When the Worm Turned.

"No power on earth shall make me do it!" he declared, firmly. She approached close to his side. Her eyes blazed into his and her lips sneered.

"You shall do it! However you dread it, it must be done! You hear me?"

"I refuse utterly! Such a thing is unworthy for a man of pride and honor to undertake!" he repeated, drawing back from her as from a whiplash.

Quickly she was at his side again, gripping his arm with fingers slim, but hard as steel.

She slipped a small knife into his hand—a thin, sharp-pointed piece of steel. "There!" she said. His obstinacy was momentarily driving her to desperation.

Her voice broke with passion, and she cried, in a loud, angry tone: "William Tomkins, if you don't do what I say and go peel those potatoes at once, you'll go to bed without any dinner!"—Puck.

FEED BROKEN-WINDED HORSE

Principle to Be Recognized Is to Feed Little and Often—Care of Stall Is Important.

By R. G. WEATHERSTONE.

For running horses green food cannot be used. It makes the animals soft, but it may be fed to advantage to winded horses of slow draft. When that is done it should be given in a fresh succulent state, rye, vetches, etc., being fed before the seed begins to ripen, else it loses its digestive qualities, and a few roots or carrots with dry grain make a good winter feed.

In fact the principle to be recognized is to feed little and often, to avoid long fasts, and if it is necessary to work immediately after feeding to go easily at first.

It is a good plan to keep a bucket of water in a corner of the manger so that it can be taken when desired, if dry food is given, and in this way seldom will excess be indulged in.

When succulent green food is given of course there is not the same need for water. A little tar in the water may be found beneficial and the animals soon begin to take to it readily. A ball made of tar and tallow is greatly favored for broken wind, if there is any sign of distress.

Cool, well ventilated stalls or boxes are of the utmost importance, as the animal should have as much pure air as possible.

Long spells of rest in the stable followed by excessive spells of work only serves to aggravate the complaint. Good "hard" condition is what is wanted and this can only be had with frequent exercise or when the horse is idle a free run in a field.

Above all, constipation should be avoided and the digestive organs carefully watched.

Such precautions may not cure but they greatly reduce the original cause of the ailment and modify the trouble.

Ordinarily medicines are not of much use but where there is distress from excessive work, an overloaded stomach, constipation, a hot stable, or close, muggy weather, a sedative may be given to obtain temporary relief.

Cultivate Belief.

Want of faith speedily kills the youthfulness in us. The very freshness of the fountain of youth is belief. When you feel you have no more confidence in yourself, no more trust in others, no more credence in the great moral forces of good in the world, it means that your spiritual teeth are loose and dropping, your spiritual hands weak and shaky.

Pigeons as Dispatch Carriers.

During the siege of Paris carrier pigeons proved of great practical use in carrying messages. These were photographed microscopically on pellicles of collodion which were inclosed in goose quills attached to a silk thread in the upper part of the tail feathers. Now there is a military pigeon system controlled by the French ministry of war.

Persevere Always.

No talent will enable us to do any work worth while without drudgery, but no childishness must tempt us to give it up because it is hard. No work can be well done by any one who is unwilling to sacrifice ease to its accomplishment. Perseverance is not only the price of success, but the price of manhood also.

Cause of So Many Necks Being Broke.

In a certain Virginia school for negroes the lyceum was debating the question, "Resolved that capital punishment should be abolished." Bill Basey was arguing the affirmative. After an impassioned plea this was his clincher: "And lastly, Mr. President, I hold dat capital punishment should be abolished for dis reason, namely, dat it have been de cause of so many necks being broke."

Critic of Epigram.

"Young man," said Mr. Hibrow, "have you read the proverbs of Solomon?" "Oh, yes," replied the confident youth; "and some of 'em are pretty good. But I think they'd go better if they had some funny pictures with them."

Her Recitation.

"Put some spirit into it, child," shouted the father, who is an actor. "Make some gestures. What is she reciting, anyhow?" he demanded of his wife. "She won't need any gestures with this," retorted the latter. "She is reciting the multiplication table."

His Little Mistake.

"I wouldn't shave myself today," said she quietly. "Want to insinuate that I've been drinking, eh?" he stormed. "Not at all. But that isn't a cup of lather you brought in from the kitchen just now. That's a charlotte russe."—Washington Herald.

To remove Stains.

Inkstains on silver or plated articles may be removed with a paste made of chloride of lime and water. This should be left on for a little while and then washed off in warm water.

Her Dearest Desire.

Nearly every woman wants her husband to make his mark, so that she may smile derisively at her relatives who thought she threw herself away when she became his wife.

Seems Need of Revision.

The death of a New York man was caused by swallowing a safety pin. Notwithstanding this, the public no doubt will go right ahead calling 'em safety pins.

Not Altogether Cheerless.

"Why are you removing all the rocking chairs?" "Pa has sworn off on swearing, and we want to do all we can to help him."—Detroit Free Press.

Greatest Wealth.

There is no wealth but life.—Ruskin.

What Is Coryza?

Coryza is a medical term. It means chronic catarrh of the nose. It began with catching cold, producing a slight nasal catarrh. Then catching cold again. Finally the catarrh is continuous. Afterwards brown scabs form in the nose, the breath is fetid, breathing through the nose more or less obstructed. Then the victim has coryza.

In taking Peruna for coryza a tablespoonful should be held in the mouth, and then allowed to slowly trickle down the throat, occasionally breathing out through the nose, so that the fumes of Peruna will permeate all through the throat and posterior nares. Peruna has cured a multitude of this sort of cases.

Snuffing warm salt water, a teaspoonful to the pint, is sometimes necessary to thoroughly clean out the nose, which should be done twice a day, in the morning and in the evening.

But it is the Peruna that should be mainly relied upon for a permanent cure. People with coryza are generally poor sleepers, digestion is poor, appetite is poor. Peruna will correct all these difficulties.

NEWS NOTES OF CURRENT WEEK

Resume of World's Important Events Told in Brief.

J. Pierpont Morgan died in Rome, Italy.

Crest of the Ohio flood is reached at Cincinnati, and danger believed past.

Russian mobs parade streets of St. Petersburg, crying "down with Austria."

Walter H. Page, editor of World's Work, has been appointed ambassador to Great Britain.

It is believed J. P. Morgan, Jr., will succeed his father in most of his business enterprises.

Meat prices in New York are again soaring, owing to scarcity caused by the Middle West storms and floods.

People of Cairo, Ill., hurriedly reinforce levees with sand bags, while water slowly rises to danger point.

Business was suspended for five minutes on the New York stock exchange to adopt resolutions on the death of J. P. Morgan.

A recent change in freight rates makes it possible for Pacific Coast paper mills to ship paper to Florida and sell it at a profit there.

An American suffragette on a "hunger strike" in a London prison, smuggled out a letter in which she declares her intention to win or die.

The three-masted schooner John D. Spreckels was discovered drifting bottom-up near Point Reyes, Cal., but no trace of her crew can be found.

Flood and fire at Dayton, Ohio, menaced the shop where Orville Wright constructed and perfected his first aeroplane, but it escaped unharmed.

City park officials of Portland, Or., are looking for some one to trim the toenails of the pet lion at the park, but so far have found no one who will tackle the job.

President Wilson contemplates going to the flooded districts of the Middle West to direct relief work in person.

Looters begun work at the scenes of the Ohio disaster, four already having been shot.

Smallpox and diphtheria have broken out among the flood refugees at Lafayette, Ind.

Captain Roald Amundsen, has contracted for two areoplanes, to be used in arctic explorations.

Portland, Or., sends her first installment of reilef money to flood sufferers, amounting to $3500.

Revised estimates place the number of dead at Dayton at not over 2000.

Governor Cox, of Ohio, believes the property loss in Ohio will exceed the losses by the San Francisco earthquake and fire.

Peru, Indiana, declined offers of help from naval reserves, saying the waters are receding so rapidly that all danger is past.

The water is reported receding rapidly at Fort Wayne, Ind. Locomotives were used to funrish steam to operate the pumping stations.

Bodies of many flood victims are being recovered with bullet holes in their heads showing that they shortened their sufferings by suicide.

Sixty prisoners confined in the workhouse at Dayton, Ohio, after being without food or water for three days, revolted and tried to kill the superintendent.

Enrique Zepeda, a nephew of President Huerta, of Mexico, ordered and successfully carried out the execution of one of his political enemies, afterward having the body burned.

Antitode for Carbolic Acid.

The best antidote for carbolic acid poisoning is flour and water. If nothing better is at hand drink a little plain water to weaken the acid, or still better, drink soapsuds if obtainable. If flour is not handy, use magnesia, chalk, soda, lime, whiting or new soap, or knock a piece of plaster from the wall, scrape off the white outside coat of lime, pound it fine, mix with milk or water, and drink at once. Follow with warm water or flaxseed tea. Of course, call a physician at the earliest possible moment.

Liquid blue is a weak solution. Avoid it. Buy Red Cross Ball Blue, the blue that's all blue. Ask your grocer.

Mixed Telegram.

Mr. McC., a young man in a college town who was an interesting combination of scientific and musical accomplishments, had a young lady friend in Chicago who was soon to be married. The day before the wedding her organist was suddenly taken very ill, and she telegraphed to Mr. McC.: "Shall be married at noon tomorrow. Will you play for us." When the telegram reached him it read: "Shall be married at noon tomorrow. Will you pray for us?"

ONLY ONE "BROMO QUININE"
That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Cures a Cold in One Day. Cures Grip in Two Days. 25c.

Altered the Case.

In one revue I caricatured a famous dancer. A little while after, while abroad, I was told that the husband of the lady was looking for me with a big stick. A few weeks later I returned to London. I met the husband, who shook me warmly by the hand and thanked me effusively for the skit on his wife. They had quarreled in the interval.—George Grossmith in The Tatler.

CONSTIPATION

Munyon's Paw-Paw Pills are unlike all other laxatives or cathartics. They coax the liver into activity by gentle methods, they do not scour; they do not gripe; they do not weaken; but they do start all the secretions of the liver and stomach in a way that soon puts these organs in a healthy condition and corrects constipation. Munyon's Paw-Paw Pills are a tonic to the stomach, liver and nerves. They invigorate instead of weaken; they enrich the blood instead of impoverishing it; they enable the stomach to get all the nourishment from food that is put into it. Price 25 cents. All Druggists.

Cheap Way to Mount Pictures.

To mount pictures inexpensively for the nursery or children's bedrooms, cut all the white margin off the picture, then get some thin, smooth boards 1½ inch larger all round than the picture; stain the boards with dark oak stain about two inches round the edge; varnish them, then paste the picture on the board, leaving an even edge of the stained wood all round; hang on the walls in the usual way.

In Case of Emergency.

In every well-ordered household a box of bandages should be kept in case of accident. Bandages should be torn from old linen or muslin and wound tightly in rolls. They should be of various widths. Also supply stout, narrow strips for tying. It is advisable to place these bandages in the oven for a few minutes to sterilize them. Then place in a hot, wide-mouthed preserve jar and screw on the lid while all are still hot.

One Unconsolable Grief.

Many housekeepers can sympathize with the old Virginia lady who said to her friend, on finding a treasured old cup cracked by a careless maid: "I know of nothing to compare with the affliction of losing a handsome piece of old china." "Surely," said the friend, "it is not so bad as losing one's children." "Yes it is, for when your children die you do have the consolation of religion, you know."

Nice Fruit Cookies.

Two cups of brown sugar; one cup butter; three eggs; one level teaspoonful of soda dissolved in five tablespoons of sweet milk; one teaspoonful each of cloves, cinnamon, allspice and nutmeg. Three cups flour; one cup chopped raisins. Drop from a spoon in a pan and bake.

Sure Sign.

Gabe—"Smith is the most agreeable man I ever met." Steve—"Yes, he acts as though he had something to sell or was preparing to make a touch."

Her Intent.

"That dressmaker's model always wears a long wrap when she goes out." "Hers is evidently a sinister motive. She wants to cloak her designs."

OLDEST TREE IS ON COS

It Measures 30 Feet in Circumference and Is More Than 2,000 Years Old.

The tallest trees in the world are the Australian eucalypti, which attain an altitude of 480 feet. The biggest are the mammoth trees of California, some of which are 276 to 373 feet in height, and 108 feet in circumference at the base. From measurements of the rings it is believed that certain of these trees are from 2,000 to 2,500 years old. The oldest tree in the world is said to exist on the island of Cos off the coast of Asia Minor. It is several thousand years old, but just how many no one has dared to say. The tree is carefully preserved by a wall of masonry around it, and the trunk is thirty feet in circumference.

But there are parts of trees in the form of useful timber which are even older, probably, than any on the stump. Beams in old buildings are preserved today, which are known to be over a thousand years old. Piles driven by the Romans prior to the Christian era are perfectly sound today, and it is known that they have been immersed in water for upward of two thousand years.

Some woods have remarkably durable properties when immersed in water. They decay rapidly on the stump, many rotting in from five to ten years, but when immersed in water they last longer than iron or steel. An effort has been made by our government to preserve woods indefinitely by treating them with oils and tar products. Already telegraph poles and railway ties have had their average life extended from five to ten years by this process.—Harper's.

No thoughtful person uses liquid blue. It's a pinch of blue in a large bottle of water. Ask for Red Cross Ball Blue, the blue that's all blue.

Household Hint.

Straw matting suitcases and shopping bags can be very much improved in looks and usefulness by a coat of cheap wagon varnish, which makes them waterproof. A good wetting will generally spoil them, but the varnish causes them to shed water like a duck. This should be done once a year.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Placing the Blame.

While preparing her three-year-old daughter for bed, her mother on the discovery of a hole in her stocking, exclaimed: "Why, Betty, there is a hole in the toe of your stocking." Betty replied: "Yes mother, but don't blame me, if my big toe ate a piece out of my stocking."

Content.

I would have nobody control me; I would be absolute, and who but I? Now, he that is absolute can do what he likes; he that can do what he likes can take his pleasure; he that can take his pleasure can be content; he that can be content has no more to desire. So the matter's over; and come what will come, I am satisfied. —Cervantes.

Keep 10,000 Fleeces Fifty Years.

Ten thousand fleeces, which have been stored for 50 years in a big Lincolnshire granary with slanting ashpoles to prevent them from touching the brickwork, have been purchased by T. W. Always Dust in Atmosphere.

We owe the blue of the sky to the fine dust in the atmospheric heights, where the air is purest. When the wind sets the dust in motion the blue turns to gray. The smoke of a cigar is blue as it issues from the mouth of the smoker in whitish gray because the particles of the gray smoke have increased in volume by fixing water vapor.
