibition at Halfway. While lassoing a horse the rope caught around his arm, his horse stopped suddenly and the taut rope cut his arm to the bone, severing the veins. The arm may have to be amputated. Spain was brought to the St. Elizabeth hospital here. Spain appeared at the Pendleton Roundup and the Union Stock Show.

Steel Cars Save Lives.

Jackson, Miss.—Steel coaches probably saved the lives of more than a score of passengers when Illinois Central passenger train No. 3, south bound, was wrecked Sunday afternoon two miles south of Jackson. Several passengers were badly shaken up and bruised, but only five required more than passing medical attention. These were brought to Jackson and placed in a hospital, where it was said their injuries were not serious. The wreck was due to a soft roadbed caused by heavy rains.

Work to Come to Coast.

Washington, D. C.—Senator Jones has secured an amendment to the naval appropriation bill providing that four of the eight submarines authorized, to cost in the aggregate $4,440,000, shall be built on the Pacific Coast; also an amendment authorizing the erection of a large wireless station on the coast of Washington and one in Alaska. Senator Heyburn secured an amendment appropriating $75,000 for developing and mining Alaskan coal.

West Virginia Governor Signs.

Charlestown, W. Va.—Ex-Governor Dawson announced that he had signed the call for the national convention of the Progressive party, to be held in Chicago August 10. Dawson was chairman of the Roosevelt state committee in the primary campaign in West Virginia.

T. R. OUTLINES FIGHT.

Colonel Intends to Appeal to Farmers and Laborers.

Oyster Bay, N. Y. — A campaign along novel lines has been sketched in bare outline by Colonel Roosevelt. As the candidate of the new progressive party for the presidency, Colonel Roosevelt intends to make an appeal largely to the farmer and the wage worker on the ground that neither the Democratic nor the Republican party is attempting seriously in this campaign to deal with the fundamental economic and social conditions which confront the country. Particular attention will be paid to the high cost of living.

Colonel Roosevelt said that Senator Dixon of Montana, who managed his campaign for the Republican presidential nomination, in all probability would be his campaign manager in his fight at the head of the new party.

The senator's headquarters probably will be in New York, where he has passed most of the time since the Chicago convention. This program has been agreed upon as definitely as possible in advance of the national convention in Chicago next month.

Colonel Roosevelt has been engaged in a study of the platform adopted in Baltimore last week, and of the Republican platform, and he believes he has found in them valuable campaign material. He said neither of these platforms showed the slightest understanding of the social and industrial movement which is under way in this country. They have taken up, he said, the old policies and the battle cries of other years.

BATHING SUITS DEFINED.

Venice, California, Mayor to Parade in Model Costume.

Venice, Cal.—Hereafter Sunday visitors to this beach will see Mayor Holbrook parading the principal thoroughfare clad only in a model bathing suit, if the intended bathing ordinance fathered by Trustee Lorenz goes through as indicated.

Section 2 provides that this shall be done as a public example. The parade shall be between 12 and 1 o'clock and the wearer shall have on no other garment. According to section 1 it shall be unlawful for any person to appear upon the beach in the ocean or in any public place in Venice in a bathing suit unless it shall match the model. The suit shall have sleeves that come to the wrists, collar a half inch high, bloomers and a bona fide skirt at least 30 inches long hung from the waist. Women shall wear stockings of sombre shade. Hair ribbons must be worn by girls under 14 years old.

Men's suits shall consist of the same garments but may be made in manish style. The penalty for violation is $300 fine.

CHINA TO COMPETE.

New Steamship Line Is Promised for Trans-Pacific Trade.

Los Angeles — That three large steamships of the type of the Manchuria will be built at Long Beach and that five large steamships are to be leased from a defunct Hong Kong line within eight months is the statement of Goon Lee, representing the Chinese organizations that are promoting the Los Angeles-Hong Kong steamship project, on his return from a tour of Seattle, Portland and other Pacific Coast cities.

Lee announced that the Chinese along the entire coast desired a line of ships that can compete with the Japanese lines now operating between the Orient and San Francisco and said that funds practically were assured.

The Chinese of Mexico, the United States and South America are to raise one-half of the $12,000,000 necessary and are now endeavoring to secure recognition for the new republic of China, because, they explain, it will provide the other half of the fund if it is recognized and thus enabled to establish itself on an operative basis whereby it can negotiate a loan or issue bonds.

Fuel Oil Laws Conflict.

Vancouver, B. C. — The Canadian shipping act makes it compulsory that fuel oil used on steamers shall flash above 200 and the customs regulations permit the free entry only of fuel oil that will flash below 200. The steamer Washtenaw, here with 26,000 barrels of California oil for the Canadian Pacific, is tied up by a demand for 2½ cents a gallon duty, more than the actual cost of the oil. If the customs ruling is adhered to, the oil burning liners that ply to American ports will make Seattle their bunker port.

Five Injured at Tacoma.

Tacoma—At a performance of "The Conquest of Mexico," staged in the stadium before an audience of more than 25,000 persons, five participants in the spectacle were injured by the backfiring of a large cannon and the discharge of a musket in the face of one of the victims. Three were seriously injured and two slightly. The most seriously injured of the men was Dr. Richter, of the United States ship Oregon, now in Tacoma harbor. He sustained a badly burned face, neck and breast from the cannon explosion.

New National Flag Flies.

Washington, D. C.—The new National Flag bearing 48 stars, emblematic of all the states including the recently admitted Arizona and New Mexico, was flung from all Federal structures in the country and from the American navy throughout the world July 4. Thirteen stars only will be permitted in the blue square of the flags that are less than five feet wide, to avoid overcrowding. The red field on the president's flag is changed to blue.

Missing Yacht Makes Port.

Honolulu—The overdue trans-Pacific racing yacht Natoosh, of Victoria, arrived here safely, four days behind the winner, Lurline, in the race from Los Angeles harbor. When she failed to appear on time it was feared that she had either been disabled or gone astray. Heavy weather held her back and blew her off her course.

AIRSHIP BURSTS; FIVE PERISH

Vaniman Dirigible Balloon Explodes in Mid-Air.

Wives of Four Men See Ship Break Into Flame and Plunge 1000 Feet to Earth.

Atlantic City, N. J.—Mrs. Vaniman and the wives of three members of the dirigible balloon Akron's crew, standing on the veranda of the Vaniman cottage near Brigantine beach, early Thursday, saw the great dirigible explode and then dart down from midair, carrying their husbands to death in nine feet of water in about a second.

The women screamed and covered their faces and Mrs. Vaniman fainted, but all shortly recovered and rushed with 2000 other spectators toward the place where the balloon fell, killing Vaniman and four others.

As the mighty dirigible plunged downward a body was seen to deatch itself from the blazing mass and fall into the water 50 feet from where the balloon sank. It was recovered by Councilman Harry Cook and A. T. Bell, who put out in a motor boat, and was identified as that of Calvin Vaniman, brother of Melvin. The center dynamo and the badly mutilated and burned conditon of the body showed that the main force of the explosion must have been directly opposite the middle of the car.

William Hill, United States revenue official, who saw the accident, said:

"We were watching the big ship closely, remarking upon the beautiful spectacle, the morning sun making the huge bag glisten like gold, when I noticed a whirl of smoke at the stern. I remember glancing at my watch and noting that it was exacty 6:42. The ship was between 700 and 800 feet up, in my estimation.

"The smoke gained in volume and the ship seemed to stagger. The smoke continued to increase for a minute or two, running apparently the whole length of the engine room beneath the great bag, and then there was a frightful concussion, like the firing of a great gun.

"The next instant the ship appeared to be a great mass of flame. It seemed to me that the stern had been entirely blown out. Then I saw the whole thing was tumbling down to the sea and I closed my eyes. There was a great uprising of gas and flames and then it was all over, but the folds of the big yellow bag just visible above the sea."

Captain Frank Adams, of the light house, and Captain Frank Doughey, of Inlet Fleet, were among the first to reach the scene of the disaster. They found only tangled wreckage and no sign of life. Captain Parker, of the lifesaving station, rushed out in the government's high-power boat and confirmed the report of the yachtsmen. He reported the Akron lying in nine feet of water in a slough at the end of Brigantine beach, with the top of the big yellow gas bag billowing in the gentle breeze.

The body of Walter Guest was recovered from the wreck of the dirigible about two hours later. It was mangled about the head and legs, and most of the clothing was blown off.

CONFEDERATE LEADER DEAD

Captain Walker One Who Surrendered to Grant at Vicksburg.

Santa Monica, Cal.—Captain William A. Walker, a Confederate cavalry officer, who surrendered his sword to General Grant at Vicksbur, died here Thursday. Under the Cleveland administration Walker was postmaster at Albuquerque, N. M. While holding that position he was called upon to speak for "The Lost Cause" at a public ceremony on the occasion of the death of Grant. He surprised the assemblage with one of the shortest public speeches ever delivered:

"Ladies and Gentlemen: I surrendered to General Grant at Vicksburg. I have nothing more to say."

Camorra Trial Near End.

Viterbo, Italy. — The members of the Camorra, who have been on trial here for nearly two years, now have assumed a most humble attitude and show the most profound respect for the judges and jury, placing themselves entirely in the hands of the court, which shortly is to deliver its verdict. The presiding judge read a long list of questions for the jury to answer to establish who were the instigators of the crime of murdering Genarro Cuoccolo and Maria Cutinelli Cuoccolo in June, 1906.

Wrecked Passengers Sue.

Los Angeles—The wrecking of the Stanta Rosa a year ago on Saddle Rock has resulted in a civil action in the United States District court against the Pacific Coast Steamship company for damages aggregating $40,000. Neglect is charged to the officers of the vessel and recompense is sought for loss of baggage. They allege that at the time the vessel struck the sea was calm and that when the wreck was imminent and it would have been safe for the passengers to go ashore, her officers refused.

Ships Sail Despite Strike.

New York—Developments in the coastwise seamen's strike do not tend to carry out predictions of leaders that more than a dozen steamers at this port would be tied up immediately. Outgoing vessels of lines against which the strike is directed, sailed on time, with improvised crews of inexperienced men when necessary. Several leaders admitted the men were not responding to the strike order as fast as had been expected.

Kaiser and Czar to Meet.

Berlin—The German emperor, accompanied by his third son, Prince Adelbert, has started by way of Danzig for Baltic Port, a seaport of Russia, near the entrance of the Gulf of Finland, where they will meet the Russian emperor. The two emperors met last in August, 1909.
