Use them for **poor appetite, sour stomach, sick headache, constipation** and **indigestion.**

Dangerous.

Warden—What did that woman give the prisoner?

Turnkey—Only a pie she baked for him herself.

Warden—Good heavens! Get it away from himquick before he makes a saw of the crust and escapes.

To Remove a Glass Stopper.

When the stopper of a bottle has become fixed and will not move, if it is soaked in vinegar for a few hours and then worked gently, it will come away quite easily, and there is no danger of breaking it.

Five times as many earthquake shocks are recorded on the Pacific coast of the United States as on the Atlantic.

Blood Bath Knocks Rheumatism

Remarkable Effects of a Remedy That Actually Irrigates the Entire Blood Supply.

It sounds queer to take a blood bath but that is precisely the effect of a most remarkable remedy known as S. S. S. It has a peculiar action of soaking through the intestines directly into the blood. In a few minutes its influence is at work in every artery, vein and tiny capillary. Every membrane, every organ of the body, every emunctory becomes in effect a filter to strain the blood of impurities. The stimulating properties of S. S. S. compel the skin, liver, bowels, kidneys, bladder to all work to the one end of casting out every irritating, every pain-inflicting atom of poison; it dislodges by irrigation all accumulations in the joints, causes acid accretions to dissolve, renders them neutral and scatters those peculiar formations in the nerve centers that cause such mystifying and often baffling rheumatic pains.

And best of all, this remarkable remedy is welcome to the weakest stomach. If you have drugged yourself until your stomach is nearly paralyzed, you will be astonished to find that S. S. S. gives no sensation but goes right to work. This is because it is a pure botanical infusion, is taken naturally into your blood just as pure air is inhaled naturally into your lungs.

The great Swift Laboratory has spent millions of dollars in perfecting, producing and placing in the hands of the public this wonderful remedy. So give your blood a good bath with S. S. S., for it knocks the worst forms of rheumatism and gives you freedom to enjoy life.

You can get it at any drug store at $1.00 a bottle. It is a standard remedy, recognized everywhere as the greatest blood antidote ever discovered. If yours is a peculiar case and you desire expert advice, write to The Swift Specific Co., 160 Swift Bldg., Atlanta, Ga.

NEW PAPER CURRENCY SOON

Smaller Size and Uniform Design Waits Action of Congress.

Very shortly the people of the United States will witness a great revolution in the size and appearance of their currency, says Bank Notes.

Each one of the two billion notes of that kind now in circulation will be supplemented by uniform pieces of currency about three-quarters of the size of that in present use.

The change in size is not the only one. Any note with Washington's portrait on it will be a dollar; with Jefferson's, two dollars; with Lincoln's, five dollars; with Grover Cleveland's ten dollars; with Alexander Hamilton's, twenty dollars, and so on.

This plan will render the raising of bills by crooks an impossibility, and we will have the safest and simplest system of national currency in the world.

The new currency will contribute largely to the convenience of the public, and will also effect a large saving in the cost of its production.

Work has been halted on this new size money, Secretary McAdoo being very favorably inclined to the change, but thinks it best to let congress dispose of currency legislation before changing the issue, as new legislation might make new issues necessary to conform to new laws. The new issues, when they have replaced the two billion odd notes now in circulation, will sound the doom of the counterfeiter, for a standard design can be photographed mentally and counterfeits easily detected.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Develops Strong Men.

Timber work is no sinecure. It is a hard life, but it is out in the open, and it develops strong men. The city man who thinks the forest a playground has never rolled out with the "jobber's sun" in winter, broken a "jam" in the spring, or driven rioting rivers in summer. The "jobber's sun" is the moon. Advantage must be taken of seasonable weather in the woods. This was especially so in the old days, when there was less logging by railroad. Then a good snow for hauling meant that every bit of daylight must be utilized. The men were rolled out early. Often it was to breakfast at 4 or 5 o'clock and labor until the darkness of night made work impossible. The men often walked to their work in the woods by moonlight in the morning. Hence came the appellation for the moon of "jobber's sun."

When Your Eyes Need Care
Try Murine Eye Remedy. No Smarting—Feels Fine—Acts Quickly. Try it for Red, Weak, Watery Eyes and Granulated Eyelids. Illustrated Book in each Package. Murine is compounded by our Oculists—not a "Patent Medicine"—but used in successful Physicians' Practice for many years. Now dedicated to the Public and sold by Druggists at 25c and 50c per Bottle. Murine Eye Salve in Aseptic Tubes, 25c and 50c.
Murine Eye Remedy Co., Chicago

First Submarine Boat.

The first submarine boat ever built was made of staves like a barrel, but cigar-shaped in outline, fitted with feathering oars and driven by man power. It was constructed by David Bushnell and used with effect in the revolutionary war. Its success led to further constructions at later dates, one of which was the man driven "Intelligent Whale," which now stands as a relic in the grounds of the New York navy yard.

This machine is also cigar-shaped and was driven by a series of hand cranks working the propeller at the rear. It was built in 1864, is 29 feet in length, 9 feet deep, and made of one-half inch boiler iron.

She Knew.

There is an old lady living in a small town in Southern Pennsylvania who makes great efforts to keep abreast of the times. Her opportunities, however, are circumscribed, and she is sometimes compelled to resort to her imagination. She went to a church sociable lately, and as she entered the room one of the attendants said:

"Good evening, auntie. I am glad you came. We are going to have tableaux this evening."

"Yes, I know," replied the old lady; "I smelt 'em when I first came in."

Narrowing It Down.

"Mabel thinks of becoming an author, and this morning she asked me which school of literature I would recommend."

"What did you tell her?"

"I told her I only knew of two kinds. The kind that uses 'thru' and the kind that doesn't."

Truth Teller.

Marion—Did you ever receive a love letter?

Adeline—Oh, yes.

Marion—From whom did you receive it?

Adeline—The postman.

Packing Hint for China.

It should be remembered when packing china or glassware that damp straw is better than dry, and newspaper more advisable that tissue paper.

A storage battery electric lantern modeled after oil lanterns switches on the current when the handle is raised and shuts it off as it is dropped.

A Monarch's Mistake.

Richard was offering his kingdom for a horse.

"An auto would get you beyond extradition," we suggested.

Molten zinc instead of cement was used to bind together the stones in a bridge recently built in France.

HUERTA ARRESTS HIS LEGISLATURE

Troops Surround Chamber and Rush Men to Prison.

Threat to Leave Capital Met With Reprisal—Apology of Senators Withdrawn.

Mexico City — One hundred and ten members of the chamber of deputies who had signed resolutions of warning to President Huerta as the result of the disappearance of Dr. Belisaro Dominguez, senator for Ciapas, were arrested Saturday and lodged in the penitentiary. Five other deputies who signed the resolution were absent when a cordon of troops was thrown about the legislative building and several hundred soldiers invaded the chamber.

The arrests followed a demand by President Huerta that the chamber withdraw the resolution which carried the threat that the deputies would abandon the capital, owing to an alleged lack of guarantees for their personal safety.

Senator Dominguez early in the month made a speech in the senate violently attacking Huerta, saying that not only had nothing been done during Huerta's regime toward the pacification of the country, but that the present situation in the republic was infinitely worse than before. He said the currency of Mexico had depreciated, fields had been neglected, and towns razed, and that famine threatened. He added that the situation was due first and foremost to the fact that the Mexican peope could not resign themselves to be governed by Huerta.

Before the regular opening of the session of the chamber at 4 o'clock the basement and roof of the building had been packed with troops. Scores of police were scattered through the gallery.

When the deputies were in their places Minister of the Interior Aldape entered the chamber. Simultaneously several hundred federal troops lined up in front of the chamber.

Senator Aldape ascended the platform and read the reply of President Huerta to the resolution warning him of the deputies' intention to dissolve the parliament and hold their sessions elsewhere and demanding an investigation of the disappearance of Senator Dominguez. The reply said President Huerta could do no less than consider the resolution an act of unjustified aggression and transgression of the rights of the other two powers—the executive and the courts.

When the arrests were made a few of the leaders were placed in automobiles, while the other deputies were taken to the penitentiary in streetcars.

Meanwhile similar demands to recant had been made on members of the senate who had concurred in the chamber's resolution. A committee of senators called on President Huerta and signified their willingness to comply with his demands. Later the senators formally withdrew this action.

In anticipation of possible troubles, heavy patrols of troops were placed on the streets. The rapid-fire guns which were posted in the interior courts of the palace in February were again put in place and quantities of ammunition issued.

HOUSE ACTION IS RESCINDED

Decides Not to Remove Officers From Civil Service.

Washington, D. C.—By the closest vote of the session, 111 to 106, the house voted to recede from its conference agreement to concur in the senate amendment to the urgent deficiency appropriation bill, which provides for the removal of deputy internal revenue collectors and deputy marshals from civil service regulations.

The vote came after a protracted debate in which many Democrats assailed the proposal as a direct blow at civil service and characterized it as a step backward toward the spoils system. The Democratic revolt was led by Representative Fitzgerald, of New York, and 54 Democrats voted against the conference.

Representative Underwood, the majority leader, who did not take part in the debate, was loudly cheered when he voted aye.

Alimony Income Problem.

St. Louis—The effect of alimony on the collection of income tax is a question that is puzzling Edward F. Daly, deputy internal revenue collector here. A man who is divorced told the deputy collector that his income is more than $3000 a year, but that he must pay $1200 alimony, thereby reducing his net income below the $3000 exemption for single men.

"Must I pay the tax?" the man asked the deputy collector.

"Search me," said the deputy. He will refer the question to Washington.

Brave Girls Rewarded.

Oregon City, Or.—Franklin T. Griffith, president of the Portland Railway, Light & Power company, has thanked the Misses Mary Green, Hilda Ford and Orena May for their heroism in extinguishing a fire that broke out on the railroad's trestle near Canemah last July. The president expressed his appreciation for the work that the girls had done and sent each of them a check for a substantial amount. The girls discovered the fire and used a wet newspaper to put out the blaze.

Snow Is Four Feet Deep.

Walla Walla, Wash. — Snow storms that have been raging for nearly a week have banked up four feet of snow at Toll Gate, 20 miles from here, and thousands of head of sheep are caught in the storm, herders being unable to drive them through the drifts. It is feared that thousands of sheep will perish. The snow breaks the record for the early season in this district.

OIL MAKES ESCAPE POSSIBLE

Waves Too Wild at First to Take Passengers From Ship.

Fishguard—T. T. Watson, of Philadelphia, a passenger of the Carmania, which rescued many from the burning ship Volturno, said that the chief credit for saving those on the Volturno undoubtedly was due to the oil ship Narragansett. "Only a few good swimmers," he declared, would have survived had not the Narragansett made free use of oil to calm the terrible waves.

"When the Carmania arrived Captain Barr instructed First Officer Gardiner to lower a small boat. This, after terrible buffeting, regained the Carmania with only three oars intact. After this escape Captain Barr did not again attempt to launch a single boat. Hence our ship saved only one passenger, who swam to her.

"On account of the ship's turbine engines, which made fine maneuvering impossible, Captain Barr stood off and directed operations, acting in effect as commander of the great fleet which gathered about the stricken Volturno. Shortly after we arrived the Carmania tried both fore and aft oil sprays, but without effect on the mountainous waves. Then the captain sent out wireless calls in all directions for an oil ship, and his efforts were rewarded by answer from the Narragansett.

"When the Narragansett arrived the Grosser Kurfuerst, with other liners, got in as close as possible and lowered lifeboats. These took aboard several persons who had jumped from the Volturno and the work was greatly facilitated by the steam pinnace of the Grosser Kurfuerst, which had stayed out all night. At once the Narragansett began to spray oil about the doomed ship, and the waves subsided as if by magic. Soon the small boats were able to run alongside and take the people from the ladders. The rescue work was over in a short time. Eleven liners formed the boundary around the film of oil, and the survivors were hoisted aboard the various steamers without trouble."

CURE FOUND FOR INSANITY

Disease Responds to Electrical and Bath Treatments.

San Francisco—In the state insane asylum at Stockton are 2000 patients, of whom 1500 are curable. Dr. Frederick P. Clark after six months' experiment with hydro-theraupeutic treatment, declared that 85 per cent of these curable patients were on the high road to recovery. These patients have been wonderfully affected by the action of hot and cold water and electric vibration.

Many patients spend eight or ten hours in the water daily. Others are put in packs and receive electric light baths. Restraints are removed and the results are surprising. Mild exercise and many games are insisted on. Although the cost of apparatus is heavy, Dr. Clark thinks the state will profit by it, as the release of many patients will cut down the expenses.

YANKEE BACKS REPUTATION

American Soldier 'Licks' Japanese Who Wanted to 'Lick' Soldier.

Portland—For upholding the reputation of Yankee valor against a Japanese, Cornelius Twomey, a soldier from Vancouver Barracks, was arrested and immediately discharged when he explained the circumstances in Municipal court. The Japanese forfeited $25 bail.

Twomey was in a Japanese restaurant, when a waiter inquired if the man in uniform was an American soldier. Twomey answered affirmatively and the Japanese, Frank Takata, said that he could "lick" any American soldier. When the police broke into the fight, Takata was much the worse for wear.

AIGRETTES NOT MOLESTED

Passengers Allowed to Go Through Customs Despite Protest.

New York—A dozen or more women who arrived here by the Holland-American liner Rotterdam, wore aigrettes in their hats, but none of them was requested by the customs inspectors to take the feathers out and turn them over to the custody of the government.

A woman voyager who said she was a member of the Audobon society, suggested to one of the inspectors that he should do somethng, as she believed many of the feathers were bought abroad. The inspector informed his superior, but they decided to let the women with aigrettes alone.

Christians Plan Exhibit.

San Francisco—A comprehensive exhibit demonstrating the power and value of the Christian religion is planned for the Panama-Pacific exposition by the Protestant churches of the city. Secretary MacFarland, of the Federal council of the churches of Christ in America, brought the subject to the attention of the committee. It is proposed to construct a building on the exposition grounds for exhibition purposes, conferences, a pageant of the world's missionary progress and a continuous evangelistic propaganda.

Apple Day Menu Started.

The Dalles, Or.—Dwellers in Oregon will eat apples whether they desire to do so or not, on November 14, "Apple day," if the plan which is being promulgated by Manager Peter Kuehnling, of The Dalles Hotel, is carried out. Mr. Kuehnling has prepared for his hotel an apple day menu. Apple jack cocktails, cider soup, apple fritters, roast pork and apple sauce, roast turkey stuffed with apples, apple mayonnaise, apple dumplings, apple pie and baked apples with cream are only a few of the dishes suggested.

Relief is Sent to Alaska.

Seattle, Wash.—The steamship Victoria, after discharging cargo at Nome, sailed for Solomon, a placer mining camp of 300 inhabitants, 40 miles southeast of Nome and which is reported to have been entirely destroyed by the great tidal storm. The Victoria is expected to send boats ashore and take away those who wish to leave.

STEAMER BURNS; 135 ARE LOST

Atlantic Liner Volturno Destroyed During Gale.

Many Ships Answer Wireless Distress Signals, But Storm Prevents Rescue Work.

London—Not since the Titanic sank has Europe been so thrilled as by a wireless message Monday telling of the burning of the steamship Volturno in mid-Atlantic with a loss, so far as known, of 135 lives and the rescue of 521. The Volturno sailed from Rotterdam on October 2 for New York. According to the official statement she carried 22 first cabin passengers, 538 in the steerage and a crew numbering 96.

The steamer Carmania, bound from New York for Liverpool, was 78 miles away when the call for help sounded. Captain Barr, ordering full steam, in spite of the gale drove through the seas at 20 knots an hour and was the first to reach the burning vessel. She was followed by La Touraine, Minneapolis, Rappahannock, Czar, Narragansett, Devonian, Kroonland, Grosser Kuerfurst and Zydlitz at various hours throughout the day. Try as they might, the rescuing vessels could not get either line or lifeboat to the Volturno, the forward part of which was almost hidden by a dense cloud of smoke when the Carmania arrived.

The burning steamer lay in the trough of the sea, pounding helplessly, with her propellers fouled by the boats' tackle. The terrified passengers were huddled together as far as it was possible to get from the flames, while throughout the day the officers and crew fought desperately with whatever appliances were at hand to hold the fire in check.

The rescue ships reached the scene of the disaster in plenty of time to save all, but for hours were obliged to stand helplessly by the blazing vessel, impotent because of the storm to reach the agonized men, women and children crowding the after part of the ship and within a stone's throw. All night the lifeboats made a desperate effort to get alongside the Volturno, but the waves beat them back again and again, and not until the storm abated at daylight did the rescuers succeed in removing the survivors from the doomed ship.

The Volturno was equipped with boats sufficient, the agents say, for a thousand people, but the boisterous sea or lack of boat drill, or panic among the passengers, prevented the successful employment of them. The rescue ships were able to lower lifeboats, but apparently most of the boats launched from the Volturno were smashed or upset and the occupants drowned.

Two of the boats, crowded with passengers, are reported to have got away from the ship, but a search for them has proved fruitless, and they have practically been given up as lost. The occupants of these boats are included in the death roll.

The hopelessness of the situation was manifested at 9 o'clock at night, when a great explosion tore away part of the upper works, and flames burst from the engine room. It then became a matter of how long the Volturno would stay above water.

Meanwhile several of the terrified passengers, wrapped in life bouys, dropped over into the sea. One of them was taken aboard the Carmania. It may be that others found a haven with other vessels of the fleet, but some undoubtedly were swept away.

When day broke the Volturno was still afloat. The gale had moderated and the seas had calmed down. From almost everyone of the encircling steamers' lifeboats were sent out and into these the women and children were lowered first. Several trips were necessary before the survivors were removed to a place of safety.

It is pointed out as a remarkable coincidence that the Volturno about four years ago made a noteworthy rescue in a great storm in mid-Atlantic of the crew of a French vessel. Captain Harrison, who then commanded the Volturno, was decorated by the French government for his daring act.

Liquid Mud Delays Work.

Panama — The Cucaracha slide is giving the engineers no end of trouble to work a cutting through it to let the water from the filled section of Culebra cut into the unwatered section south to the Pedro Miguel locks. After 48 hours of unremitting effort to excavate a trench through the barrier, no appreciable headway has been made, as liquid mud flows into the ditch about as fast as it is removed. A change of plan has been decided on whereby pumps will be installed to excavate a channel by hydraulic pressure.

Society Woman Accused.

New York—A woman who for several years has been welcome at the homes of society leaders in New York, Newport and Narragansett Pier will be arrested soon as the leader of the band of sneak thieves who last July robbed Mrs. Carey Rumsey and Mrs. John H. Hanan of jewels valued at $175,000. According to Samuel Samwick, general manager of the Merchants' Secret Service bureau, the woman in now residing at an exclusive hotel in Atlantic City. He expects to recover the gems without any trouble.

Blooms Are for Jessie Wilson.

Washington, D. C.—A chrysanthemum wedding appears to be the plan for the White House nuptials of Miss Jessie Woodrow Wilson and Francis B. Sayre on November 25. Thousands of the beautiful "mums" are being grown in the White House conservatory for the event. Mrs. Thomas R. Marshall, wife of the vice president, has bought many yards of exquisite hand-made lace for the bride-elect's wedding finery.

WINCHESTER
BIG GAME CARTRIDGES
The time of all others when reliable cartridges are invaluable is in big-game hunting. A miss-fire, an inaccurate cartridge, or one having poor penetration may mean the loss of a coveted trophy or even injury to the hunter. Winchester, the **W** brand of cartridges, smokeless or black powder, can always be relied on to be sure fire, accurate, and to have speed and penetration. You can help
MAKE YOUR HUNT A SUCCESS BY USING THEM.

The vacuum principle has been adapted to a fly trap invented by a Colorado man, the insects being drawn to their doom through funnels placed at windows, tables, and other places where they congregate.

In a new resuscitation apparatus which weighs but seven pounds pure oxygen is obtained at any desired pressure by the admission of water to a compartment containing a patented chemical compound.

"A Perfect Woman Nobly Planned To Warn, to Comfort and Command"

Nature never intended woman to be delicate, ailing, or a sufferer from "nerves." Women in middle age complain of "hot flashes." Many women suffer needlessly from girlhood to womanhood, and from motherhood to middle life, with backache, or headache, dizziness, faintness, or bearing-down sensations. For a permanent relief from these distressing symptoms nothing is so good as

DR. PIERCE'S
FAVORITE PRESCRIPTION

as a soothing and strengthening nervine—allays and subdues nervous excitability, irritability, nervous exhaustion, and other distressing symptoms commonly attendant upon functional and organic diseases of the feminine organs. It induces refreshing sleep and relieves mental anxiety and despondency.

The "Favorite Prescription" is known everywhere and for over 40 years as **the standard remedy** for the diseases of women. Your dealer in medicines sells it in liquid or tablet form; or you can send 50 one-cent stamps for a trial box of Dr. Pierce's Favorite Prescription tablets. Address Dr. Pierce, Invalids' Hotel, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules.

WONDERFUL DRUG THAT STIMULATES GROWTH OF HAIR

And Revives Pigment-forming Cells That Give Hair Its Natural Color.

Hardly any of us are entirely free from dandruff or other scalp affections. Millions of us, so long as the trouble is slight, do little or nothing to cure the affection. Other millions are trying to do something, but getting no results, by applying all sorts of fancy colored and fancy named hair "tonics." You are not likely to get much benefit, if any, by using any preparation that does not contain the one known drug that positively stimulates the growth of hair. The safe and sure way is to mix your own tonic or go to a reliable druggist and have him mix it for you. Here is a simple formula: 6 oz. ordinary Bay Rum; 2 oz. ordinary Lavona de Composee; ½ drachm Menthol Crystals. If you choose, add 1 drachm of your favorite perfume. Apply to the scalp with finger tips, night and morning, to destroy dandruff. to stop falling hair, to cleanse and beautify the hair, and to stimulate the growth of the hair. This treatment is recommended to stimulate the growth of the hair, even in cases of complete baldness. If your hair is prematurely gray, try it and see if it will not make the pigment-forming cells active enough to completely restore the natural color. This formula contains no dye or artificial coloring matter but is designed to make nature produce the natural color in the natural way. Any druggist can supply you with the ingredients or mix the tonic for you.

Strange Ways to Solve Problems.

Men have strange devices for quickening thought. Novelists and writers of plays have used little figures which they have moved about hither and yon. Not a few great public men have gone a-fishing. An incident has recently been reported of a man who solved his problems by going away entirely alone in his yacht. It was related as a fact that on one of these lonely excursions he thought out how to get possession of a railroad. The way was peculiar. He bought a necklace for a rather fabulous sum and presented it to a young woman about to marry his nephew, a somewhat roundabout way to get a railroad, it would seem, but it was in this way that he got it.

Constipation causes and seriously aggravates many diseases. It is thoroughly cured by Dr. Pierce's Pellets. Tiny sugar-coated granules.

Some Necklace.

Brussels — The famous $625,000 pearl necklace which was stolen from the mails and later picked up by a workman on a London sidewalk, was sold to Mlle. DuMonceau de Bergendael, of this city, who is said to be acting for a "celebrated personage," for $700,000.

To cool the air far underground and thereby permit the miners to work longer shifts the owners of a German coal mine compress air at the surface of the ground and pipe it through the workings.

ORDERED HIS PEARL FRIED

If He Had Stewed It He Would Have Made $15,000.

Martinez, Cal.—If Judge E. H. Ware had taken, on a recent trip to San Francisco, his oysters in a stew instead of fried, he would be richer today by a small fortune. On biting into one of his fried oysters the judge encountered something hard. Investigation disclosed a pearl, which he tucked away in a vest pocket.

Back again in Martinez, Judge Ware showed his pearl to Under Sheriff William Veale, who offered to submit it to a San Francisco jeweler for valuation. When the San Francisco expert looked at the pearl he said:

"If your friend had ordered an oyster stew instead of a fry this thing would be worth $15,000. It is perfect in form and just matches one we're trying to find a mate for, but the frying has completely ruined it."

For quickly changing window displays a New Yorker has invented a three-part window lining, raised or lowered like an elevator, so that only one part is visible at a time.

Statesman—I trust the people.
